2. Details of the Offers

2.1 The Entitlement Offer

The Entitlement Offer is being made as a non-renounceable entitlement issue of one Option for every three Shares held by Shareholders registered at the Record Date, at an issue price of \$0.001 per Option. In the calculation of any Entitlement, fractions will be rounded down to the nearest whole number or otherwise disregarded.

Based on the capital structure of the Company as at the date of this Prospectus (and assuming no Options are exercised, Performance Rights converted or other Shares issued prior to the Record Date), approximately 97,520,811 Options will be issued pursuant to the Entitlement Offer (subject to rounding of fractional Entitlements) to raise up to approximately \$97,520.

As at the date of this Prospectus, the Company has 76,520,000 Options and 5,150,000 Performance Rights on issue. All Performance Rights remain subject to vesting conditions, however, all Options are capable of being exercised prior to the Record Date which would result in additional Entitlements under the Entitlement Offer.

All of the Options offered under the Entitlement Offer will be issued on the terms and conditions in Section 4.2.

Details of the purpose and effect of the Entitlement Offer and the proposed use of funds raised are set out in Section 3.

The Entitlement Offer is non-renounceable. Accordingly, a Shareholder may not sell or transfer all or part of their Entitlement.

2.2 Minimum subscription

There is no minimum subscription.

2.3 Acceptance

Your acceptance of the Entitlement Offer must be made on the Entitlement and Acceptance Form accompanying this Prospectus.

Your acceptance must not exceed your Entitlement as shown on that form. If it does, your acceptance will be deemed to be for the maximum Entitlement.

You may participate in the Entitlement Offer as follows:

- (a) if you wish to accept your **full Entitlement** make payment by BPAY® or electronic funds transfer (**EFT**) in accordance with Section 2.4 and the instructions on the accompanying Entitlement and Acceptance Form for the amount indicated on your Entitlement and Acceptance Form; or
- (b) if you only wish to accept **part of your Entitlement** make payment by BPAY® or EFT in accordance with Section 2.4 and the instructions on the Entitlement and Acceptance Form for the amount of your Entitlement being accepted. You will be deemed to have taken up that part of your Entitlement which is covered in full by your application monies; or
- (c) if you **do not wish to accept** all or part of your Entitlement, you are not obliged to do anything.

2.4 Payment by BPAY® or EFT

The Company requires participants in the Entitlement Offer to apply for the Options by BPAY® or EFT only to overcome potential mail delays. Cheques and money orders will not be accepted.

For payment by BPAY® or EFT, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. You can only make payment by EFT if you are a holder of an account that supports EFT transactions to an Australian bank account. Please note that should you choose to pay by BPAY® or EFT:

- (a) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form, however, you are encouraged to return it to the share registry (by email) for reconciliation purposes; and
- (b) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Options which is covered in full by your application monies.

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the unique customer reference number (**CRN**) specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. Do not use the same CRN for more than one of your Shareholdings. This can result in your application monies being applied to your Entitlement in respect of only one of your Shareholdings (with the result that any application in respect of your remaining Shareholdings will not be valid).

It is your responsibility to ensure that your BPAY® or EFT payment is received by the share registry by no later than 5:00 pm (Perth time) on the Closing Date for the Entitlement Offer. You should be aware that your financial institution may implement earlier cut-off times with regards to electronic payment and you should therefore take this into consideration when making payment. Any application monies received for more than your final allocation of Options (only where the amount is \$1.00 or greater) will be refunded. No interest will be paid on any application monies received or refunded.

2.5 Underwriting

By an agreement between Golden Triangle Capital Pty Ltd (ACN 662 693 243) (**Underwriter**) and the Company (**Underwriting Agreement**), the Underwriter has agreed to underwrite the Entitlement Offer for 97,520,811 Options (**Underwriting**). The Underwriter is an entity controlled by Zane Lewis, Joint Company Secretary of the Company.

No fee will be paid to the Underwriter for the Underwriting.

As at the date of the Prospectus, the Underwriter has a relevant interest in 800,000 Shares and 2,000,000 Options.

The obligation of the Underwriter to underwrite the Entitlement Offer is subject to certain events of termination set out in Annexure B.

2.6 Effect on control of the Company

The Company is of the view that the Offers will not affect the control (as defined in section 50AA of the Corporations Act) of the Company as only Options are being offered under the Prospectus. As such no existing Shareholder or the Underwriter will increase its voting power to greater than 20% as a result of completion of the Offers.

Where Options are exercised into Shares, the voting power of the holders who exercise the Options will increase. The likelihood of Options being exercised is dependent on the price of the Shares from time to time until the Options expire.

2.7 Potential dilution

No immediate dilution of Shareholders will occur as a result of the issue of Options under this Prospectus.

If all the Options offered under this Prospectus are issued and exercised, the Shares issued on exercise of those Options would represent approximately 25% of the Shares on issue following completion of the Offers (assuming no other Shares are issued or convertible securities exercised or converted into Shares).

Shareholders should note that if they do not participate in the Entitlement Offer, their holding is likely to be diluted if the Options are issued and subsequently exercised by approximately 25% (as compared to their holding and number of Shares on issue as at the date of the Prospectus). Examples of how the dilution may impact Shareholders is set out in the table below:

Holder	Holding as at Record date	% at Record Date	Holdings if Entitlement Offer not taken up	% post Entitlement Offer
Shareholder 1	15,000,000	5.12%	15,000,000	3.84%
Shareholder 2	12,000,000	4.10%	12,000,000	3.08%
Shareholder 3	9,000,000	3.08%	9,000,000	2.31%
Shareholder 4	6,000,000	2.05%	6,000,000	1.54%
Shareholder 5	3,000,000	1.03%	3,000,000	0.77%

Note: The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted are placed under the Shortfall Offer and all Options offered under the Prospectus are exercised. The above table also assumes that no other Shares are issued, including by exercise of other classes of Options or conversion of Performance Rights.

2.8 Shortfall Offer

Any Entitlement not taken up pursuant to the Entitlement Offer will form the Shortfall Offer.

The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date for the Entitlement Offer although it is intended that the Shortfall Offer will close promptly following the Closing Date under the terms of the Underwriting Agreement.

The issue price for each Option to be issued under the Shortfall Offer shall be the same as under the Entitlement Offer.

Shortfall will be placed pursuant to the terms of the Underwriting Agreement. Applications for the Shortfall to satisfy the terms of the Underwriting Agreement are to be made by completing the Shortfall Offer Application Form and providing the Company with payment for those Shortfall Options in accordance with the instructions on the Shortfall Offer Application Form.

All decisions regarding the allocation of Shortfall Options will be made by the Underwriter (in consultation with the Company). Do not complete a Shortfall Offer Application Form unless directed to do so by or the Company.

2.9 Quotation on ASX

The Company will not apply for Official Quotation of the Options offered pursuant to this Prospectus.

2.10 Issue

Options issued pursuant to the Entitlement Offer will be issued in accordance with the ASX Listing Rules and timetable set out at Section 1.

Options issued pursuant to the Shortfall Offer will be issued pursuant to the terms of the Underwriting Agreement and the timetable set out at Section 1.

Where the number of Options issued is less than the number applied for, or where no issue is made, surplus application monies will be refunded without any interest to the Applicant as soon as practicable after the Closing Date of the applicable Offer.

Pending the issue of the Options or payment of refunds pursuant to this Prospectus, all application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Options issued under the Entitlement Offer will be mailed in accordance with the ASX Listing Rules and timetable set out at Section 1 and for Options issued under the Shortfall Offer as soon as practicable after their issue.

2.11 Overseas Applicants

The Offers do not, and are not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Options these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Entitlement Offer is not being extended and Options will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

In relation to the Shortfall Offer, the distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any of these restrictions. Failure to comply with these restrictions may violate securities laws. Applicants who are residents in countries other than Australia should consult their professional advisers as to whether any governmental or other consents are required or whether any other formalities need to be considered and followed. No action has been taken to register or qualify the Shortfall Offer or the Options under the Shortfall Offer, or to otherwise permit a public offering of the Options under the Shortfall Offer in any jurisdiction outside Australia.

2.12 Important Information for New Zealand Investors

This offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014.

This offer and the content of the offer document are principally governed by Australian rather than New Zealand law. In the main, the Corporations Act and the regulations made under the Corporation Act set out how the offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies, and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies, and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets regulators have enforcement responsibilities in relation to this offer. If you need to make a complaint about this offer, please contact the Financial Markets Authority, New Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

This offer may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

If you expect the financial products to pay any amounts in a currency that is not New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. If the financial product market does not operate in New Zealand, the way in which the market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from financial product markets that operate in New Zealand.

2.13 Nominees and custodians

Shareholders resident in Australia or New Zealand holding Shares on behalf of persons who are resident in other jurisdictions are responsible for ensuring that applying for Options under the Entitlement Offer does not breach regulations in the relevant overseas jurisdiction. The Company is not required to determine whether or not any Shareholder is acting as a nominee or the identity or residence of any beneficial owners of Shares. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

2.14 Target Market Determination

In accordance with the design and distribution obligations under the Corporations Act, the Company has determined the target market for the offer of Options under this Prospectus. The Company will only distribute the Prospectus to those investors who fall within the target market determination (TMD) as set out on the Company's website (<https://www.rinconresources.com.au/target-market-determination/>). By making an application under an Offer, you warrant that you have read and understood the TMD and that you fall within the target market set out in the TMD.

2.15 Representations

The return of an Application Form or otherwise applying for Options under an Offer will be taken by the Company to constitute a representation by the Applicant that it:

- (a) has received a printed or electronic copy of this Prospectus accompanying the Application Form and has read it in full;
- (b) agrees to be bound by the terms of this Prospectus and the Constitution;
- (c) has read and understood the TMD and that it falls within the target market set out in the TMD;

- (d) has obtained all necessary approvals and complied with all relevant laws and regulations for the purposes of Section 2.11 and 2.12 (to the extent that they are applicable) and confirms its eligibility in respect of an offer of Options under the applicable Offer;
- (e) declares that all details and statements in the Application Form are complete and accurate;
- (f) declares that it is over 18 years of age and has full legal capacity and power to perform all of its rights and obligations under the Application Form;
- (g) acknowledges that once the Application Form is returned or payment is made its acceptance may not be withdrawn;
- (h) agrees to being issued the number of Options that it applies for (or such other number issued in accordance with this Prospectus);
- (i) authorises the Company to register it as the holder(s) of the Options issued to it under the applicable Offer;
- (j) acknowledges that the information contained in this Prospectus is not investment advice or a recommendation that the Options are suitable for it, given its investment objectives, financial situation or particular needs; and
- (k) authorises the Company and its officers or agents to do anything on its behalf necessary for the Options to be issued to it, including correcting any errors in its Application Form or other form provided by it and acting on instructions received by the share registry using the contact details in the Application Form.

2.16 Enquiries

Any questions concerning the Offers should be directed to the Company on +61 8 6555 2950.

3. Purpose and effect of the Offers

3.1 Purpose of the Offers

The purpose of the Entitlement Offer is to raise up to approximately \$97,520 (less costs of the Offers). The funds raised from the Entitlement Offer are intended to be used in accordance with the table set out below:

The pro-forma statement of financial position has been prepared assuming all Entitlements are accepted (ignoring the effects of rounding of fractional Entitlements) and includes expenses of the Offers.

The unaudited pro-forma statement of financial position has been prepared for illustrative purposes only and gives effect to the Offers after deducting the estimated cash costs of the Offers as if that had occurred as of 31 December 2024.

The historical and pro-forma financial information is presented in an abbreviated form, insofar as it does not include all of the disclosures required by Australian Accounting Standards applicable to annual financial statements.

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a member or a proxy, attorney or representative of a member shall, in respect of each fully paid share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for the share, but in respect of partly paid shares, shall have such number of votes being equivalent to the proportion which the amount paid (not credited) is of the total amounts paid and payable in respect of those shares (excluding amounts credited).

(d) Dividend rights

Subject to and in accordance with the Corporations Act, the ASX Listing Rules, the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time decide to pay a dividend to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares. The Directors may rescind a decision to pay a dividend if they decide, before the payment date, that the Company's financial position no longer justifies the payment.

No dividend shall carry interest as against the Company.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare

from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

No Shares with special dividend rights are currently on issue.

(e) Winding-up

In a winding up, the liquidator may, with the sanction of a special resolution of the Company, divide among the Shareholders in kind the whole or any part of the property of the Company and may for that purpose set such value as the liquidator considers fair on any property to be so divided and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution of the Company, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

(f) Transfer of Shares

Generally, Shares are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act or the ASX Listing Rules.

(g) Future increases in capital

Subject to the Corporations Act, the ASX Listing Rules and the Constitution, the Directors may at any time issue such number of shares (either as ordinary shares or shares of a named existing or new class or classes) or options over shares at the issue price that the Directors determine and with such rights or such restrictions as the Directors shall, in their absolute discretion, determine.

A Director or any person associated with a Director must not participate in an issue by the Company of an equity security unless the participation of the Director or the person associated with a director in the issue is permitted under the ASX Listing Rules and the Corporations Act.

(h) Variation of rights

Pursuant to section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of Shares, the rights attached to any class, may be varied or cancelled by a special resolution of the Company, and with the consent in writing of the holders of at least three-quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) Shareholder liability

As the Shares to be issued on exercise of the Options offered under the Prospectus will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(j) Alteration of capital

Subject to, and in accordance with, the Corporations Act and the ASX Listing Rules, the Company may alter its share capital by ordinary resolution, including reducing its share capital by distributing to shareholders securities of any other body corporate.

The Company may buy back Shares subject to, and in accordance with, the Corporations Act and the ASX Listing Rules.

(k) Listing Rules

The Constitution contains certain provisions required under the ASX Listing Rules to ensure consistency with the ASX Listing Rules, including that if there is any inconsistency between the provisions of the Constitution and the ASX Listing Rules then the Constitution is deemed not to contain that provision to the extent of the inconsistency.

(l) Alteration of Constitution

The Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

- (ii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the Options.

Also, if required, the Company will give ASX a notice that complies with section 708A(5)(e) of the Corporations Act (**Cleansing Notice**), or, if the Company is unable to issue a Cleansing Notice, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors. If a Cleansing Notice for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, the Company must, no later than 20 Business Days after becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors.

(h) **Shares issued on exercise**

Shares issued on exercise of the Options rank equally with the then issued Shares of the Company.

(i) **Reconstruction of capital**

If at any time the issued capital of the Company is reconstructed, all rights of a holder are to be changed in a manner consistent with the Corporations Act and the ASX Listing Rules at the time of the reconstruction.

(j) **Participation in new issues**

There are no participation rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the Options without exercising the Options.

(k) **Change in Exercise Price or number of underlying securities**

Subject to paragraph (i), an Option does not confer a right to a change in Exercise Price or a change in the number of underlying securities over which the Option can be exercised.

(l) **Transferability**

An Option is transferable subject to any restriction or escrow arrangements imposed by ASX or under applicable Australian securities laws.

5. Risk factors

Activities in the Company and its controlled entities, as in any business, are subject to risks, which may impact on the Company's future performance. The Company and its controlled entities have implemented appropriate strategies, actions, systems and safeguards for known risks, however, some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which Shareholders and Applicants need to be aware of in evaluating the Company's business and risks associated with an investment in the Company. Investors should carefully consider the following factors in addition to the other information presented in this Prospectus.

The principal risks include, but are not limited to, the following:

5.1 Company specific risks

(a) Exploration and Operating Risk

The tenements in which the Company has an interest (**Tenements**) are at an various stages or exploration. Mineral exploration and development are high-risk undertakings and there can be no assurance that future exploration of the Tenements, or any other mineral licences that may be acquired in the future will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited.

The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will depend upon:

- (i) the Company's ability to maintain title to the Tenements;
- (ii) the Company being able to delineate economically mineable resources and reserves;
- (iii) positive movements in the price of minerals and exchange rate fluctuations;
- (iv) the Company obtaining all consents and approvals (including environmental approvals) necessary to conduct its exploration activities; and
- (v) the successful management of development operations.

In the event that Company's exploration programs prove to be unsuccessful, this could lead to a diminution in the value of the Tenements, a reduction in the cash reserves of the Company and possible relinquishment of Tenements.

Until the Company is able to realise value from its Tenements, it is likely to incur ongoing operating losses.

(b) **Title Risks and Native Title**

Interests in tenements in Australia are governed by the respective State legislation and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments. Additionally, tenements are subject to periodic renewal. There is no guarantee that current or future tenements and/or applications for tenements or renewal of tenements will be approved.

It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

The Directors will closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.

(c) **Environmental Risks**

The operations and proposed activities of the Company in Australia are subject to State and Federal laws and regulation concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Minnig operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that the environmental laws and regulations become more onerous making the Company's operations more expensive.

Approvals are required for land clearing and ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes and mining activities.

(d) **Commodity Price Volatility and Exchange Rate Risk**

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for metals, technological advancements, forward selling activities and other macroeconomic factors (such as inflation, interest rates, currency exchange rates and global and regional demand for, and supply of minerals).

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

(e) **Resources and Reserves**

Reserve and Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when initially calculated may alter significantly when new information or techniques become available. In addition, by their very nature Resource and Reserve estimates are imprecise and depend to some extent on interpretations which may prove to be inaccurate.

(f) **Exploration Costs**

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainty, and accordingly, the actual costs may materially differ from the estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

(g) **Mine Development**

Possible future development of mining operations at the Tenements is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.

If the Company commences production on any of the Tenements, its operations may be disrupted by a number of risks and hazards which are beyond the control of the Company. No assurance can be given that the Company will achieve commercial viability through the development of its projects.

The risks associated with the development of a mine will be considered in full, should the Company's projects reach that stage.

(h) **Climate**

There are a number of climate related factors that may affect the operations and proposed activities of the Company, including, the emergence of new or expanded regulations association with the transitioning to a lower-carbon economy and market challenges related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences.

Climate change may also cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

5.2 General Risks

(a) Additional requirements for capital

The Directors consider the Company will have sufficient funds to meet the immediate objectives of the Company on completion of the Offers. Additional funding may be required in the event costs exceed the Company's estimates and to effectively implement its business and operational plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities, and to meet any unanticipated liabilities or expenses which the Company may incur. If such events occur, additional funding will be required.

The Company may seek to raise further funds through equity or debt financing, joint ventures, or other means. Failure to obtain sufficient financing for the Company's activities may result in delay and indefinite postponement of the activities and the proposed exploration and development strategy. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing may not be favourable to the Company and might involve dilution to Shareholders.

(b) Reliance on key personnel

The Company's future depends, in part, on its ability to attract and retain key personnel. It may not be able to hire and retain such personnel at compensation levels consistent with its existing compensation and salary structure. Its future also depends on the continued contributions of its executive management team and other key management and technical personnel, the loss of whose services would be difficult to replace. In addition, the inability to continue to attract appropriately qualified personnel could have a material adverse effect on the Company's business.

(c) Economic and financial market risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's activities, as well as on its ability to fund those activities.

Further, share market conditions may affect the value of the Securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) interest rates and inflation rates;
- (iii) currency fluctuations;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of Securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(d) **Force majeure**

The Company, now or in the future, may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, extreme weather conditions, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(e) **Trading price of Shares**

The Company's operating results, economic and financial prospects and other factors will affect the trading price of Shares. In addition, the price of Shares is subject to varied and often unpredictable influences on the market for equities, including, but not limited to, general economic conditions including the performance of the Australian dollar on world markets, inflation rates, foreign exchange rates and interest rates, variations in the general market for listed stocks in general, changes to government policy, legislation or regulation, industrial disputes, general operational and business risks and hedging or arbitrage trading activity that may develop involving Shares.

In particular, the share prices for many companies have been and may in the future be highly volatile, which in many cases may reflect a diverse range of non-company specific influences such as global hostilities and tensions relating to certain unstable regions of the world, acts of terrorism and the general state of the global economy. No assurances can be made that the Company's market performance will not be adversely affected by any such market fluctuations or factors.

(f) **Government Policy Changes**

Adverse changes in government policy or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations and mining and exploration activities of the Company. It is possible that the current system of exploration and mine permitting in the jurisdictions where the Company's assets are or will be located may change, resulting in impairment of rights and possibly expropriation of the Company's properties without adequate compensation.

(g) **Litigation risk**

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. The Company may also be involved in disputes with third parties in the future which may result in litigation. Should any such claim or dispute be determined not in the Company's favour, this may impact adversely on the Company's operations, financial performance and financial position.

(h) **Insurance**

The Company intends to obtain insurance for its operations in accordance with industry practice. However, the Company's insurance may not be of a nature or level to provide adequate insurance against all possible risks to the Company. The occurrence of an event that is not fully covered by insurance could have a material adverse effect on the Company.

Insurance of all risks associated with mineral exploration or production is not always available, and where available, the costs of such insurance may be prohibitive.

5.3 **Investment speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Options offered under this Prospectus.

Therefore, the Options to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Options.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Options pursuant to this Prospectus.

If you have not, please phone the Company on the number set out in the Corporate Directory to this Prospectus and the Company will send you, for free, either a hard copy or a further electronic copy of the Prospectus, or both. 6.9 Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

6.10 Clearing House Electronic Sub-Register System (CHESS) and Issuer Sponsorship

The Company will not be issuing option certificates. The Company is a participant in CHESS, for those investors who have, or wish to have, a sponsoring stockbroker. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of Options issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

6.11 Privacy Act

If you complete an application for Options, you will be providing personal information to the Company (directly or by the Company's share registry). The Company collects, holds and will use that information to assess your application, service your needs as a holder of equity securities in the Company, facilitate distribution payments and corporate communications to you as a Security holder and carry out administration.

The information may also be used from time to time and disclosed to persons inspecting the register, bidders for your securities in the context of takeovers, regulatory bodies, including the Australian Taxation Office, authorised securities brokers, print service providers, mail houses and the Company's share registry.

You can access, correct and update the personal information that we hold about you. Please contact the Company or its share registry if you wish to do so at the relevant contact numbers set out in this Prospectus.

Collection, maintenance and disclosure of certain personal information is governed by legislation including the *Privacy Act 1988* (Cth) (as amended), the Corporations Act and certain rules such as the ASX Settlement Operating Rules.
