Eagle Mountain Mining Limited (ASX:EM2) (**Eagle Mountain**, or the **Company**) is pleased to provide an operations overview for the quarter ended 30 June 2025 (**Quarter**).

### HIGHLIGHTS

#### Projects

- The Board continues to review new Project opportunities

#### Corporate

- Board composition refresh complete following the appointments of Fabio Vergara (Executive Director) and Michael Fennell (Non-executive Director) earlier in the year and with previous Managing Director Charles Bass stepping down from the Board on 6 June 2025
- Mr Bass remains a major shareholder of the Company

Commenting on the activities during the Quarter, Eagle Mountain Mining's Executive Director, Fabio Vergara, said:

*"Eagle Mountain is focused on leveraging the strong market sentiment for USA-based copper projects reinforced by the recent tariff announcement and copper's historically high price. We have implemented strategies to create shareholder value from our Wedgetail and Silver Mountain Projects, including pursuing partnering processes to fund exploration and gain exposure to advanced assets. During the Quarter, Mr. Bass transitioned from his role as Managing Director: his passion and extensive experience have been invaluable over the years, and we anticipate a continued strong relationship with him as a significant shareholder."*

### EXPLORATION ACTIVITIES

#### Silver Mountain Project

The Silver Mountain Project is located in Arizona, USA, approximately 80 km north of Phoenix. The Project lies within the Laramide Arc, a northwest-southeast trending geological feature that hosts world-class porphyry copper mines and deposits such as Bagdad, Miami-Globe and Resolution. The Project also occurs on the southern extension of a volcanogenic massive sulphide (VMS) belt that hosts the United Verde and Iron King historical mines (Figure 1). Due to this unique geological setting, Silver Mountain is highly prospective for both porphyry copper and VMS mineralisation.

## Wedgetail Project

The Company continues to investigate the potential to transform existing and potential future tailings into marketable products to generate economic value while also enhancing environmental sustainability and reducing waste.

As previously reported, the investigation revealed that a simple classification process, separating the tailings into fine and coarse fractions, produces potentially saleable products. No further processing is necessary to prepare the tailings for downstream applications.

### Preliminary Market Assessment

Eight companies across Arizona and the broader United States were identified as potential customers. Eagle Mountain is still awaiting feedback from these companies regarding the suitability of the existing tailings for their industrial applications
