Since our last update, the Fund has incurred solid gains primarily due to a sharp lift in Japan's stock market following a trade agreement being reached with the US. Japanese financials, along with exporters have been notable beneficiaries with the effective tariff risk overhang now effectively removed. The Fund retains significant exposure to Japanese banks and financials. The Board this week confirmed a special fully franked dividend of 5c due to the Fund's strong investment returns this year. The announcement marks a resumption in dividend payments for the first time in a number of years.

**The Fund's China/Hong Kong holdings have also performed solidly in July.** We believe the confirmation and greenlight of the huge \$170 billion hydro project by the Government is a gamechanger for the economy. The fiscal stimulus is significant, and we anticipate more announcements of large-scale infrastructure projects from the government over the coming year.

In terms of portfolio holdings, British telco **BT Group** has been one of the best performers on the FTSE 100 table this week after delivering **a better than expected first quarter profit result which topped expectations. Management also delivered a** <u>**positive outlook on earnings.</u></u> In Japan, <b>Mitsubishi Heavy Industries** performed strongly after lifting earnings guidance.</u>
