

QUARTERLY ACTIVITIES REPORT

QUARTER ENDED 30 JUNE 2025

HIGHLIGHTS

- Extensive field work programme completed across multiple walk-up high-grade gold targets at Pharos Gold Project
- RC drill programme of 35 holes for 1,691m completed post-quarter end
- Assays due early this quarter, with further drilling to commence in August testing another suite of high-grade targets including *Oliver's Patch*, *Cap Lamp* and *Maguires North*
- Scorpion has the largest landholding along the Dalgarranga-Big Bell shear corridor which remains largely untested by exploration
- Murchison ground position expanded to 1,600km² with E79 Gold Mines (ASX:E79) farm-in/JV agreement adjacent to existing 100% owned Pharos Project
- Work towards completion of heritage surveys at Jungar Flats JV advancing
- Scorpion continues to assess options to unlock value from Mt Mulcahy Copper asset in Western Australia

Scorpion Minerals Limited (ASX:SCN) (**Scorpion, SCN or the Company**) is pleased to present its Quarterly Activities Report for the period ending 30 June 2025.

Management Commentary

Commenting on the June quarter, CEO Michael Fotios said: "We were very pleased to have completed all preparations for our first round of drilling at Pharos during the June quarter. Importantly, our extensive field evaluation work completed early in June allowed our team to refine several high-priority gold targets for testing in the initial round of drilling. With the first round of drilling now complete, and initial results expected in August, we are now working towards commencing a follow-up program that will comprise approx. 1500m of RC drilling to test another suite of exciting targets in the Pharos Project area.

Scorpion is the largest landholder along the Dalgarranga-Big Bell shear corridor, one of the most sought-after gold regions in Western Australia. Backed by a strong gold market, our team remains committed to unlocking the value of our extensive foothold in the Murchison as quickly as possible through targeted drilling over the coming months."

Exploration & Development Portfolio Summary

Pharos Project, WA (SCN: 100%)

The Pharos Project is 100% owned by Scorpion and covers an area of 924km² located 60km northwest of Cue in the Murchison Mineral Field, Western Australia (refer Figure 1). The project is prospective for gold, lithium, PGE-Ni-Cu, iron ore and VMS hosted Cu-Zn-Ag Au mineralisation.

June quarter field activities

During the quarter, Scorpion's technical team continued to refine high-grade gold targets for drilling along the Dalgara-Big Bell shear corridor (DBBS) within the Pharos Project.

Field evaluation work included rock chip sampling and resampling and relogging of selected historic RC drill holes (refer ASX release 3 June 2025). Targets were assessed at Olivers Patch (including Terry's), Cap Lamp (including Salt Flat), Lantern, Candle and Candle North, with a detailed assessment of structural controls on mineralisation completed to determine effectiveness of historic drilling and optimise targeting of new drilling. Areas of significant gold specimen recovery were also evaluated with targeted metal detecting recovered further gold specimens north of Cap Lamp. Approximately 1,000 rock chip and RC samples have been submitted for laboratory analysis.

A reverse circulation (RC) drill programme at Pharos commenced post quarter-end (refer ASX release 3 July 2025), with a total of 35 holes for 1,691m completed at Olivers Patch, Cap Lamp and Maguires North in July 2025 (refer ASX release 24 July 2025).

Geological setting and recent significant discoveries

The Pharos tenements cover the stratigraphic sequence to the west of and adjacent to the Dalgara-Big Bell shear corridor host to the Big Bell deposit and immediately adjacent to the Never Never discovery at Dalgara. Systematic exploration has not been undertaken historically where the NNW trending splay off the Big Bell shear intersect prospective lithologies. Previous explorers have noted repeated observation of sericite-chlorite-carbonate alteration and pyrite-arsenopyrite mineralisation associated with gold mineralisation, which the company believes indicative of large Archean gold hydrothermal systems.

Pharos Gold Targets

The tenements at Pharos are considered prospective for several gold mineralisation types including:

1. *Shear zone hosted lode style mineralisation hosted in mafic, ultramafic and felsic volcanics*
2. *Banded Iron hosted "Hill 50" style replacement deposits*
3. *High grade quartz vein "Day Dawn" style mineralisation hosted within dolerite and basalt*
4. *Felsic porphyry hosted quartz stockwork and ladder vein mineralisation*

Gold exploration by prior tenement holders at the Pharos tenements has been unsystematic, with multiple soil anomalies and rock chip targets requiring follow-up sampling and RC drill testing. Location of historic drill holes (refer Figure 2) was constrained by historic heritage clearance along limited access tracks. Follow-up drilling will test existing targets (refer Figure 3) where access has been simplified by completed heritage surveys covering a larger contiguous area. Further heritage clearances will be completed where necessary.

Olivers Patch

Evaluation of the Olivers and Terry's North targets has identified a series of northwest oriented controlling faults/structures that are in some cases quartz filled. Drilling has been designed to test adjacent north northeast and east west trending zones of veining related to gold mineralisation.

Cap Lamp

RC drilling will step closer to and test immediately beneath the near surface workings along a strike length of about 150 to 200 metres. The recently completed RC programme was designed to test a "New Lode" identified south of the workings by historic "non closing RAB drilling" which intersected significant mineralisation that suggests a repetition of Cap Lamp to the south.

Lantern, Candle and Candle North

Similar to Olivers, northwest trending partially quartz filled faults have been identified adjacent to mineralisation interpreted to trend WNW and dip north. Future drilling will include single RC holes at each prospect to test the structural interpretation.

Next Steps and Planned activities

Scorpion plans to have a steady pipeline of exploration activity at the Pharos Project over the next 6 months – initial areas of focus will include:

- Further RC drilling of selected targets, including Terry's North, Nick's Find, Lantern, Candle, Candle North and Salt Flat – approx. 1500 metres
- Detailed (1:5000 scale) geological mapping
- 50m line spaced Airborne Magnetic Survey
- Detailed lithostructural interpretation utilising detailed mapping and air magnetics

Jungar Flats JV, WA (SCN: earning to 70%)

Scorpion has entered into a binding farm-in and joint venture heads of agreement ("Heads of Agreement") with a wholly owned subsidiary of E79 Gold Mines Ltd ("E79") to acquire a majority stake in the Jungar Flats Gold Project (ASX release 14 February 2025). The Heads of Agreement provides for Scorpion to earn up to a 70% interest in the project by expending \$3 million over a 5-year period including cash consideration and expenditure milestones.

The Jungar Flats project covers an area of about 700km² and abuts Scorpion's 100% owned Pharos Project to the east for a total holding of approximately 1600km².

The JV agreement creates a cohesive project that is the largest holding in the region straddling a strike of about 60km along the DBBS corridor and prospective NW trending splays (refer Figure 1). The main DBBS corridor remains untested and to the south hosts the Big Bell gold mine (Westgold) and is adjacent to the recent Never-Never and Pepper high-grade gold discoveries at Dalgara (Spartan). The area is primarily prospective for gold, however potential also exists for copper and lithium mineralisation (refer Figures 1 and 2).

Historic wide spaced shallow RAB drilling completed at Middle Bore on the Jungar Flats tenements tested the weathered zone and intersected significant flat lying supergene mineralisation.

During the quarter, the Company continued to progress the completion of heritage surveys on Jungar Flats tenements to allow for future field activities.

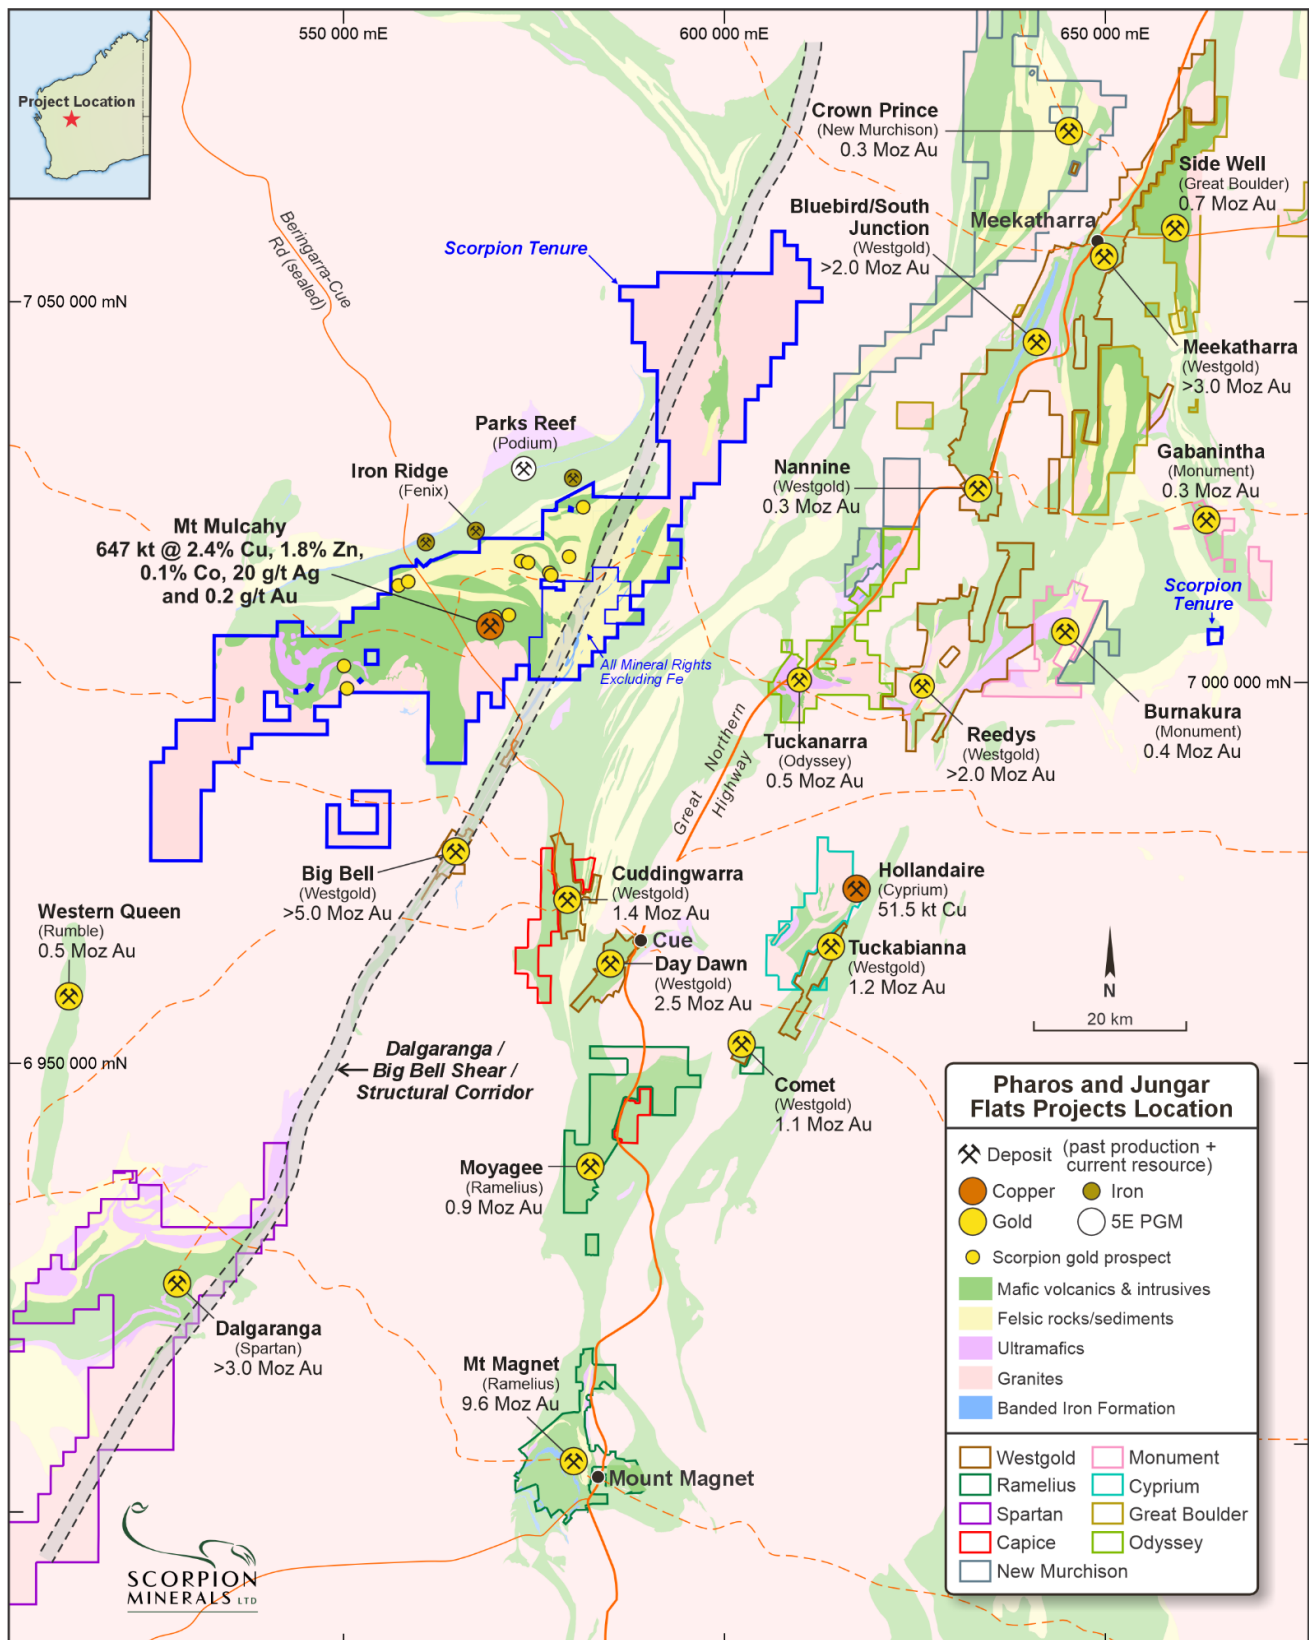

Figure 1: SCN's Pharos and Jungar Flats Projects with existing major deposits and neighbouring tenures

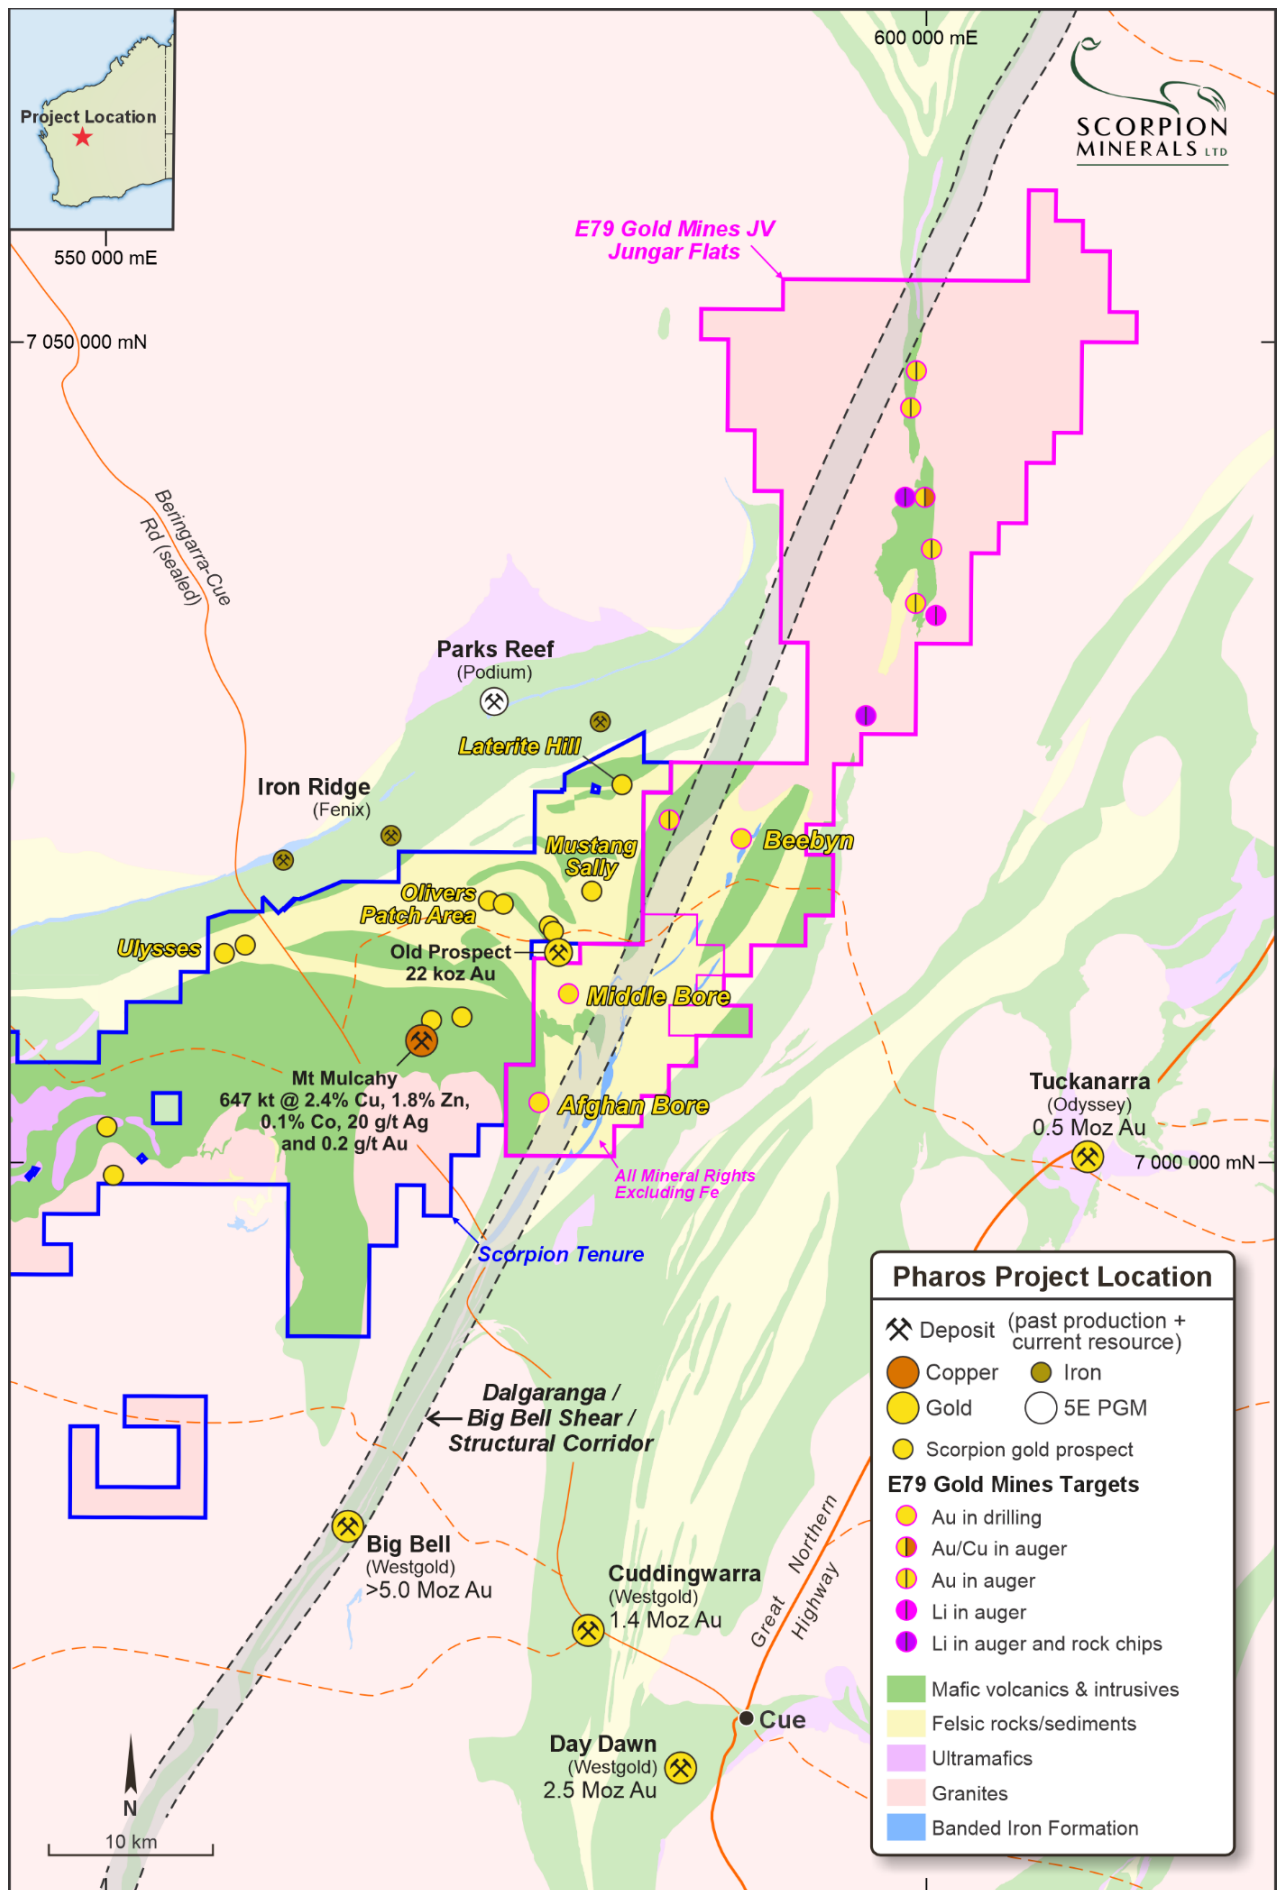

Figure 2: Pharos and Jungar Flats projects with regional geology and existing gold targets highlighted

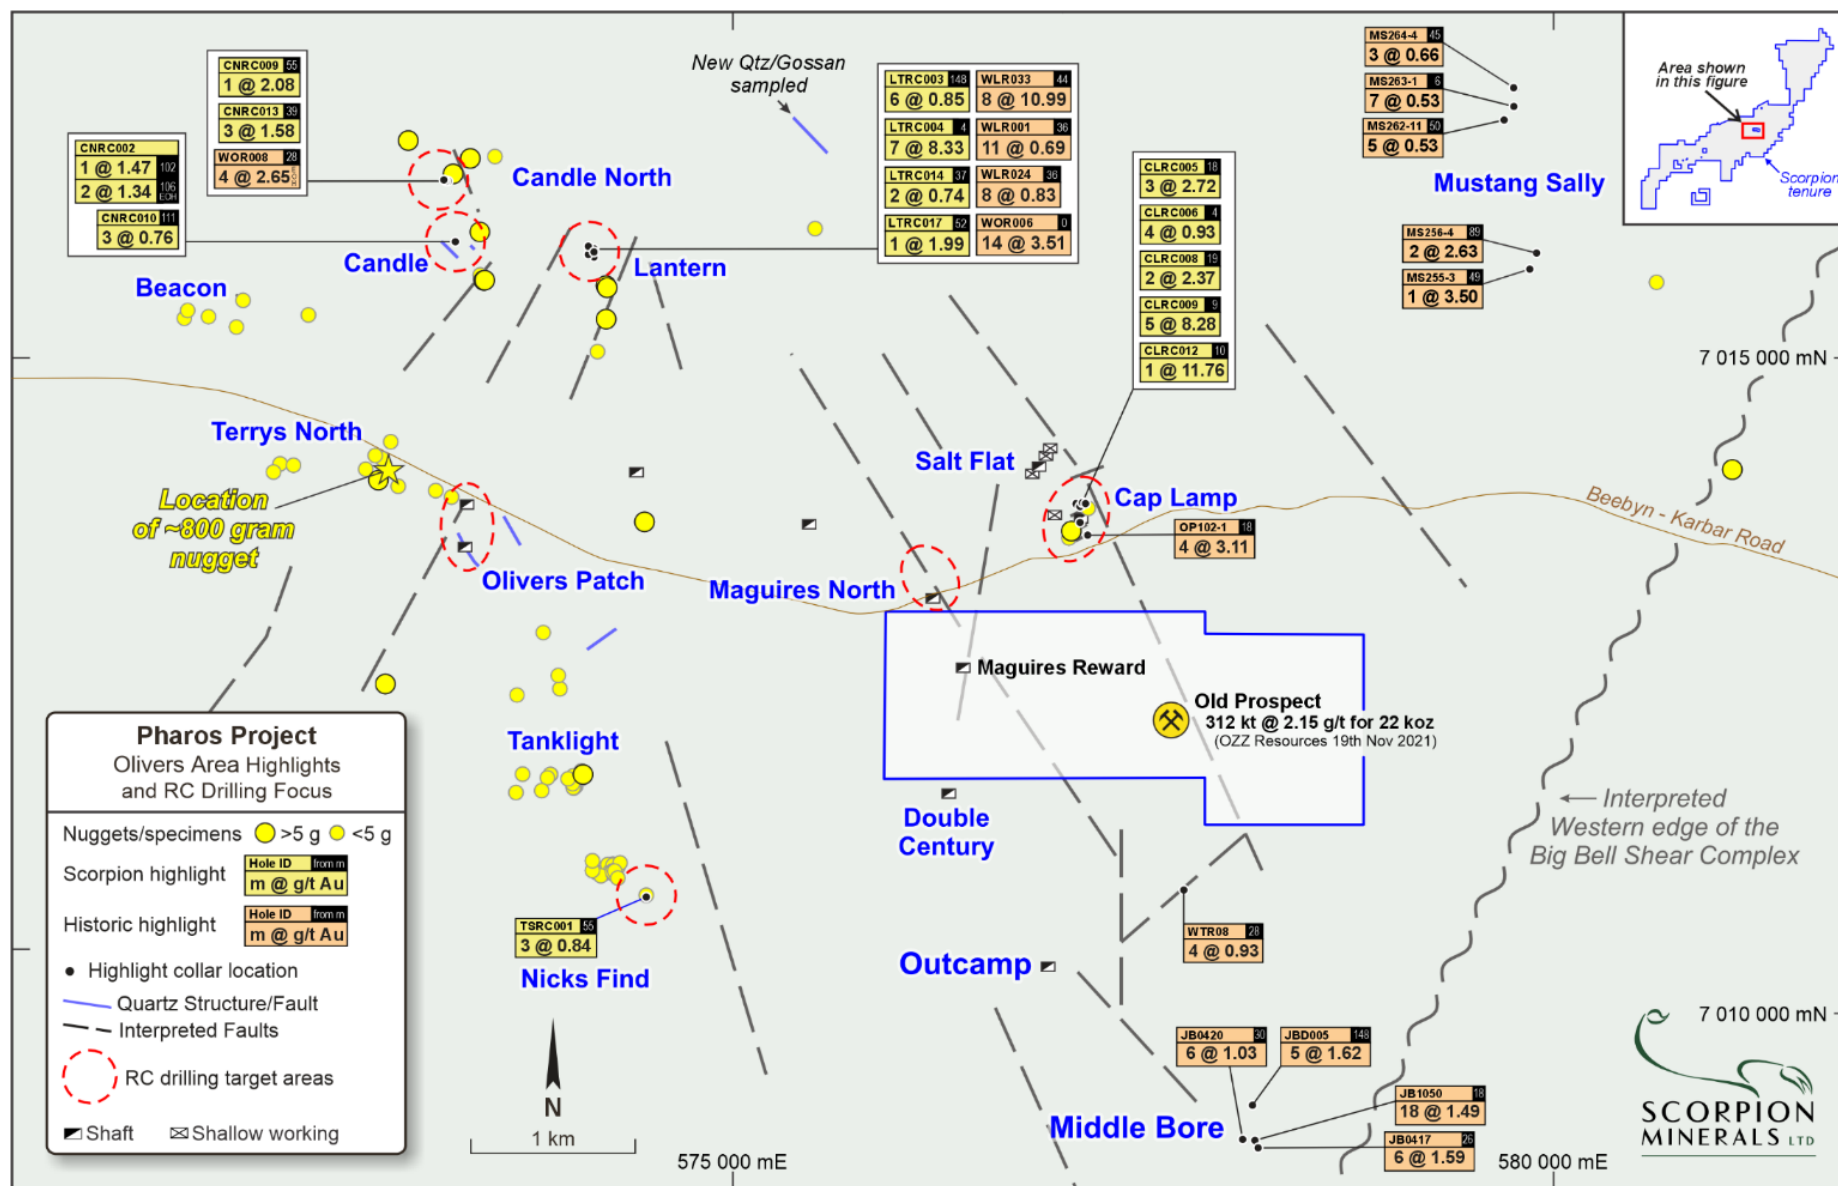

Figure 3: Olivers area prospects, structures and current drilling targets

Mt Mulcahy Copper Prospect, WA (SCN: 100%)

During the quarter, the Company continued to assess various options to unlock the value of the Mt Mulcahy Copper prospect within the Company's 100% owned Pharos Project in WA.

Scorpion continues to work through multiple options to progress Mt Mulcahy in a strengthening copper market. Further details on the Mt Mulcahy strategy will be provided in due course.

Mt Mulcahy summary – strategic copper asset in a prime location

An existing copper resource has been defined within the South Limb Pod zone of **647,000 tonnes @ 2.4% copper, 1.8% zinc, 0.1% cobalt and 20g/t Ag** (refer Table 1). The review has highlighted the potential scale of the copper-rich Volcanogenic Massive Sulphide (VMS) horizon which extends over 13.5km long and remains open along strike. Multiple untested VTEM conductors have been located within the VMS horizon corridor to a depth of only 300m, with the horizon below this depth untested.

Previous exploration completed by Scorpion and others prior to 2014 included, geological mapping, soil geochemistry, air magnetics, airborne VTEM survey (effective to about 300 metres depth only), percussion drilling (open hole and reverse circulation), diamond drilling and resource modelling/estimation.

A total of 85 holes have been completed for 10,304m from surveyed access to test South Limb Pod and West Copper (2 holes). Historic shallow percussion drilling has only tested to a maximum of 50 metres below surface (mbs) and was ineffective in locating sulphide mineralisation. These percussion holes have been used, where logging is available, to map the extent of the sediment hosted Volcanogenic Massive Sulphide (VMS) mineralisation around the Mt Mulcahy Syncline.

Mt Mulcahy is interpreted to be in a similar geological setting to Golden Grove with copper dominant mineralisation within a sediment hosted VMS horizon. At Mt Mulcahy historic exploration has been conducted along a 13.5km long zone to a depth of only 50 mbs apart from South Limb Pod and West Copper where drilling has tested to about 250 mbs. This compares to Golden Grove where several recent orebody discoveries along the 16km long VMS corridor are blind and/or extend to depths of up to 2200 mbs.

Corporate

An extraordinary general meeting of the Company was held on 17 April 2025 to approve resolutions relating to the Company's capital raising announced 14 February 2025. All resolutions were approved by shareholders.

Listing Rule 5.3.5 disclosures

Payments to related parties and their associates during the quarter totalled \$74,983, comprising payments for directors' fees, superannuation and company secretarial fees (including payments deferred from previous quarters).

This announcement has been authorised by the board of directors of the Company.

About Scorpion Minerals Limited

Scorpion Minerals Limited (ASX:SCN) is an Australian mineral exploration and resource development company with a focus on creating wealth for shareholders through the discovery of world-class deposits, over a diversified range of minerals. Our current efforts are centred on our Pharos Project located in the Murchison Province of Western Australia.

Pharos Project

The Pharos Project consists of 924 square kilometres of granted tenure, located approximately 50 km northwest of the small mining town of Cue in the Murchison Mineral Field. The project is easily accessible from the Great Northern Highway by the sealed Jack Hills Mine access road and then by unsealed tracks. Scorpion holds a 100% interest in the project.

The project is prospective for gold, iron ore, PGE-Ni-Cu, lithium and VMS hosted Cu-Zn-Ag Au mineralisation, and contains the Mt Mulcahy deposit. The 'South Limb Pod' zone of mineralisation at Mt Mulcahy contains a JORC 2012 Measured, Indicated and Inferred Resource of 647,000 tonnes @ 2.4% copper, 1.8% zinc, 0.1% cobalt and 20g/t Ag (refer Table 1).

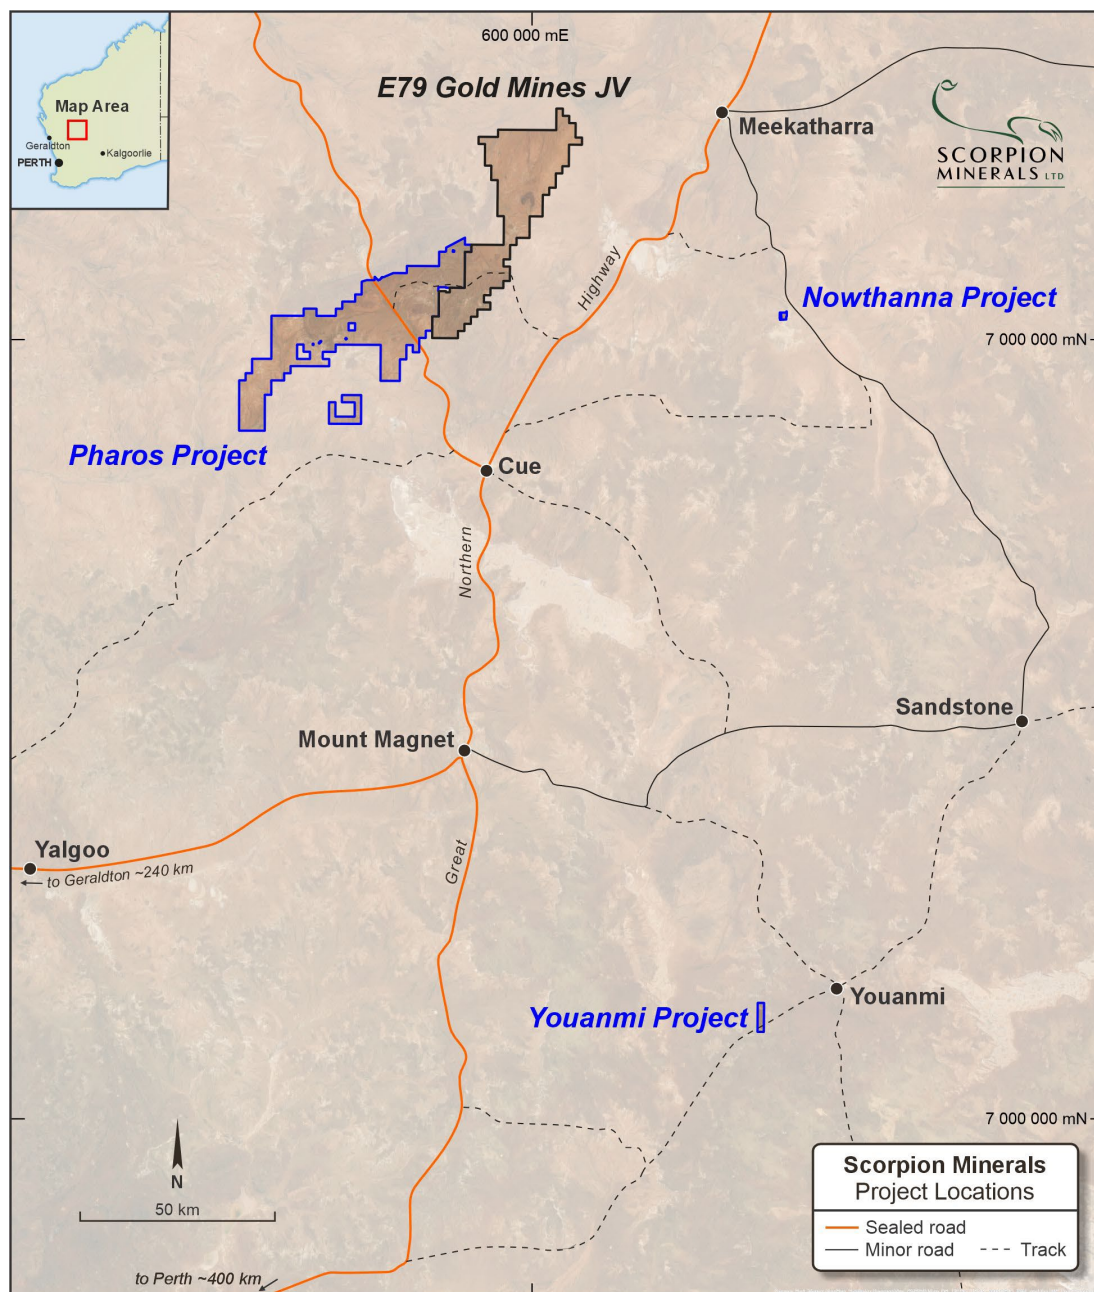

Table 1: Current Mineral Resource Estimate, Mt Mulcahy Project

(refer ASX release 25/9/2014 "Maiden Copper - Zinc Resource at Mt Mulcahy", which also contains a list of significant drill intersections for the deposit, listed within that report at Table 2)

Mt Mulcahy South Limb Pod Mineral Resource Estimate											
Resource Category	Grade						Contained Metal

Competent Persons Statement 1

The information in this report that relates to the Exploration Results and Mineral Resources at the Mt Mulcahy and Pharos Projects is based on information reviewed by Mr Michael Fotios, who is a member of the Australian Institute of Mining and Metallurgy. Mr Fotios is CEO of Scorpion Minerals Limited and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity he is undertaking to qualify as Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)'. Mr Fotios consents to the inclusion of the information in the form and context in which it appears.

Competent Persons Statement 2

The information in this report that relates to the Mt Mulcahy Mineral Resource is based on information originally compiled by Mr Rob Spiers, an independent consultant to Scorpion Minerals Limited and a then full-time employee and Director of H&S Consultants Pty Ltd (formerly Hellman & Schofield Pty Ltd), and reviewed by Mr Fotios. This information was originally issued in the Company's ASX announcement "Maiden Copper-Zinc Resource at Mt Mulcahy", released to the ASX on 25 September 2014. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

Forward Looking Statements

Scorpion Minerals Limited has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Scorpion Minerals Limited, its Directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it. This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever.

This announcement may contain forward-looking statements that are subject to risk factors associated with exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimate.

6.2	Aggregate amount of payments to related parties and their associates included in item 2	-
<p><i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i></p> <p>Payments were made to related parties during the quarter for director's fees, company secretarial fees and superannuation, inclusive of amounts deferred from previous quarters.</p>		

7. Financing facilities <i>Note: the term “facility” includes all forms of financing arrangements available to the entity.</i> <i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A’000	Amount drawn at quarter end \$A’000
7.1 Loan facilities	2,500	1,275
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	2,500	1,275
7.5 Unused financing facilities available at quarter end		1,225
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
The Company has an unsecured loan agreement with a syndicate of lenders. The facility limit is \$2,500,000, interest rate is 8% p.a.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(393)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(393)
8.4 Cash and cash equivalents at quarter end (item 4.6)	681
8.5 Unused finance facilities available at quarter end (item 7.5)	1,225
8.6 Total available funding (item 8.4 + item 8.5)	1,906
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	5
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
