Appendix 4C & quarterly activity report – period ended 30 June 2025**Summary of key activities**

- During Q4 FY25, CurveBeam AI received purchase orders (**POs**) for six (**6**) devices, two (**2**) of which were HiRise™.
- Twenty-six (**26**) POs have been received for the FY25 versus twenty-two (**22**) POs for FY24 up **18%**.
- Cash at the end of Q4 FY25 was A\$5.0m, with receivables plus cash collection (as at the end of Q4 FY25) from previously obtained POs of a further A\$5.0m.
- Receipts from Customers were a record A\$5.6m (up from A\$1.5m in Q3 and up from Q4 FY24 (pcp) result of A\$2.0m), generating a positive Cash from Operations of A\$0.4m (improved from negative A\$4.4m in Q3, and from negative A\$4.6m for the pcp).
- Validation of HiRise™ continued to progress and engagement with the key robotic surgical system vendor has been positive.
- Continued progress on bone mineral density (BMD) module with the company successfully completing 200 of a planned 400 patient scans for comparative analysis with dual-energy X-ray absorptiometry (DXA). The BMD (MDCT) module is on track for FDA 510(k) clearance in H1 CY26.
- During the quarter, the Company advanced efforts to establish a vendor financing facility and is in the final stages of securing an agreement with an international financing partner for a facility of approximately A\$18 million (€10 million). This facility will enable the Company to offer leasing options to customers, supporting direct sales across key markets, including North America and Europe.

Melbourne, Australia & Hatfield, Pennsylvania: CurveBeam AI Limited (ASX: CVB, “**CurveBeam AI**” or the “**Company**”), a fully integrated developer and manufacturer of point-of-care specialised medical imaging (**CT**) equipment, supported by a range of AI enabled SaaS-based clinical assessment solutions, is pleased to announce its Appendix 4C and quarterly activity report for the period ended 30 June 2025 (**Q4 FY25**).

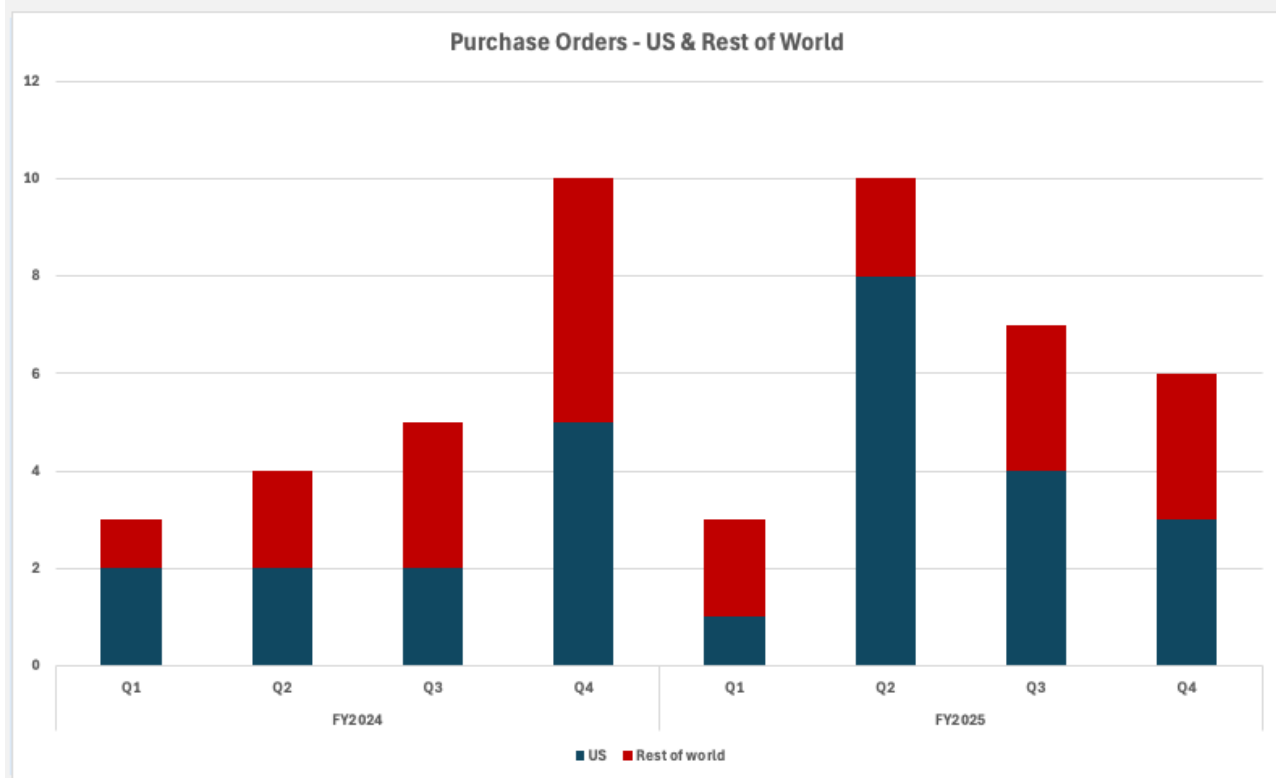

Purchase Orders and Receipts

During Q4 FY25, CurveBeam AI received six (6) purchase orders (POs). The FY25 financial year saw a total of twenty-six (26) POs, up 18% compared to FY24’s twenty-two (22) POs.

Receipts from customers for Q4 FY25 were A\$5.6m, up substantially from A\$1.5m in Q3 FY25 reflecting a very active installation schedule for the quarter. This brings receipts from customers for FY25 to A\$12.2m, up from A\$7.1m in FY24 for an increase of A\$5.1m or 72%.

The Company is focused on near term sales opportunities that are not dependent on the robotic surgery system validation, and the Company remains confident in this qualified prospect pipeline.

| Device Purchase Orders | FY2024 | | | | FY2025 | | | |
|------------------------|----------|----------|----------|-----------|----------|-----------|----------|----------|
| | Q1 | Q2 | Q3 | Q4 | Q1 | Q2 | Q3 | Q4 |
| US | 2 | 2 | 2 | 5 | 1 | 8 | 4 | 3 |
| Rest of world | 1 | 2 | 3 | 5 | 2 | 2 | 3 | 3 |
| Total | 3 | 4 | 5 | 10 | 3 | 10 | 7 | 6 |

Enhanced HiRise™ Validation

The Company is pleased with the increased engagement from the vendor of a major robotic surgical system in validating the enhanced HiRise™ and has conducted several meetings during the quarter.

The Company remains confident that the submission meets the requirements to complete validation, and discussions to date have been constructive. We do note however that the process is an internal one within the vendor's organisation, subject to their judgment, and their priorities, that makes it difficult for the Company to provide guidance on completion.

Multi-Detector CT (MDCT) Bone Mineral Density (BMD) FDA File Submission

Continued progress on the bone mineral density (BMD) module was made, which remains under the FDA's 510(k) Class II regulatory pathway. In alignment with the FDA requirements, from the December 2024 Q-Sub meeting, the Company has successfully completed a comparative analysis with dual-energy X-ray absorptiometry (DXA) on 200 patients to date, with an additional 200 patients currently being processed.

This expanded clinical dataset base is encouraging and supports a robust submission which remains on the restated track. The FDA 510(k) clearance for the BMD (MDCT) module is on track, with targeted FDA clearance anticipated in H1 CY26.

Cashflow from Operations and Runway

Cash from operations for Q4 FY25 was positive A\$0.4m versus negative A\$4.4m in Q3 FY25, and negative A\$4.6m in pcq.

Cash outflows at item 1.2 (below) totalled A\$5.2m down A\$0.8m from A\$6.0m in Q3 FY25, and A\$6.6m in the pcq.

Material movements in respect of cash outflows relative to last quarter include:

1. Product manufacturing and operating costs were down A\$0.8m against Q3 FY25, with inventory purchases reduced for the quarter, and deliveries fulfilled from existing inventory.
2. Staff costs were up marginally by A\$0.2m against Q3 FY25.

The Company notes that Q1 FY26 does include the Northern Hemisphere summer holidays, and that commitments to the Company's suppliers will see a modest increase in manufacturing cost outflows for Q1, and thus the positive cashflow from operations for Q4 FY25 is not expected to be repeated in Q1 FY26.

However, the Company is expecting some positive cashflows outside normal operations for Q1 FY26, including an anticipated \$1.3m in R&D Tax incentive receipts net of loan repayments, and with other opportunities being pursued.

The Company advanced efforts to establish a vendor financing facility and is in the final stages of securing an agreement with an international financing partner out of Switzerland for a facility of approximately A\$18 million (€10 million). This facility will enable the Company to offer leasing options to customers, supporting direct sales across key markets, including North America and Europe. It will also allow the Company to immediately capitalise existing leased devices, which will result in near-term positive cash inflows.

The agreement will allow CurveBeam AI to provide vendor financing to clinicians and therefore enable the Company to close deals more quickly.

Definitions

As previously noted, CurveBeam AI's key metrics are defined and interpreted as follows:

- Purchase order – a signed purchase order (PO) for a CT scanner (device). The Company considers POs to be a key metric as it reflects actual sales at any given time.
- Receipts from customers – any cash consideration received from a customer by CurveBeam AI. This can include initial deposits required at the time of an order being placed.
- Revenue – Revenue is recognised after the device (e.g., HiRise™) is delivered, installed and training has been completed. Depending on the customer site requirements, there

can be several months' delay from a signed purchase order to recognition of revenue. Thus, revenue may not be reflective of sales progress in each period.

The Company will report on POs and cash receipts in its Appendix 4C (quarterly) lodgements, while revenue will be reported in the Appendix 4E (full year report) and Appendix 4D (half year report).

Release approved by the Board of Directors.
