

Quarterly Activities Report

For the quarter that ended on 30 June 2025

Highlights:

- 🇺🇸 Drilling was completed over multiple targets within the 35km long Laverton Gold Project, consisting of 43 holes targeting the bonanza grade Burtville East Project, the Rainier gold prospect and portions of the Comet Well area.
- 🇺🇸 During the quarter, results were received from 59 grab samples collected from existing stockpiles at Burtville East. These samples were taken to assess the metallurgy of gold mineralisation at Burtville East, targeting mineralisation not hosted within the main quartz vein systems. Assays exceeding 10g/t Au, included:
 1. **GS02:** 12.40g/t Au
 2. **GS24:** 15.15g/t Au
 3. **GS26:** 25.80g/t Au
 4. **GS87:** 27.20g/t Au
- 🇺🇸 A third-party prospecting group reported the discovery of more nuggets in the Comet Well area; 3 ironstone specimens weighing 6.2 grams and 77 nuggets weighing 39.9 grams, totalling 46.1 grams.

Daniel Tuffin, Managing Director and CEO, commented:

“While delays in assay turnaround times impacted the timing of results, the Company was able to report on its drilling across multiple targets during the quarter, including Burtville East (which has continued to return strong results), Comet Well, and the newly identified Rainier prospect.

Notably, grab sampling from non-quartz hosted stockpiles at Burtville East returned high-grade results of up to 27.2g/t Au, further supporting the project's development potential.”

ASX ANNOUNCEMENT

29 July 2025

Panther Metals Ltd (ASX: PNT) ('Panther' or 'the Company') is pleased to report on its activities during the three months ending 30 June 2025.

Cautionary Statement:

Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations.

Additional Information:

The gold mineralisation reported in this announcement from stockpile assays stockpiles may not be representative of the overall grade of each stockpile. Gold mineralisation reported as nuggets is either nuggetty or contained in ironstone specimens. The mineral visually observed is native free gold, however, being nuggets and in-ironstone specimens, they have not been assayed to confirm purity and/if any other trace elements may be present. The Company notes gold nuggets showing this colour typically have a high gold purity.

Stockpile Grab Sampling:

59 grab samples assaying the existing gold stockpiles at BVE were to provide data for future mining studies and to test existing high-grade gold stockpiles with a view to monetisation. Initial gold assays were released to the ASX on 29 April 2025.

High grade samples >10g/t Au included:

-  **GS02:** 12.40g/t Au
-  **GS24:** 15.15g/t Au
-  **GS26:** 25.80g/t Au
-  **GS87:** 27.20g/t Au

Samples > 1g/t Au and <10g/t Au included:

-  **GS03:** 3.69g/t Au
-  **GS05:** 2.35g/t Au
-  **GS07:** 2.45g/t Au
-  **GS21:** 4.01g/t Au
-  **GS30:** 6.07g/t Au
-  **GS68:** 1.17g/t Au

Further Gold Nuggets Discovered at Comet Well:

A third party prospecting group recently reported the discovery of more nuggets in the Comet Well area to the Company, consisting of 3 ironstone specimens weighing 6.2 grams and 77 nuggets weighing 39.9 grams, totalling 46.1 grams. The Company has reviewed their reported locations, and accordingly updated several focused drill targets for future drill testing (see **Figure 3**, overleaf). Drill assays from the recent aircore drilling (17 holes for 406m) is hoped to provide more assistance in locating the primary source(s) of gold mineralisation at Comet Well.
