MEC has a non-controlling interest in the unlisted energy explorer Advent Energy Ltd (“**Advent**”) of 37.95%.

As highlighted in the Company’s Entitlement Offer Prospectus, Company intends to seek out new opportunities within its PDF investment mandate.

Advent holds a range of energy-based opportunities via its investee company Advent. Via Advent the Company has been assessing new investment opportunities, where there are ever increasing obligations to provide energy solutions with a responsible management and protection against carbon emissions. The transition from hydrocarbons such as coal and oil to hydrogen, is now presenting real economies and growth globally. Although natural gas also presents continued growth and will play a role for many years to come, it too will need to become a source of energy with no CO2 emissions.

MEC continues to monitor its investment in Advent and has representation on the board of Advent with directors Anthony Huston and David Breeze.

### **Advent Energy has provided the following information to MEC**

#### **PEP 11 Joint Venture**

Advent Energy Limited’s (MEC 37.95% direct interest) 100% subsidiary Asset Energy Pty Ltd is a participant in the PEP11 Joint Venture with partner Bounty Oil and Gas NL (ASX:BUY).

The PEP11 interests are:

- Advent Energy 85 %
- Bounty Oil and Gas NL 15%

As noted in the March 2025 quarterly report the Company restates that on 17 January 2025 the PEP-11 Joint Venture was given notice by NOPTA that the Joint Authority has refused the Joint Venture Applications made on 23 January 2020 and 17 March 2021 and that the PEP-11 permit would continue in force for a period of 2 months from 17 January 2025 (the “**Decision**”).

On 13 February 2025 MEC announced that Asset had applied to the Federal Court for an Originating Application (the “Application”) for judicial review pursuant to s 5 of the Administrative Decisions (Judicial Review) Act 1977 (Cth) and s 39B of the Judiciary Act 1903 (Cth) to review the Decision. The Application seeks:

1. An order quashing or setting aside the Decision;

PEP-11 continues in force and the Joint Venture is in compliance with the contractual terms of PEP11 with respect to such matters as reporting, payment of rents and the various provisions of the Offshore Petroleum and Greenhouse Gas Storage Act 2006 (Cth).

#### ***Clean Hydrogen Technologies (CHT) (Advent holding 3.9% direct interest)***

As of mid-2024 CHT has developed its engineering and catalyst capabilities to a stage where it has proven consistently in its pilot plant in Nashik, India to produce its 2 products; turquoise hydrogen and a carbon composite made from majority CNT (carbon nanotubes) and CNF (carbon nano-fibres), where its core process has not CO<sub>2</sub> emissions and its feedstock is the hydrocarbons from natural gas . The next stage is to build production facilities in the USA and India, both being highly industrial markets with demand for CHT’s products.

As such since mid-2024 CHT has been designing its production facility for India initially which will produce at the end of its Stage 1 build will produce 820 tonnes of hydrogen and 2,462 tonnes of carbon composite. CHT is now looking to source the funding required to build its plants in the USA and India where within 3-4 months of minimal funding of US\$2.5m it will start producing income, initially in India and then the USA, its primary market.

We once again thank shareholders for their continued patience and support and welcome any questions/comments regarding the Company.
