

RC Drilling Completed - Pharos Gold Project Murchison Gold Province, WA

- Initial RC drilling totalling **1691 metres in 35 holes completed at Pharos Gold Project**
- Drilling program follow-ups historic drilling at prospects including *Oliver's Patch*, *Cap Lamp* and *Maguires North*
- Several batches of samples delivered to Perth laboratory for assaying
- Further drilling at *Terry's North*, *Nick's Find*, *Lantern*, *Candle*, *Candle North* and *Salt Flat* scheduled to commence late August
- **Scorpion has assembled the largest landholding along the Dalgaranga–Big Bell shear corridor** which remains largely untested by historic exploration
- Current and near-term drilling campaigns have been designed to test **several walk-up high-grade gold targets** along with systematic soil geochemistry and detailed mapping - historic intercepts include:
 - ***8m @ 10.99 g/t Au from 44m, including 2m @ 42.4 g/t Au at Lantern***
 - ***7m @ 8.33 g/t Au from 4m, including 3m @ 18.0 g/t Au at Lantern***
 - ***14m @ 3.51 g/t Au from 0m, including 2m @ 16.8 g/t Au at Lantern***
 - ***5m @ 8.28 g/t Au from 9m, including 1m @ 22.9 g/t Au at Cap Lamp***
- Historic wide spaced shallow RAB drilling completed within the Jungar Flats JV tenements at Middle Bore testing the weathered zone intersected significant flat lying supergene mineralisation, including:
 - ***18m @ 1.49 g/t Au from 18m***
 - ***6m @ 1.59 g/t Au from 26m***
 - ***4m @ 1.03 g/t Au from 26m***
 - ***6m @ 1.03 g/t Au from 30m***
- Work towards completion of heritage surveys at Jungar Flats JV advancing
- First assays expected to be received late July – early August

Scorpion Minerals Limited (ASX:SCN) ("**Scorpion**", "**SCN**" or "**the Company**") is pleased to advise that initial Reverse Circulation ("**RC**") drilling has been completed at the Company's Pharos Gold Project located northwest of Cue in the Murchison region of Western Australia ("**Pharos**").

A total of 35 holes for 1691 metres was completed at Cap Lamp (28 holes/1258m), Olivers Patch (6 holes/390m) and Maguires North (1 hole/43m).

Pharos and the adjacent Jungar Flats JV Project (1600km²) cover the northern extent of the highly prospective Big Bell–Dalgaranga shear corridor (Figure 1).

Commenting on the completion of drilling in the Murchison, CEO Michael Fotios said: "*We are very pleased to have completed this first round of targeted drilling at Pharos – with assays now in the laboratory in Perth and expected to be available for reporting in the coming weeks. We have now turned our attention to a follow-up drilling program that will test a suite of high-quality prospects within the Pharos area that have demonstrated strong gold potential. Supported by a strong gold price environment, our team remains committed to increasing exploration over the coming months.*"

Future RC drilling activities at Pharos will focus on follow up assessment of targets at *Terry's North, Nick's Find* (formerly Terry's South) *Salt Flat, Lantern, Candle* and *Candle North* (Figure 2).

Planned Exploration

As exploration work increases across Scorpion's tenements over the coming months, some of the initial key areas of focus will include:

- *Further RC drilling of selected targets – approx. 1500 metres*
- *Detailed (1:5000 scale) geological mapping*
- *50m line spaced Airborne Magnetic Survey*
- *Detailed lithostructural interpretation utilising detailed mapping and air magnetics*

Technical information included in this announcement regarding gold exploration at Pharos has previously been provided to the market in releases dated:

About Scorpion Minerals Limited

Scorpion Minerals Limited (ASX:SCN) is an Australian mineral exploration and resource development company with a focus on creating wealth for shareholders through the discovery of world-class deposits, over a diversified range of minerals. Our current efforts are centred on our Pharos Projects, located in the Murchison Province of Western Australia.

The Pharos Project

The Pharos Project consists of 924 square kilometres of granted tenure, located approximately 50 km northwest of the small mining town of Cue in the Murchison Mineral Field. The project is easily accessible from the Great Northern Highway by the sealed Jack Hills Mine access road and then by unsealed tracks. Scorpion holds a 100% interest in the project.

The project is prospective for gold, lithium, PGE-Ni-Cu, iron ore, and VMS hosted Cu-Zn-Ag Au mineralisation, and contains the Mt Mulcahy deposit. The 'South Limb Pod' zone of mineralisation at Mt Mulcahy contains a JORC 2012 Measured, Indicated and Inferred Resource of 647,000 tonnes @ 2.4% copper, 1.8% zinc, 0.1% cobalt and 20g/t Ag (refer Table 3).

Table 3: Current Mineral Resource Estimate, Mt Mulcahy Project

(refer ASX release 25/9/2014 "Maiden Copper - Zinc Resource at Mt Mulcahy", which also contains a list of significant drill intersections for the deposit, listed within that report at Table 2)

Mt Mulcahy South Limb Pod Mineral Resource Estimate											
Resource Category	Grade						Contained Metal				
	Tonnes	Cu (%)	Zn (%)	Co (%)	Ag (g/t)	Au (g/t)	Cu (t)	Zn (t)	Co (t)	Ag (oz)	Au (oz)
Measured	193,000	3.0	2.3	0.1	25	0.3	5,800	4,400	220	157,000	2,000
Indicated	372,000	2.2	1.7	0.1	19	0.2	8,200	6,300	330	223,000	2,000
Inferred	82,000	1.5	1.3	0.1	13	0.2	1,200	1,100	60	35,000	
TOTAL	647,000	2.4	1.8	0.1	20	0.2	15,200	11,800	610	415,000	4,000

Competent Persons Statement 1

The information in this report that relates to the Exploration Results and Mineral Resources at the Mt Mulcahy and Pharos Projects is based on information reviewed by Mr Michael Fotios, who is a member of the Australian Institute of Mining and Metallurgy. Mr Fotios is CEO of Scorpion Minerals Limited and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity he is undertaking to qualify as Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)'. Mr Fotios consents to the inclusion of the information in the form and context in which it appears.

Competent Persons Statement 2

The information in this report that relates to the Mt Mulcahy Mineral Resource is based on information originally compiled by Mr Rob Spiers, an independent consultant to Scorpion Minerals Limited and a then full-time employee and Director of H&S Consultants Pty Ltd (formerly Hellman & Schofield Pty Ltd) and reviewed by Mr Fotios. This information was originally issued in the Company's ASX announcement "Maiden Copper-Zinc Resource at Mt Mulcahy", released to the ASX on 25 September 2014. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

Forward Looking Statements

Scorpion Minerals Limited has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Scorpion Minerals Limited, its Directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it. This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever.

This announcement may contain forward-looking statements that are subject to risk factors associated with exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimate.
