QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDING 30 June 2025

Summary of Activities

- **extensive review of corporate and exploration activities and related expenditure**
- **new management appointed, and significant cost reductions put in place**
- **strategic review of existing assets and potential new business opportunities**

ENRG Elements Limited (**ASX:EEL**) ("**ENRG**" or the "**Company**") is pleased to provide an overview of activities for the quarter ending 30 June 2025 ("**Quarter**", "**Reporting Period**"), which accompanies the Company's Appendix 5B.

Review of Corporate & Exploration Activities

During the quarter, the Company has continued to undertake an extensive review of its corporate and exploration activities and the related expenditure. New board has been appointed to undertake this review.

Focus has been on prudent cash management and review of the existing portfolio and new opportunities to maximise value for shareholders. Significant cost reductions have been achieved which will provide a financial runway for the company to continue to review its existing assets and potential new business opportunities, whilst ensuring tenement minimum spend is met, tenure is held, and corporate compliance is maintained.

Business Development

The directors and their network have access to a pipeline of new projects and business opportunities. The Company will assess these opportunities as and when they present, applying stringent criteria.

AGADEZ URANIUM PROJECT – NIGER (100%)

As announced in late 2024, ENRG secured a three-year renewal for the three (3) granted exploration permits comprising its Agadez Uranium Project. The exploration permits, covering ~726km², were renewed without any relinquishment and are now valid through to October 2027.

On 22 October 2024, ENRG announced the outstanding results of its trenching program with the highest assay results set out below (all greater than 2.0% U₃O₈)¹:

¹ Refer ASX Announcements dated 24 April 2024 and 22 October 2024

- 4TB020 – 58,396ppm U3O8 (5.84%)
- 4TB021 – 46,805ppm U3O8 (4.68%)
- 3TA015 – 41,902ppm U3O8 (4.19%)
- 3TB005 – 24,125ppm U3O8 (2.41%)
- 4TB017 – 22,671ppm U3O8 (2.27%)
- 4TB018 – 21,836ppm U3O8 (2.18%)

The Agadez Project currently hosts an Inferred Mineral Resource of approximately 31.2Mt @ 315ppm U3O8 for 21.5Mlbs of contained metal from surface to ~37m depth.²

The directors will continue to assess all options available to the Company to realise maximum value from this world class asset which may include continued exploration or a possible divestment via an earn in or corporate transaction.

No progress was made on the project during this reporting period.

MANITOBA LITHIUM PROJECTS – MANITOBA, CANADA (100%)

As announced on 24 January 2025, the Company was the holder of three (3) Mineral Exploration Licences over potential lithium targets at Handle Lake, Split Lake and Unwin Lake in Manitoba. As part of the Company's ongoing review of these projects, the Board determined to relinquish Unwin Lake and has subsequently determined to relinquish Handle Lake and Split Lake.

The directors were not encouraged by the greenfield and remote nature of these Licenses and could not see how these projects areas would contribute to restoring value to the Company or to shareholders. In addition, holding and exploring these tenements would come at a significant cash cost and for these reasons the Company determined to relinquish the Licenses.

GHANZI WEST COPPER-SILVER PROJECT – BOTSWANA (10%)

The Ghanzi-West Project comprises six (6) prospecting licenses located in the emerging world class Kalahari Copper Belt of Botswana covering a total area of ~2,600km².

London Stock Exchange ("LSE") listed Kavango Resources Plc (LSE: KAV) ("**Kavango**"), the 90% owner of the Ghanzi West Copper-Silver Project ("**Ghanzi West Project**") in Botswana's Kalahari Copper Belt, provided an update to its shareholders in October 2024 on its ongoing Phase 1 stratigraphic drill campaign on the Ghanzi West Project.

Kavango's announcements can be viewed via the London Stock Exchange website under code 'KAV' or Kavango's website (www.kavangoresources.com).

VIRGO PROJECT – BOTSWANA (25%)

² Refer ASX Announcement dated 26 April 2023

The Company retains a 25% interest in Alvis-Crest (Propriety) Limited ("**Alvis Crest**"), the holder of two prospecting licences in the Kalahari Copper Belt (PL 135/2017 and PL 162/2017) ("**Virgo Project**").

The Virgo Project is located in an emerging copper district in the Kalahari district in close proximity of some larger discoveries and cover an area of over 210km². The Virgo licenses lie within and adjacent to the highly prospective Central Structural Corridor and within 10km and 50km of the Zone 5 and Banana Zone copper projects respectively, known as the two largest copper projects on the Kalahari Copper Belt.

Arc's announcement can be viewed via the London Stock Exchange, Alternative Investment Market (AIM) website under code 'ARCM' or Arc's website (www.arcminerals.com).
