

GOLD EXPLORATION ADVANCES AROUND TWO KEY MINING HUBS

forrestanioresources.com.au

ASX: **FRS**, **FRSOA**, **FRSOB**

Forrestania Resources Ltd

ACN 647 899 698

Suite 1, 295 Rokeby Road

Subiaco WA 6008

ASX RELEASE 24 July 2025

Forrestania Resources Limited is an Australian resources company exploring for gold and copper in the Eastern Goldfields, Forrestania and Southern Cross regions of Western Australia.

Highlights for the quarter:

- **Ada Ann** 1m drilling results confirm high-grade gold, up to 26g/t Au:
 - AARC0029 – 7m @ 4.3g/t Au (from 72m),
 - AARC0028 – 3m @ 7.8g/t Au (from 74m),
 - AARC0024 – 3m @ 5.9g/t Au (from 82m),
- **Lady Lila** drilling program undertaken & new tenement secured
 - Assay results awaited
- Highly experienced mining executive **David Geraghty** joined the board
- **Strategic placement** completed at a premium to raise a total of \$500,000
- **Bonnie Vale** option exercised and terms varied.

Bonnie Vale Gold Project

Coolgardie, Western Australia

Ada Ann Prospect

During the quarter, the Company announced 1m results from the second phase of drilling at the Ada Ann prospect at the Bonnie Vale Project, near Coolgardie, in Western Australia's prolific Eastern Goldfields.

Having already defined strong, consistent, high-grade Au results from the maiden drilling programme at Ada Ann, the Company reported continued exploration success with **further high-grade Au drilling results** from the Company's phase 2 drilling programme.

Ada Ann – Phase 2 drilling programme

During the quarter the Company received the 1m Au assay results from its phase 2 drilling programme (14 RC holes for 1017m) at the Ada Ann prospect. The drilling was designed to follow up on the results from phase 1 and to increase the mineralisation footprint to the north, south and at depth.

The results from the Company's phase 2 drilling programme confirmed consistent mineralised structures at Ada Ann, which include the **highest Au intercept** seen at Ada Ann from FRS drilling – **25.6g/t Au** (and the second highest ever intercepted at the prospect) confirming the high-grade potential at Ada Ann:

Hole_ID	From	To	Width	g/t Au	
AA06	19	26	7	4.4	includes 1m @ 26.1g/t Au
AARC0029	72	79	7	4.3	includes 1m @ 25.6g/t Au
AARC0028	74	77	3	7.8	includes 1m @ 22.2g/t Au
AARC0002	62	64	2	10.7	includes 1m @ 21g/t Au
AA27	41	45	4	7.3	includes 1m @ 20.2g/t Au
AA25	35	38	3	5.4	includes 1m @ 17.6g/t Au
BR22	24	34	10	2.3	includes 1m @ 16.5g/t Au
AA04	4	11	7	5.0	includes 1m @ 16.2g/t Au
AARC0024	82	85	3	5.9	includes 1m @ 16g/t Au
AA05	16	22	6	6.5	includes 1m @ 15.7g/t Au
AA49	14	16	2	8.1	includes 1m @ 15.6g/t Au

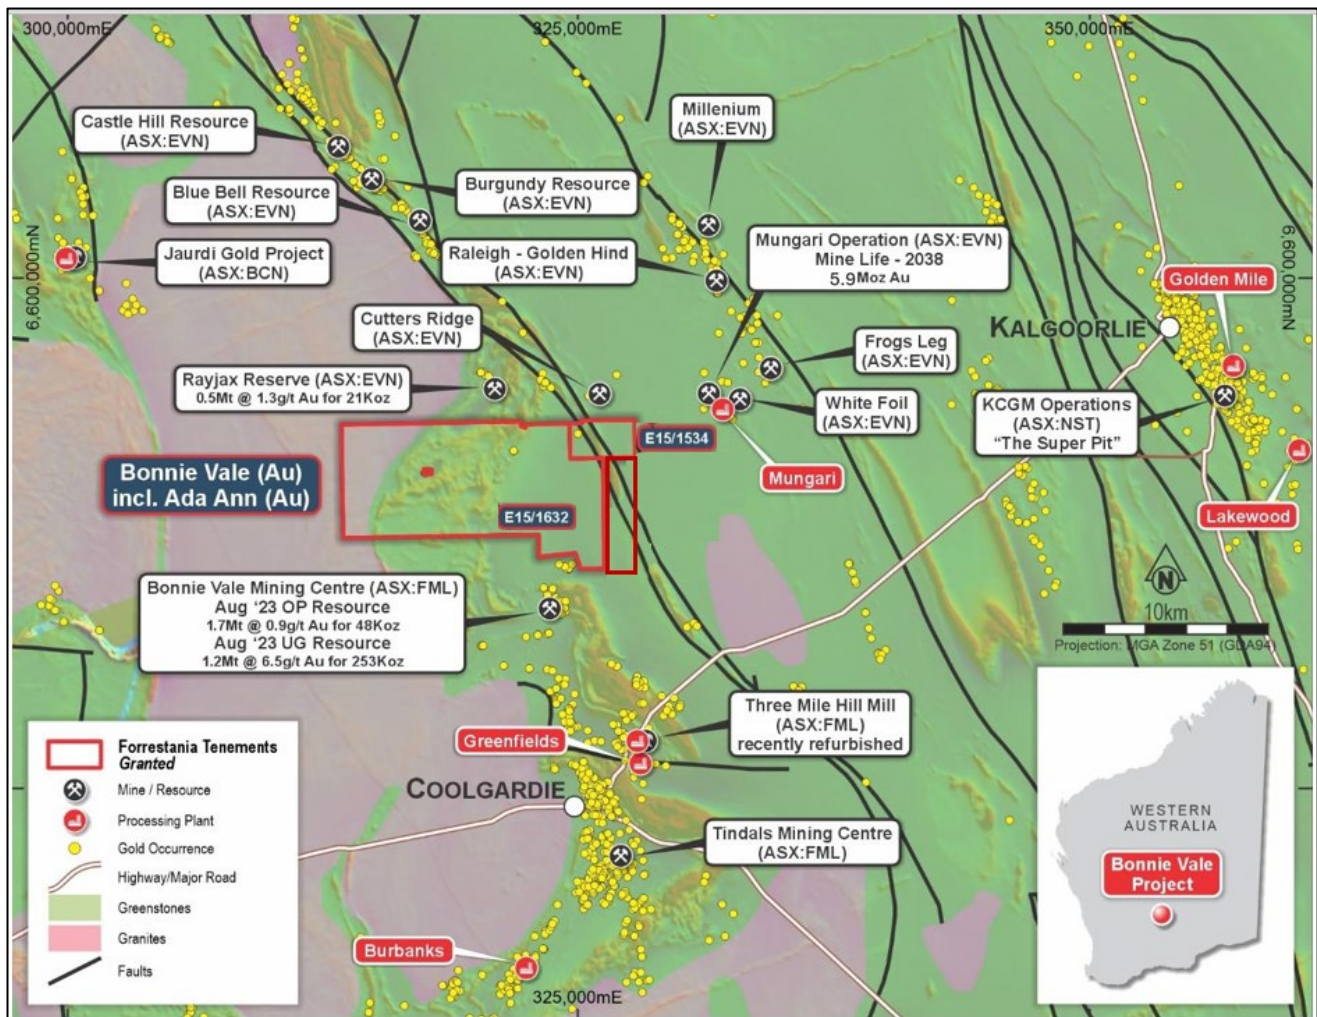

Figure 1. Forresteria Resource's Bonnie Vale Project (E15/1632 & E15/1534) is in close proximity to major gold mines and deposits. Map includes simplified geological interpretation with WA Government magnetics. ASX: EVN Mungari lies ~5km to the east of the Bonnie Vale Project area. (ASX: EVN Mungari mine life taken from ASX: EVN Mungari mine life extended to 15 years - 5th June 2023; Mungari Mineral resource estimate figure of 5.9Moz & Rayjax Ore Reserve taken from ASX: EVN Mungari Mineral Resource & Ore Statement as at 31st December 2023 - 14th February 2024; ASX: FML Bonnie Vale mineral resource update, 26th September 2023.)

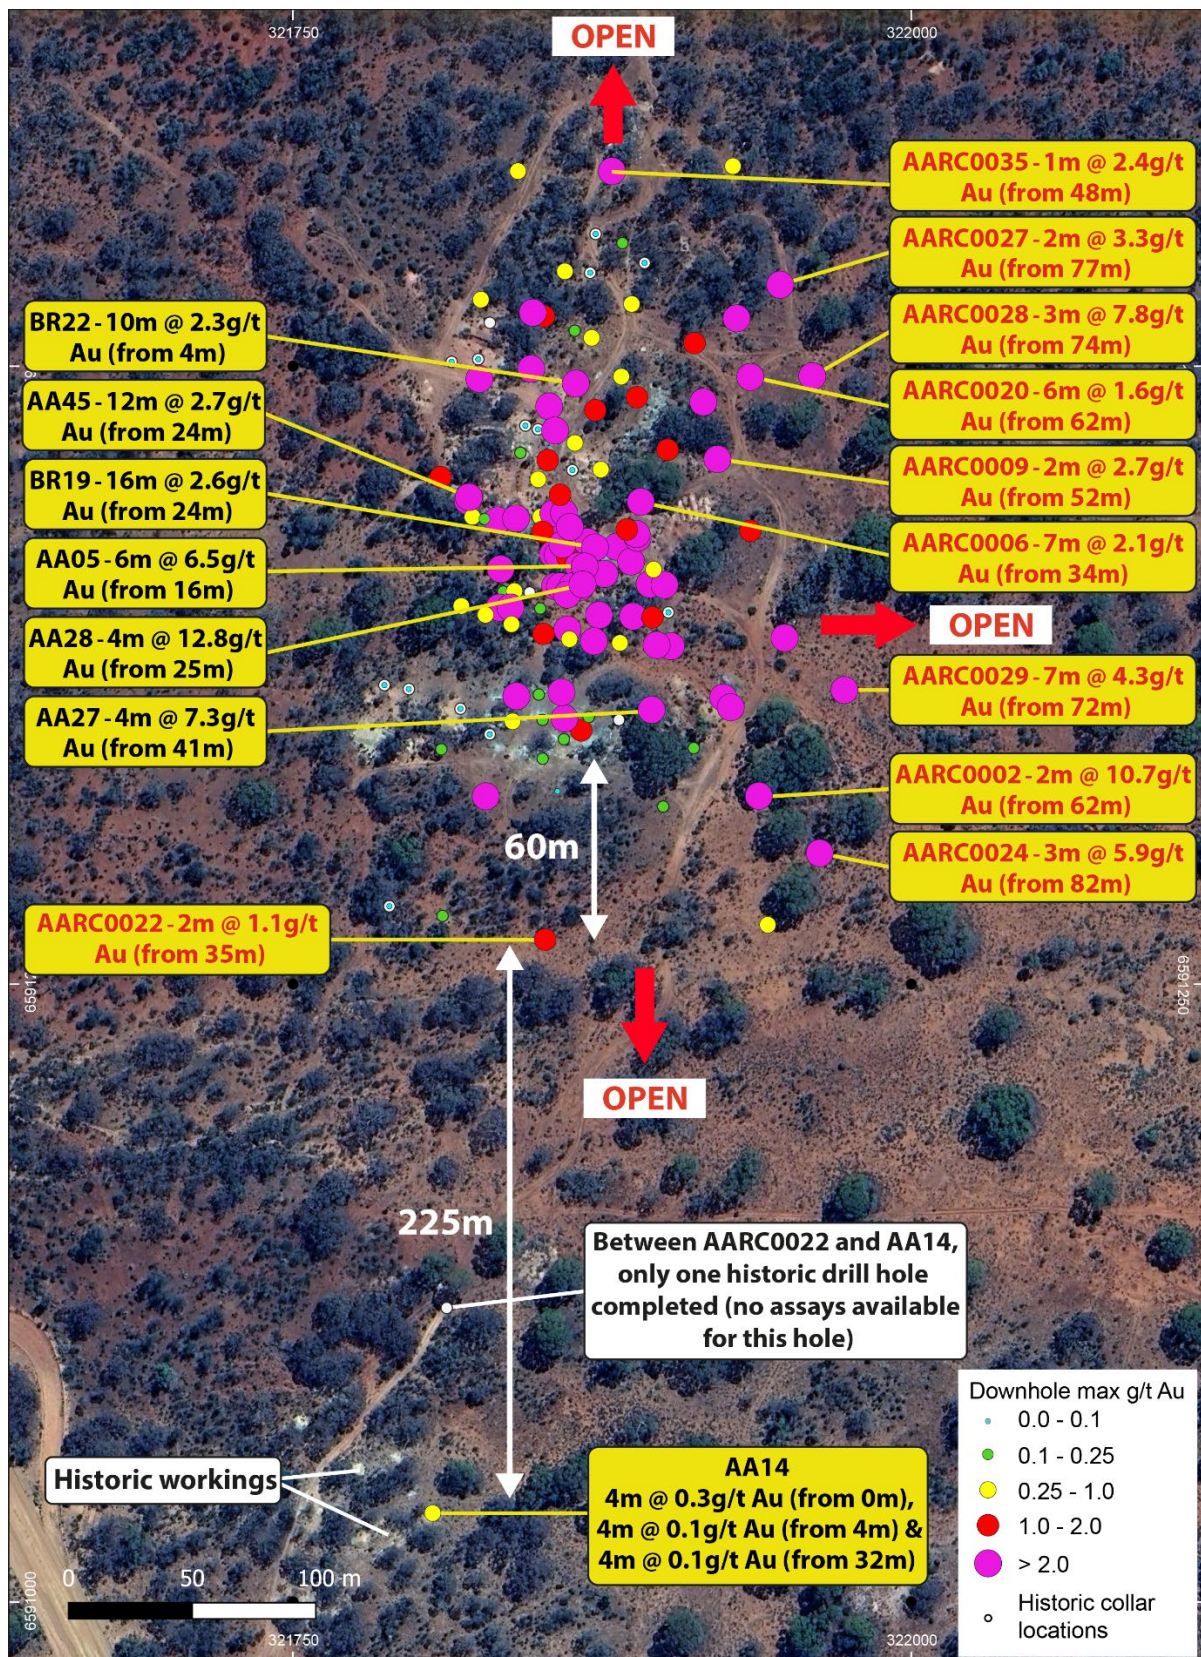

Figure 2. Image showing historic and FRS results along with the potential extension to Au mineralisation at Ada Ann, with historic drill holes AA14 shown ~225m south of AARC0022; AA14 shows highly anomalous Au values, close to historic workings. Only one historic hole is known to have been drilled between AARC0022 and AA14 with no assays available for that hole.

Figure 4. Cross section (D-D'), looking north, ~10m section view, showing interpreted geology and Au mineralisation of historic drilling (black text) and significant, recent FRS drilling (red text). Drilling results are down hole width and not true width.

Figure 5. Long section (G-G') looking west at the Ada Ann deposit. Significant FRS drilling results in red text, historic drilling values in black. Drilling results are down hole width and not true width

Lady Lila Gold Project

Forrestania, Western Australia

During the quarter, the Company completed an RC drill programme at the Lady Lila Gold Project, to follow up previous drill results, and extend mineralisation. Topdrill was engaged as drill contractor.

The Company undertook its maiden RC drilling programme at the Lady Lila prospect in November 2021, following its IPO. This programme successfully extended the existing mineralisation at depth and extended mineralisation to the south by 50m, with mineralisation remaining open in all directions.

Lady Lila has an inferred mineral resource of 541,000 tonnes, grading at 1.38g/t, for 24,000oz of gold and is located ~15km south-west of the historic Bounty Gold Mine² which produced 1.3Moz of gold during its 12-year life.

Lady Lila prospect overview

The Lady Lila Project was the focus of the Company's maiden drilling programme in November 2021 (14 RC holes for 1823m), with the programme successfully returning significant Au results.

Lady Lila is located in **close proximity to nearby processing options** include the Marvel Loch mine (Barto Gold Mining) and the Edna May operation (Ramelius Resources), both of which can be reached using sealed roads. ASX: IGO and ASX: MM8 have also recently entered exclusive negotiations to acquire the IGO Cosmic Boy processing plant³ with a plan to convert the nickel plant to process ore from their Ravensthorpe Gold Project.

The Lady Lila prospect hosts approximately 1700m of continuous Au mineralisation, with near surface, potentially supergene mineralisation; with mineralisation open at depth and in both directions including **FLLRC006 – 8m @ 7.2g/t Au, from 24m and LLRC002 – 3m @ 4.8g/t Au, from 10m**. Significantly, high-grade intercepts at depth were returned from the FRS drilling programme (including **LLRC009 – 4m @ 5g/t Au, from 110m, including 1m @ 10.8g/t Au, from 111m**) with the project area remaining open at depth and along strike in both directions suggesting the project is amenable to open pit mining and also may have the potential for underground mining. **See Figure 4 for a size comparison with the nearby (historic) Bounty Gold Mine.**

This Company believes that Lady Lila offers strong exploration upside with a large number of high-grade and significant intercepts (results previously released) open at depth and along strike, including:

Hole_ID	Depth From	Depth To	Interval Width	Grade (g/t) Au	Gram/ metre	
FLLRC006	24	32	8	7.23	57.8	including 1m @ 54.5g/t Au, from 26m

Table 1. Significant drilling intercepts (all intervals with a minimum gram/metre intercept of 15g/m) from Lady Lila (table contains historic and FRS drilling results). Intercepts are based on a cut-off grade of 0.3g/t Au, allowing for internal dilution by two "waste" or sub-grade (<0.3g/t Au) samples. Drilling intercept widths reported in this table are down-hole widths and not true widths. A full list of significant intercepts for Lady Lila is available within the supplementary data of ASX: FRS Lady Lila gold review and market update, 5th March 2025.

In addition to the drill programme at Lady Lila, the Company confirmed that it acquired tenement E77/2853. This tenement has already been granted and is in a prime exploration location (see Figure 6). The Company has acquired the tenement in consideration for reimbursing application costs and rents, to a maximum of \$10,000.

E77/2853 is located immediately adjacent to Lady Lila, wholly within the Forrestania greenstone belt. WAMEX reviews suggest there has been little to no previous exploration on this tenement, in an area the Company believes is highly fertile and in close proximity to ASX: CLZ's Lady Magdalene and Lady Ada.

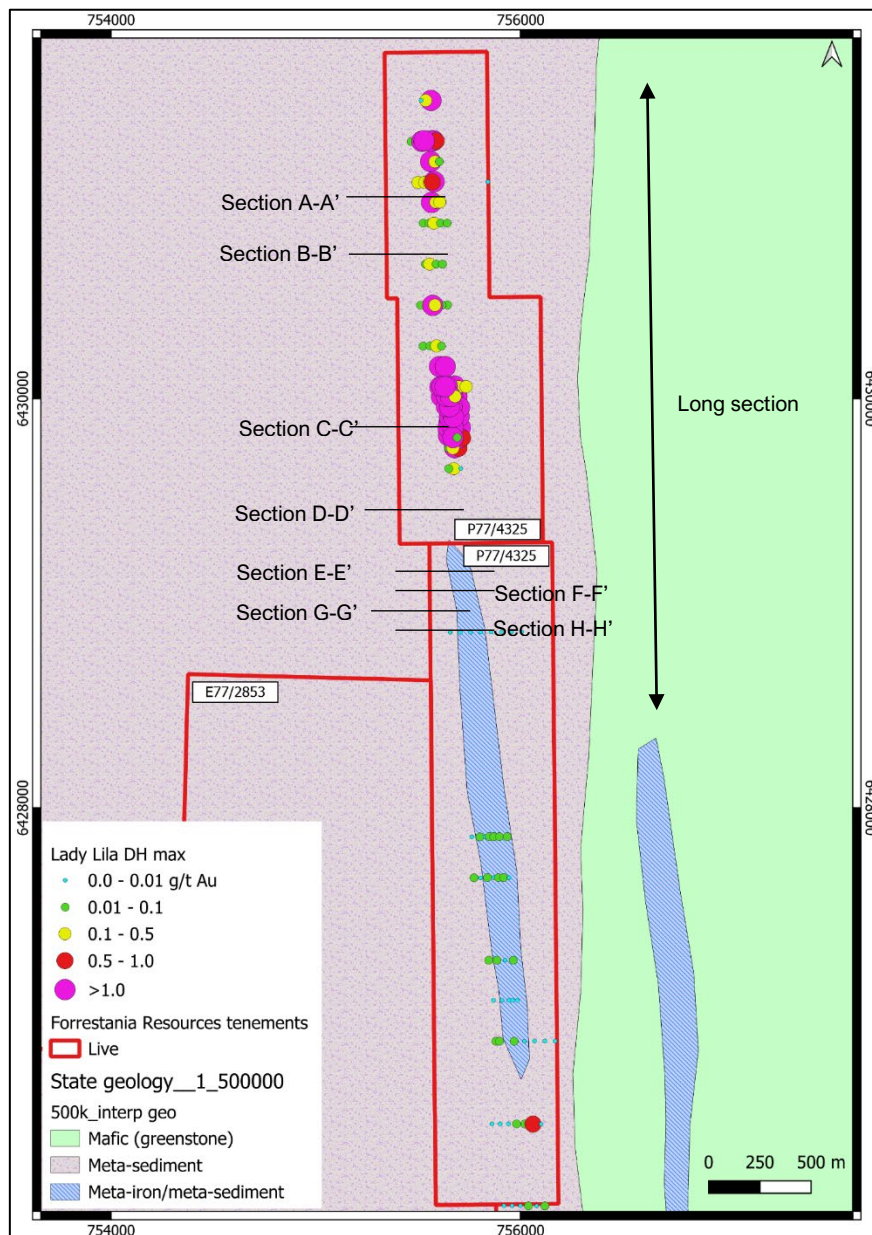

Figure 6. Forrestania Resource's Lady Lila prospect, showing DH Max Au values and locations of cross sections and long section (long section can be seen in Figure 4). Selected cross sections can be seen below as well as in the supplementary information at the end of this announcement.

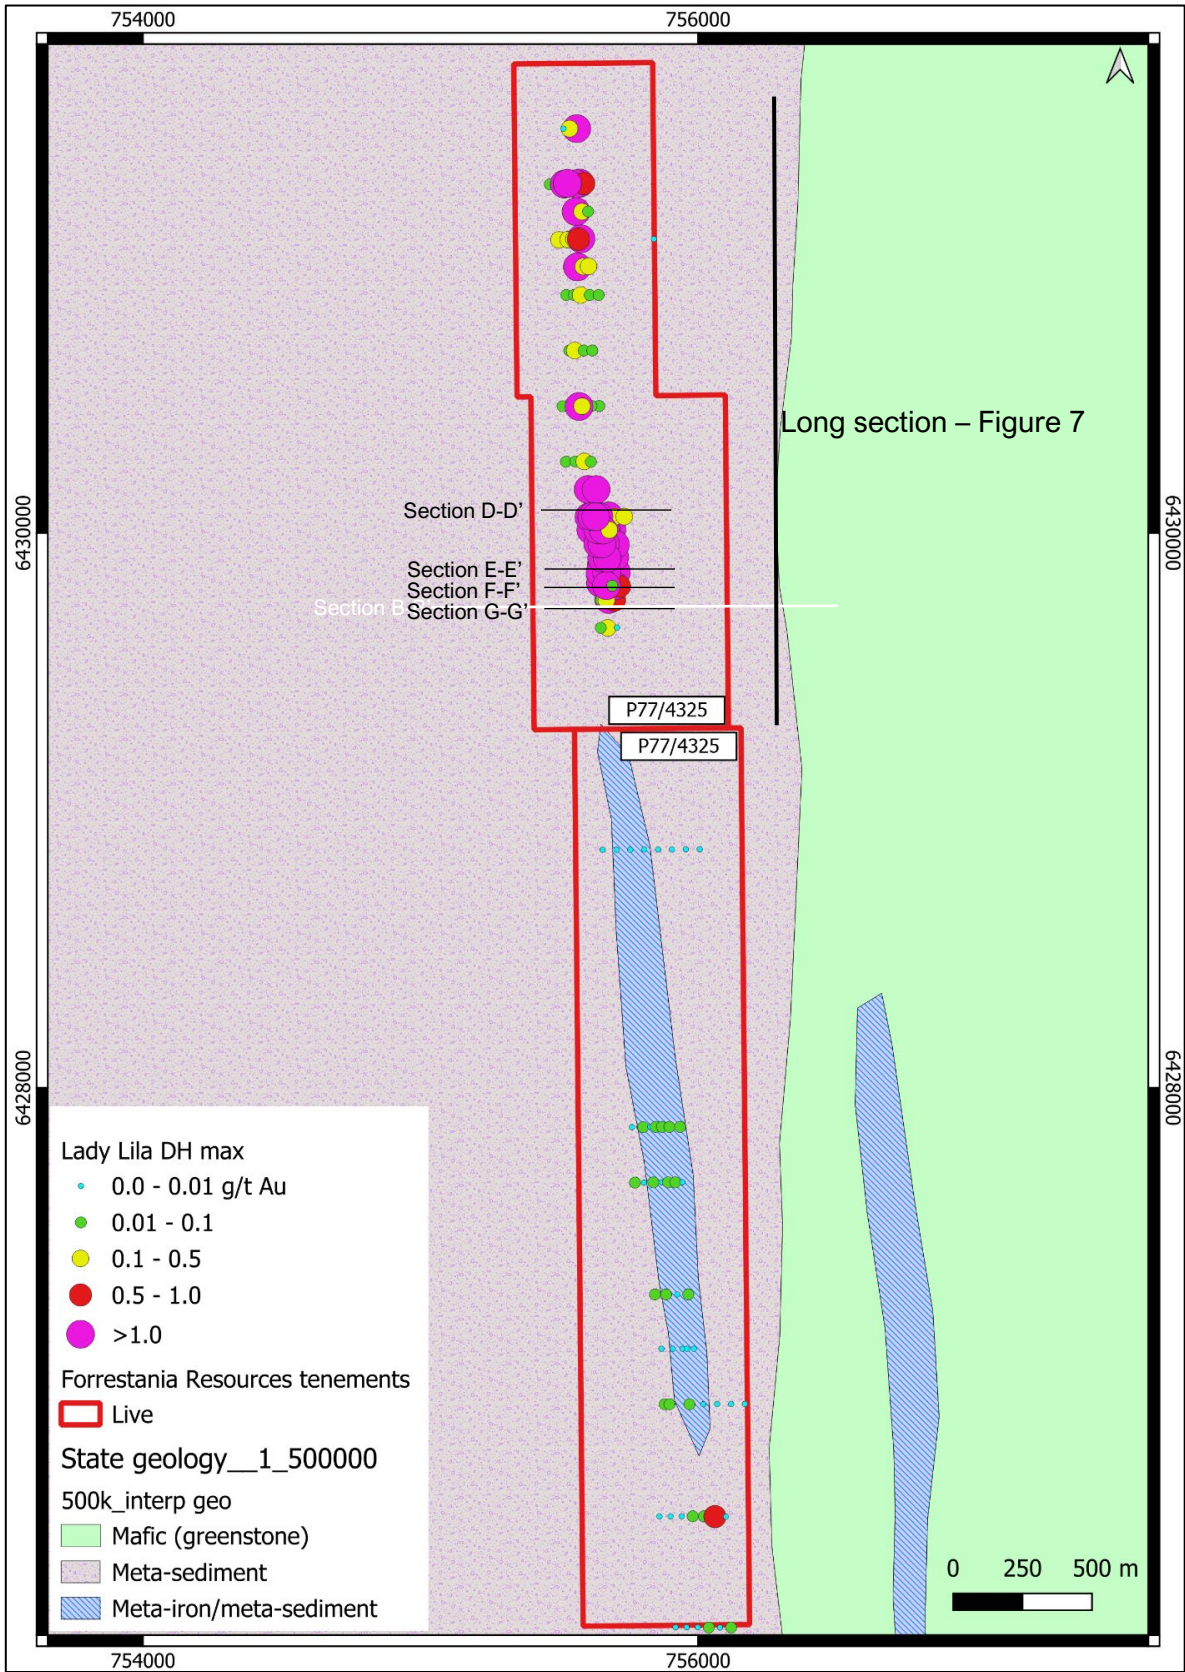

Figure 7. Forrestania Resource’s Lady Lila prospect, showing DH Max Au values and locations of cross sections and long section (Figure 7). Selected cross sections seen below. Regional geology – 1:500k.

To date, the majority of the drilling at Lady Lila has focused on the southern and northern section of P77/4325. However, the Company believes that the area between the two main zones of mineralisation (see Figure 9) has been ineffectively tested historically, with only 19 RAB holes (average depth of 59m) and 2 RC holes (average depth 65m) testing the potential for mineralisation in this area.

From a regional, comparative point of view, the gold mineralisation at the nearby, historic Bounty Gold Mine occurs in a steeply dipping, semi-conformable shear system within near vertical, dipping metasediments (chert and banded iron formation). This sequence extends several kilometres north and south at Bounty. There is a strong association between the occurrence of gold and the presence of underlying BIF and chert. Geologically, the mineralisation at Lady Lila is hosted in narrow quartz stringer veins with mineralisation predominantly and strongly associated with a steeply dipping, discontinuous banded iron formation, up to 21m wide (down-hole width) in places. Geologically, Lady Lila and the Bounty Gold Mine appear to have many similarities. For reference, a size comparison between the historically mined Bounty Gold Mine and the Lady Lila resource can be seen in Figure 10 (below).

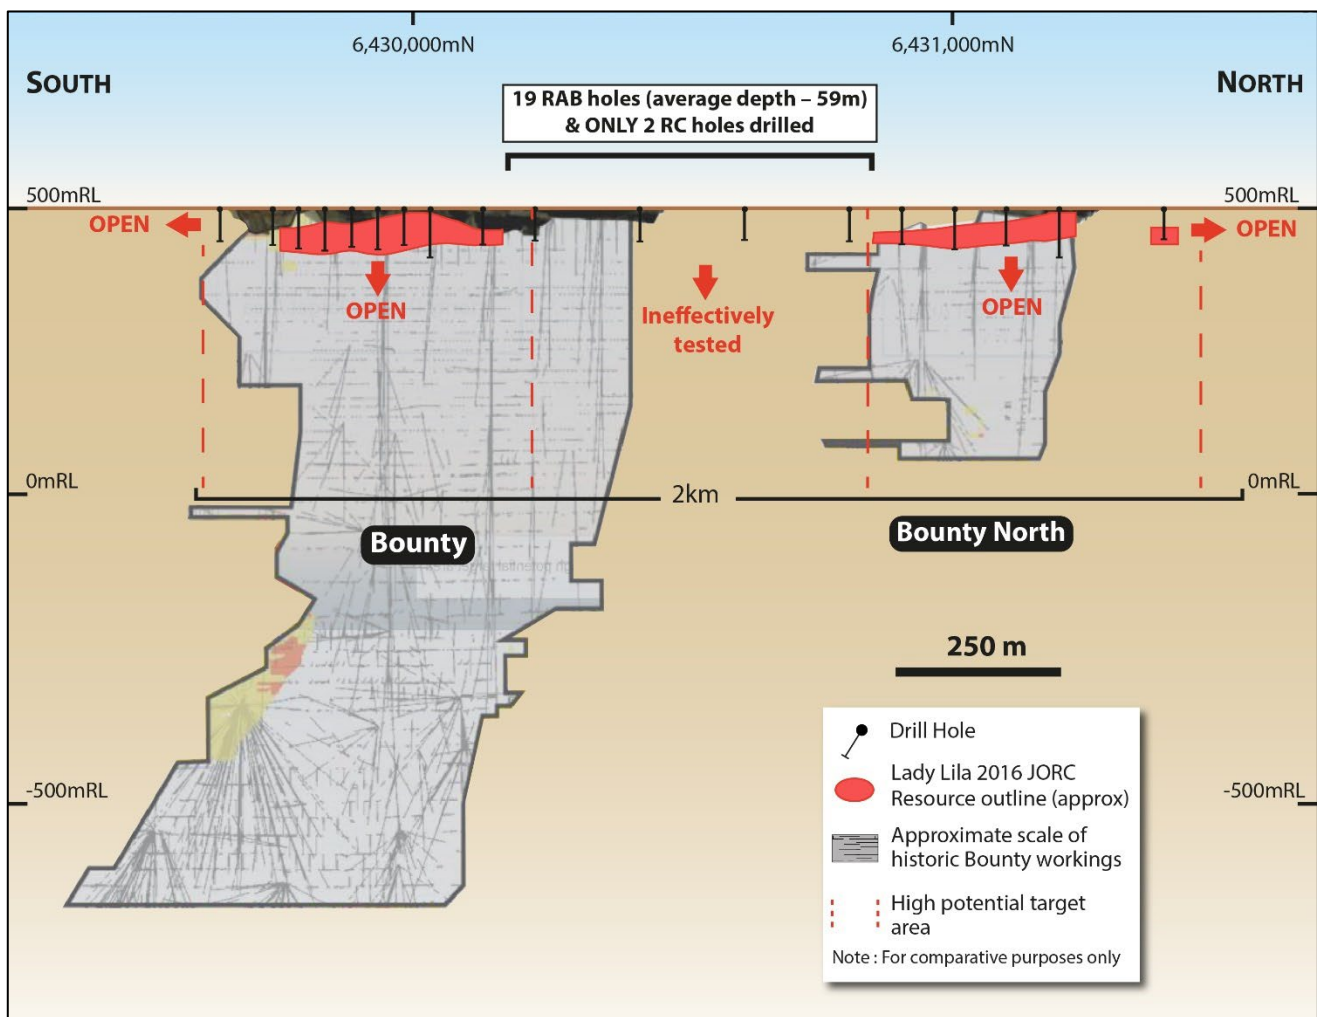

Figure 8. Image showing a long section through the Lady Lila, inferred JORC mineral resource estimate outline, in comparison to the mined operation at the nearby, historic Bounty Gold Mine. Bounty Gold Mine image courtesy of ASX: Kidman Resources, Kidman agrees to acquire 1Moz Mt Holland Gold Field in WA, 18th December 2015.

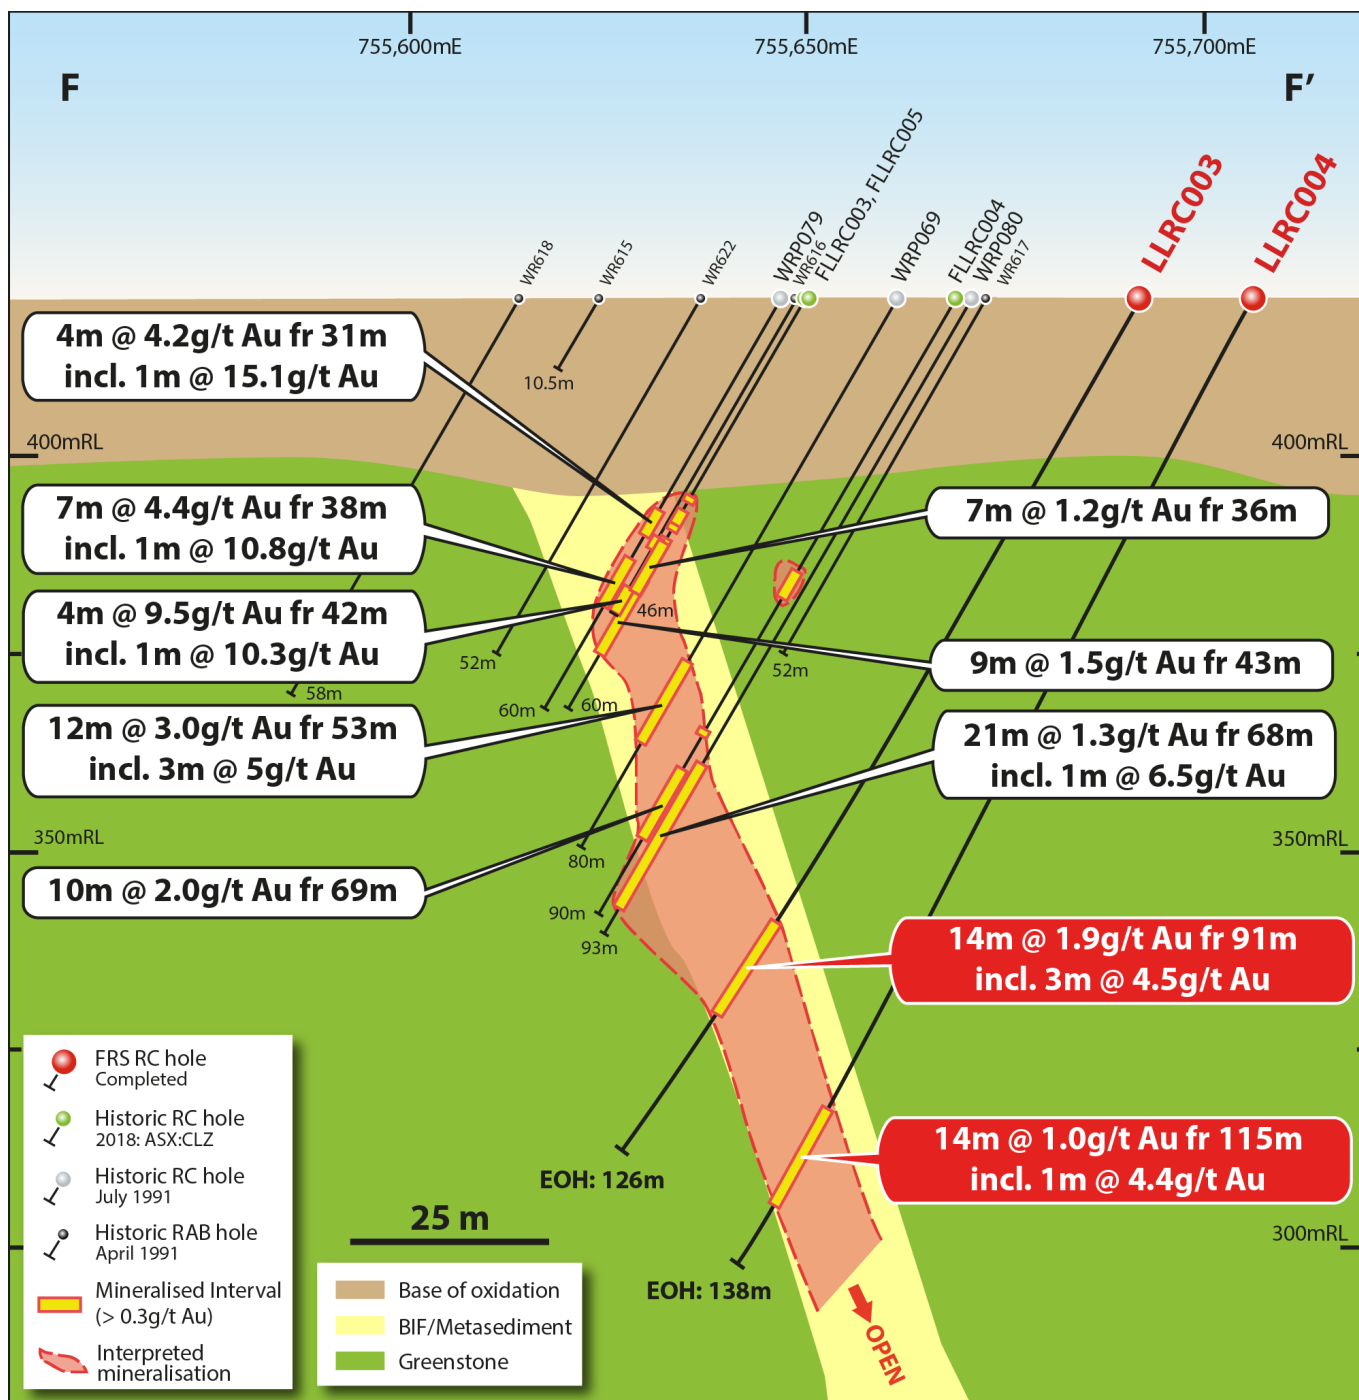

Figure 9. Cross section (F-F'), looking north ~15m along strike, showing Au mineralisation of historic and FRS drilling. Drilling intercept widths are down-hole widths and not true widths. Intercepts are based on a cut-off grade of 0.3g/t Au, allowing for internal dilution by two "waste" or sub-grade (<0.3g/t Au) samples. FRS holes (red caption) were completed in 2021.

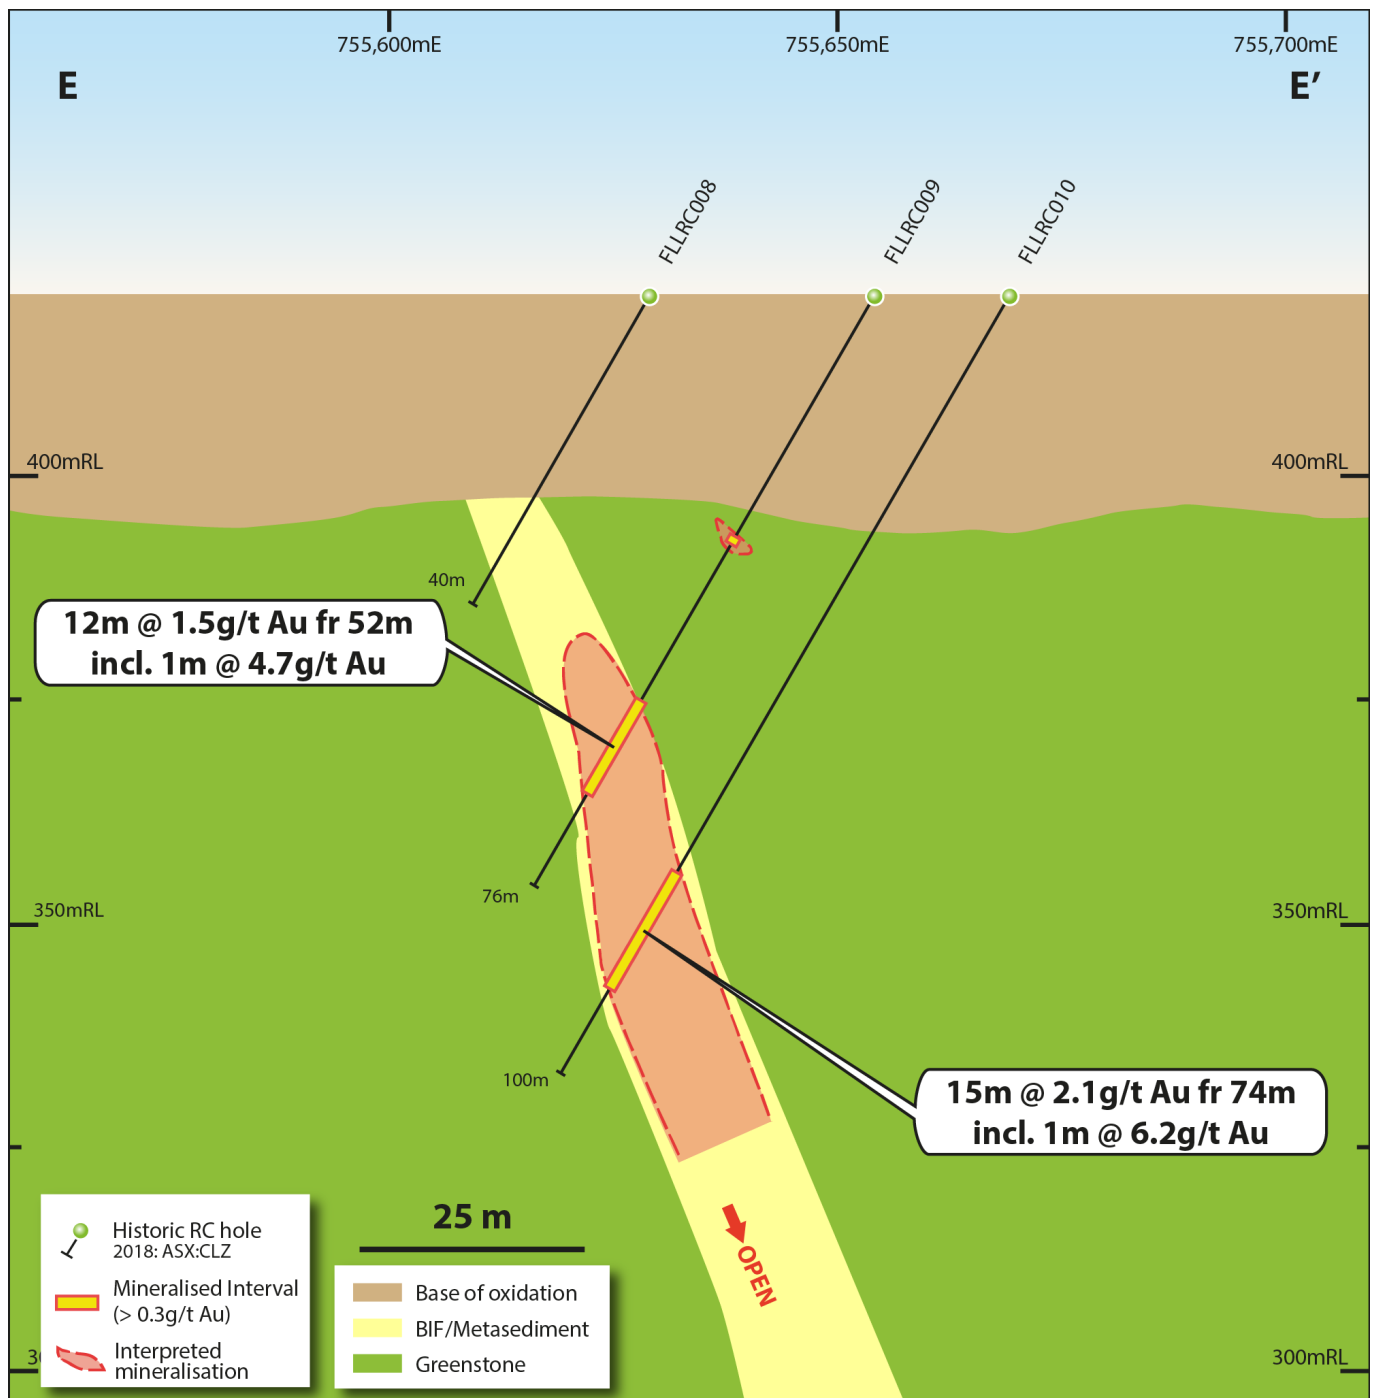

Figure 10. Cross section (E-E'), looking north ~5m along strike, showing Au mineralisation of historic drilling. Drilling intercept widths are down-hole widths and not true widths. Intercepts are based on a cut-off grade of 0.3g/t Au, allowing for internal dilution by two "waste" or sub-grade (<0.3g/t Au) samples.

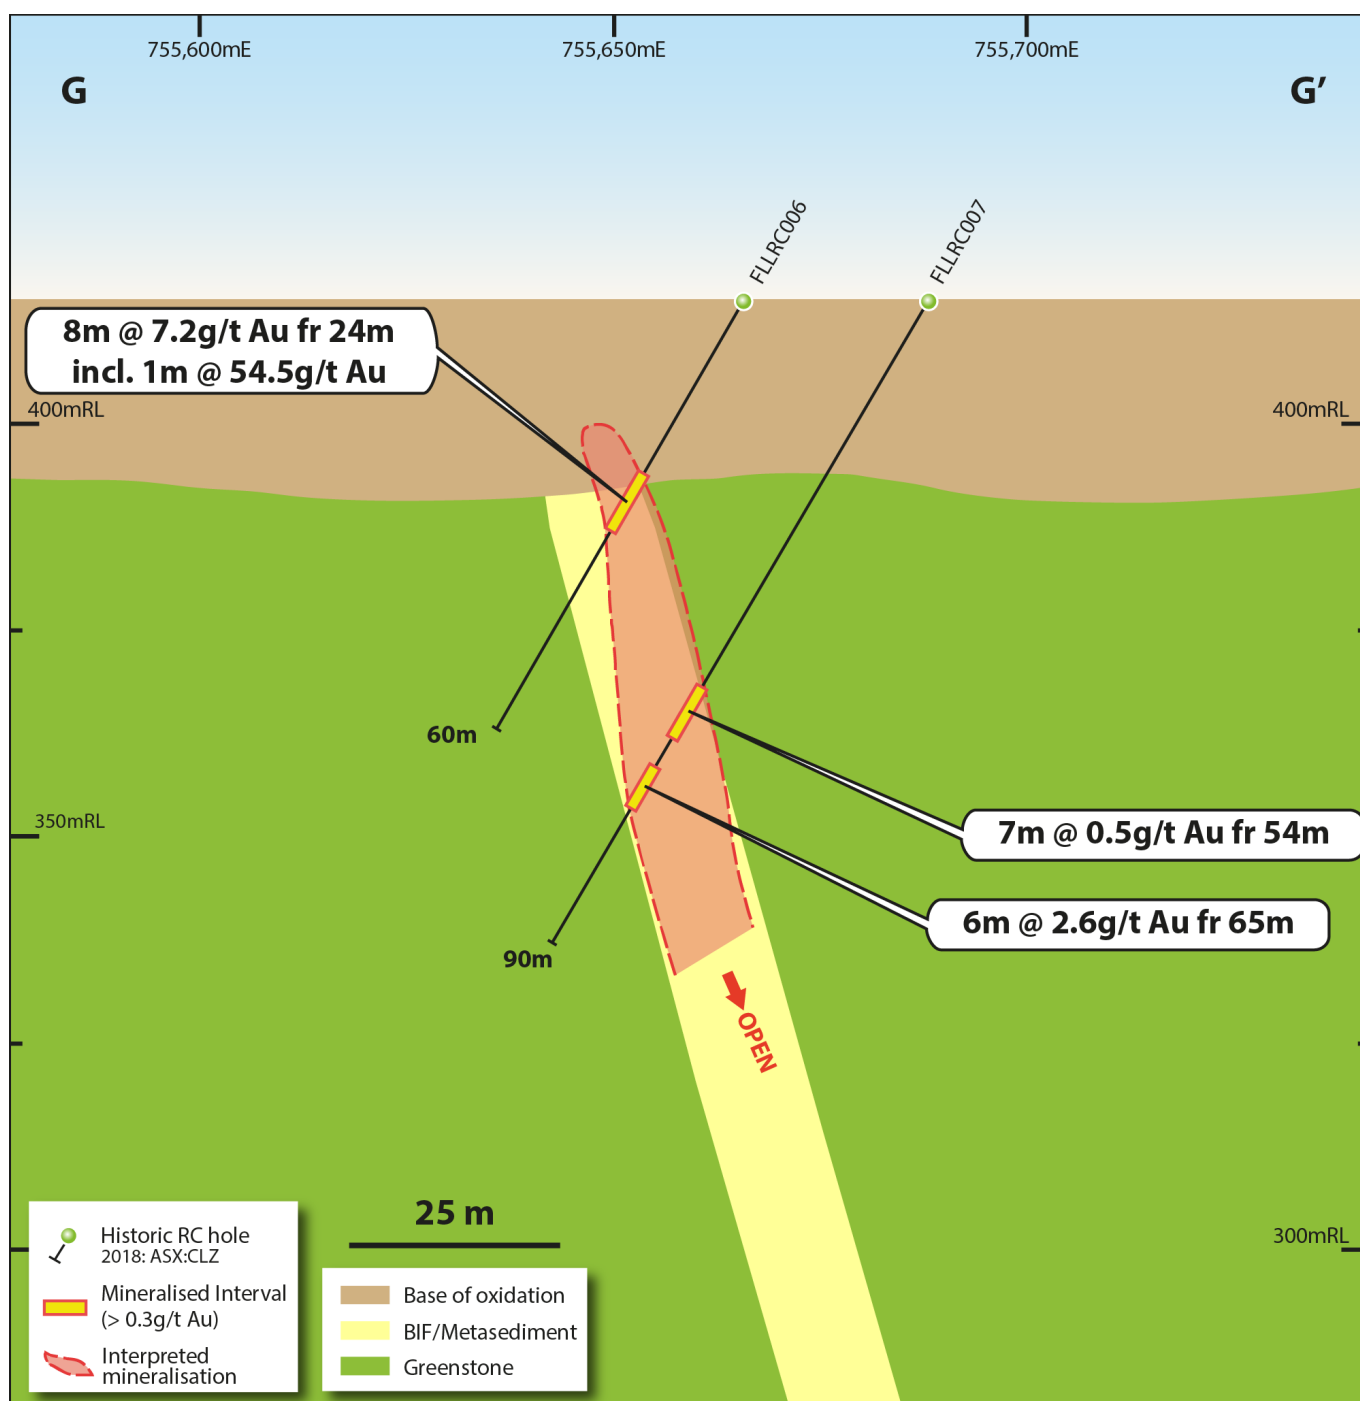

Figure 11. Cross section (G-G'), looking north ~8m along strike, showing Au mineralisation of historic drilling. Drilling intercept widths are down-hole widths and not true widths. Intercepts are based on a cut-off grade of 0.3g/t Au, allowing for internal dilution by two "waste" or sub-grade (<0.3g/t Au) samples.

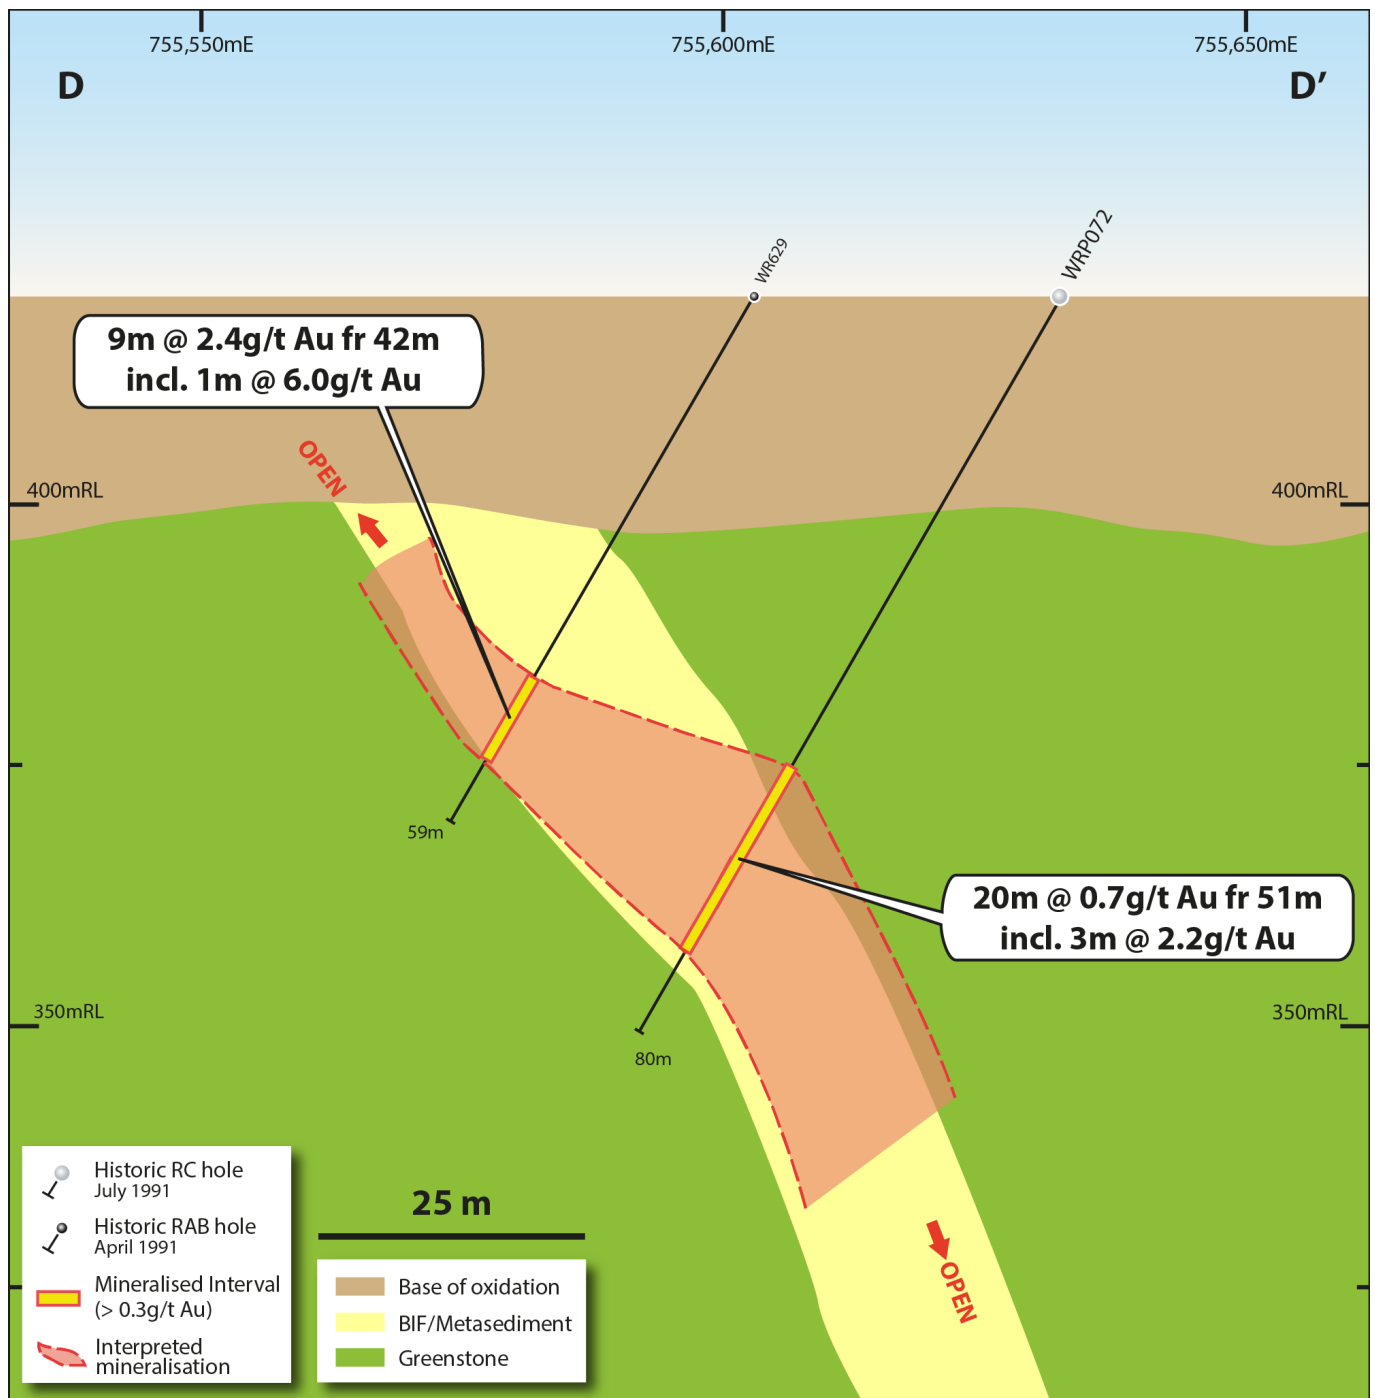

Figure 12. Cross section (D-D'), looking north ~10m along strike, showing Au mineralisation of historic drilling. Drilling intercept widths are down-hole widths and not true widths. Intercepts are based on a cut-off grade of 0.3g/t Au, allowing for internal dilution by two "waste" or sub-grade (<0.3g/t Au) samples.

Next steps

The Company will report on the assay results, when available. The results, combined with existing drill data to form the basis of an updated JORC resource estimate. A subsequent drilling programme will be planned, based on the results of the upcoming drilling.

Outback Minerals Option exercised

Bonnie Vale and Breakaway Dam option

On April 2, 2025, the Company announced that it had agreed to revised terms for the option agreement between Forrester Resources Limited and Outback Minerals Pty Ltd, for the Bonnie Vale and Breakaway Dam projects, and had exercised the option.

The revised terms of the option include:

- **Deferral of the \$1.1m share consideration, payable up until May 5, 2026.**
- **Payment of \$100,000 cash upon exercise.**

The option agreement covers 2 of the Company's highest potential project areas (~210km² in area): Bonnie Vale (E15/1632 & E15/1534) and Breakaway Dam (E29/1036 & E29/1037).

Pursuant to the revised agreement, the Company may issue the \$1.1 million of share consideration at any time, up until 5th May 2026, based on a 5 day VWAP share price at the time, subject to a maximum share price of 20 cents per share.

Figure 15. Forrestania Resource's Breakaway Dam Project (E29/1036 & E29/1037) and Bonnie vale Project *E15/1632 & E15/1534) - in close proximity to multiple major gold mines and deposits, significant gold mines and lithium occurrences with Breakaway Dam along strike from the Teutonic Bore VMS mine (Cu).

Bonnie Vale Project (E15/1632 & E15/1534), Coolgardie WA

The Bonnie Vale project area is one of the largest continuous tenements (~90km²) within the Coolgardie region with ~6km of exposure to the Kunanalling Shear Zone and additional granite/greenstone contacts, with ~12km of contact exposure to the Black Flag Group and located amongst the ASX: EVN Mungari Au project (Figure 13).

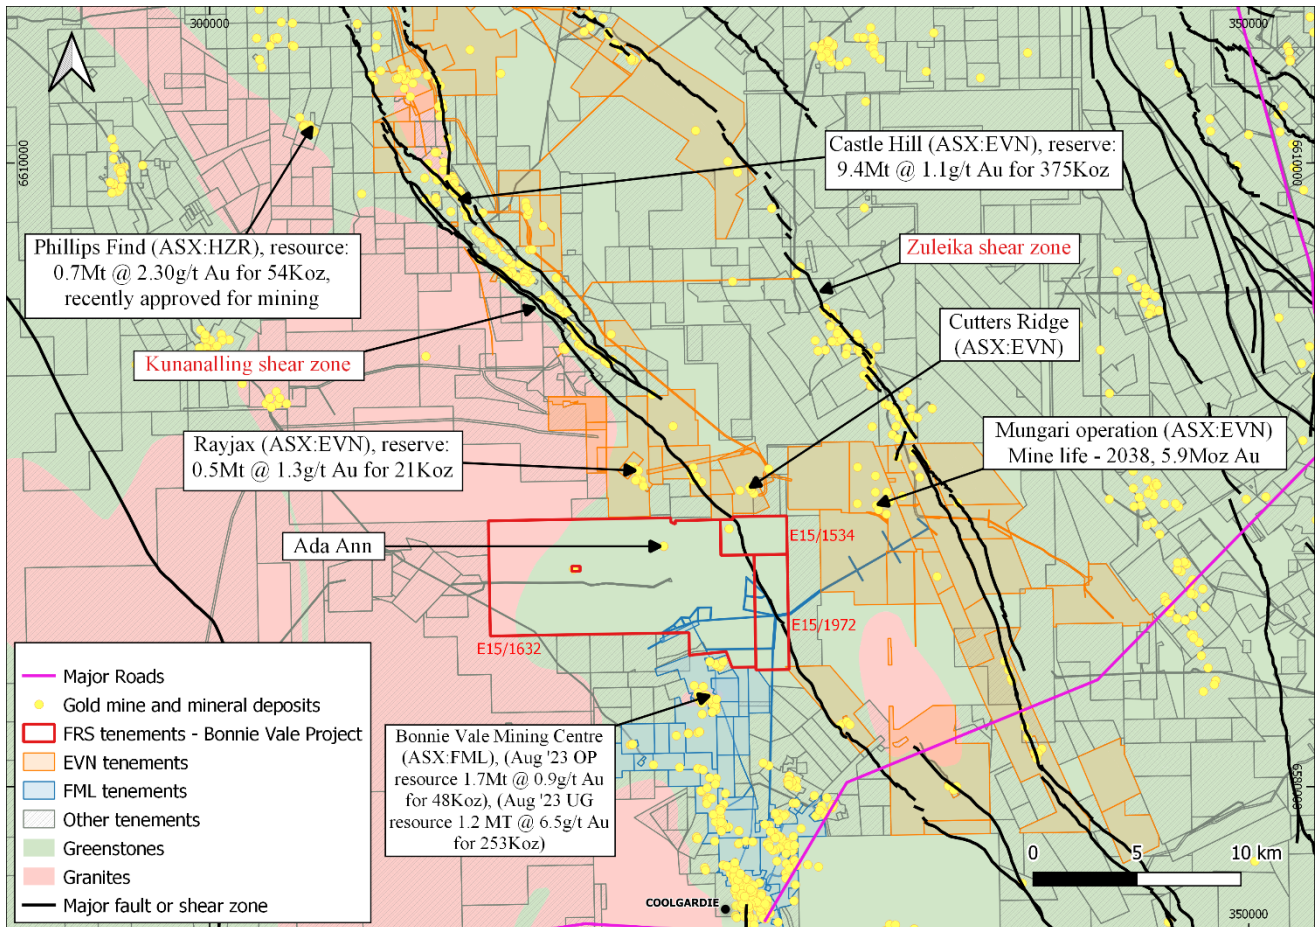

Figure 16. Image showing all tenements in the north Coolgardie and western Kalgoorlie region, with simplified geology (courtesy of GSWA); the FRS Bonnie Vale Project (including E15/1972) is highlighted, as are the Evolution Mining (ASX: EVN) and Focus Minerals (ASX: FML) tenements north of Coolgardie. Figures for Horizon Minerals, courtesy of ASX: HRZ, Phillips Find Approved, Mobilisation Underway, 8th Oct 2024. Note: E15/1972 is not part of the Outback Minerals option but was instead part of an option agreement with Amery Holdings Pty Ltd (ASX: FRS Key tenement under option at Bonnie Vale, 16th December 2024)

As well as hosting the Ada Ann prospect (details of which can be found earlier in the quarterly), the Bonnie Vale project area hosts multiple, strong, regional exploration opportunities with a number of historic drill holes intersecting gold (previously announced), none of which have ever been effectively followed up, with mineralisation still open at all of the regional targets.

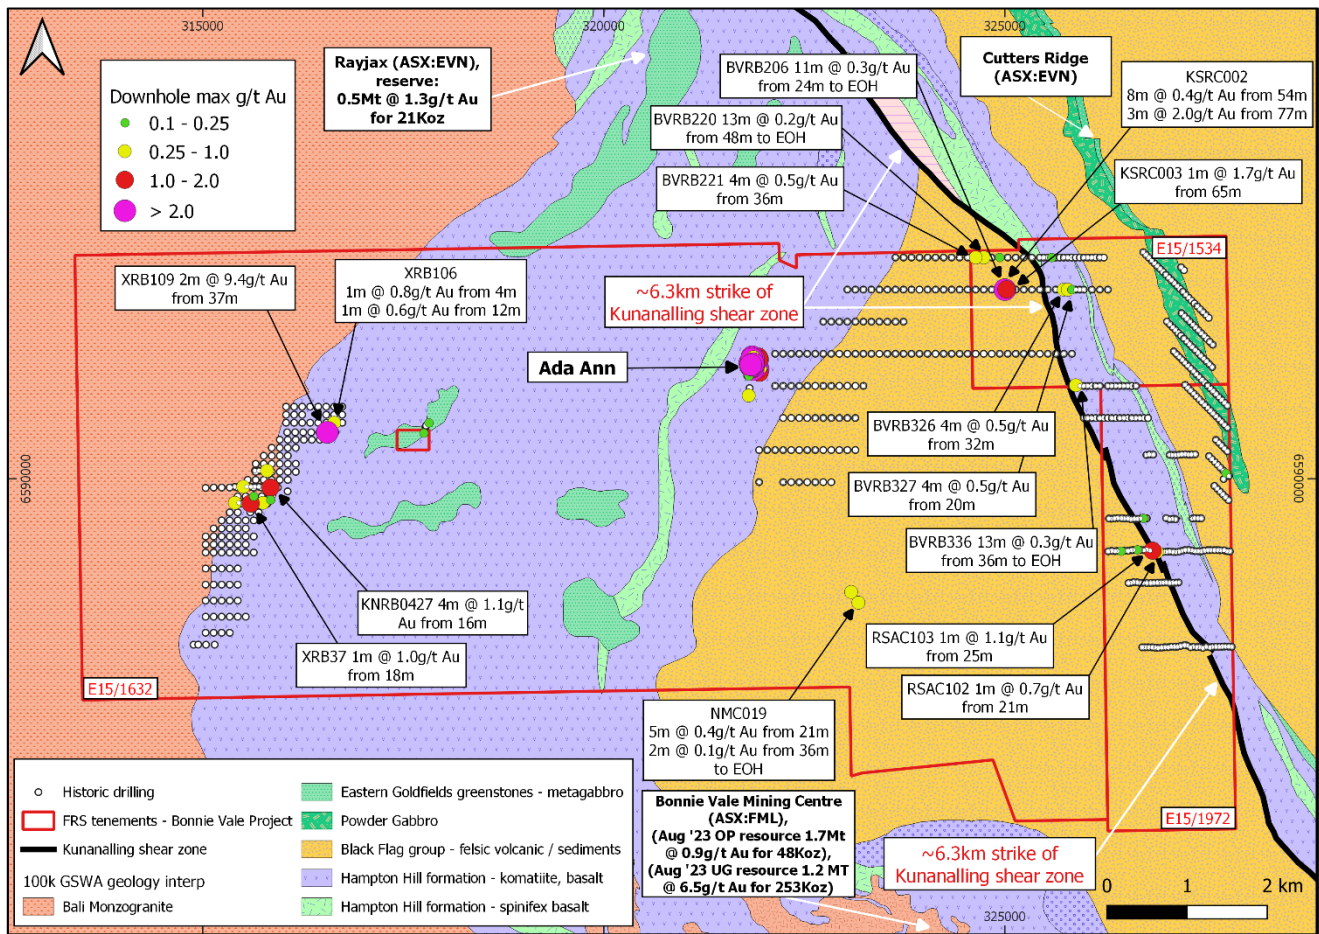

Figure 17. Image showing all of the significant, historic drilling results across the Bonnie Vale Project area and other anomalous drilling results across the project area. Width given is down-hole width and not true width. Geology interpretation courtesy of GSWA. For holes BVRB206, BVRB220 and BVRB336, the grades have been averaged over the length of the mineralisation with full details available in ASX:FR ASX: FRS Bonnie Vale Project option exercised, 2nd April 2025.

Significant exploration targets, from regional, historic results (previously announced) at Bonnie Vale, most of which have never been effectively followed up, include:

- **XRBI09 – 2m @ 9.4g/t Au (from 37m), including 1m @ 17.2g/t Au,**
- **KSRC002 – 3m @ 2g/t Au (from 77m), open at depth & along strike**
- **BVRB326 – 4m @ 0.5g/t Au (from 20m),**
- **BVRB336 – with 13 continuous, down-hole metres (from 36m-EOH) of Au mineralisation > 0.1g/t Au**
- **BVRB220 – with 13 continuous, down-hole metres (from 48m-EOH) of Au mineralisation > 0.1g/t Au**
- **BVRB327 – with 8 continuous, down-hole metres (from 16m) of Au mineralisation > 0.1g/t Au, including 4m @ 0.5g/t Au**

Breakaway Dam Project (E29/1036 & E29/1037), Menzies WA

The Breakaway Dam Project represents a significant opportunity for the Company, with strong exploration targets for both copper and lithium within the Alexandra Bore greenstone belt. Historic exploration activity includes **highly anomalous drilled intercepts of copper with sulphides** as well as drilled pegmatites that were never effectively assayed.

Significant Cu results (previously released) at Breakaway Dam include:

- **BDRC10 – 6m @ 1.19% Cu (including 1m @ 3.86% Cu), 11.07g/t Ag (including 1m @ 35.7g/t Ag) from 185m, with up to 40% pyrite and pyrrhotite**
- **BDRC08 – 4m @ 0.29% Cu and 1m @ 0.67% Cu, including 1m @ 3.2g/t Ag, from 36m (end of hole = 70m)**
- **BD001 – 7m @ 0.15% Cu (including 1m @ 0.51% Cu), 1.63g/t Ag (from 124m), with up to 20% pyrite, pyrrhotite and chalcopyrite**
- **BD001 – 2m @ 0.23% Cu (including 1m @ 0.42% Cu) (from 193m), with up to 10% pyrite, pyrrhotite and chalcopyrite**
- **BD002 – 2m @ 0.45% Cu (including 1m @ 0.71% Cu) (from 106m), with up to 10% pyrite, pyrrhotite and chalcopyrite**
- **BD003 – 8m @ 0.15% Cu (including 1m @ 0.45% Cu, 2m @ 7.35g/t Ag and 1m @ 0.38% Pb) (from 145m), with up to 70% pyrite, pyrrhotite and chalcopyrite**
- **Rock chip - FR000766 – 26.7% Cu, 15.4ppm Ag and 0.5ppm Au**

Additionally, previously released historic downhole electro-magnetic (DHEM) survey results indicate several potentially sulphide-bearing conductive plates, which remain completely untested by drilling and additionally, highly anomalous, historic and recent geochemical results have been returned for Au, Ag, As, Bi, Cu, Mo, Pb, Se and Te which suggest the potential for a **VMS copper exploration target**.

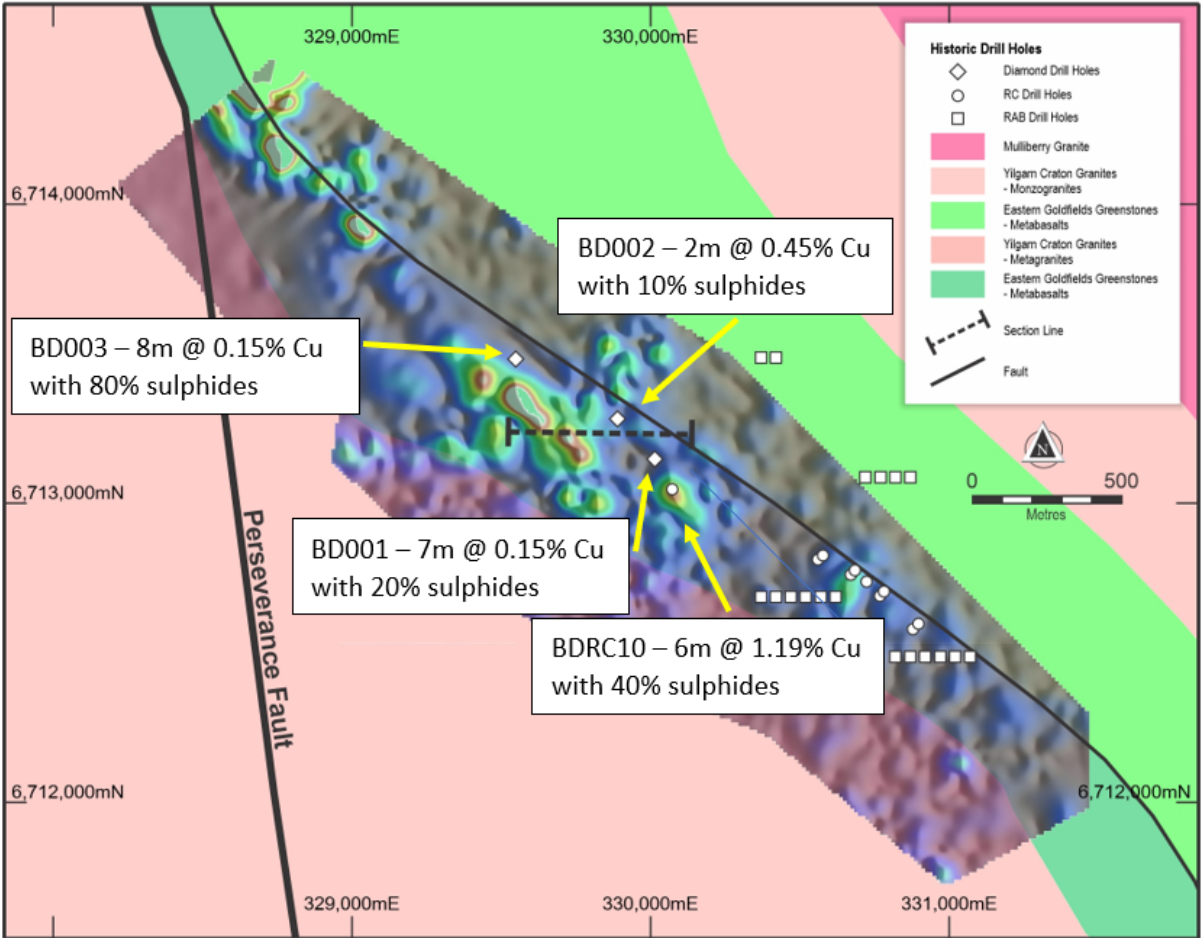

Figure 18: Ground EM over Breakaway Dam with sulphide percentages noted on intercepts and location of the cross-section seen below. Geology map courtesy of GSWA.

Figure 19: Section looking north showing interpreted conductive plates. The plate seen adjacent to BD001 and those adjacent to BD003 have been interpreted by Southern Geoscience Consultants as potentially sulphide-bearing. These electro-magnetic plates have never been drill tested.

Other Forrestania Resources projects

Although the focus of the Company during the quarter has been the Ada Ann, Bonnie Vale and Lady Lila projects, field work has been on-going at other projects across the portfolio with several field and reconnaissance visits undertaken.

Corporate

Appointment of Highly experienced Metallurgical Engineer David Geraghty as Director

On 16 May 2025, the Company announced the appointment of David Geraghty as a Non Executive Director. Mr Geraghty started his career with Rio Tinto in Ore Body evaluation, and comes from a 21 year career at Minerals Resources Limited (ASX:MIN) where he held a variety of executive roles within the mining & services divisions.

David has over three decades of extensive experience in mining disciplines including, open cut, underground, and mineral processing and logistics across key commodities gold, iron ore, mineral sands, tin, manganese and lithium. He is a qualified metallurgical engineer with a proven track record in driving strategic growth and operational discipline. His hands on operational experience in orebody evaluation, mineral processing and project development enables him to understand the critical success factors that drive business success.

Option issue

The Board has offered Mr Geraghty an option package comprising:

- 20m options exercisable at \$0.075, with a 3 year expiry date, and
- 10m options exercisable at \$0.11 with a 3 year expiry date.

Both option issues were approved by shareholders at the EGM of the Company held on 21 July 2025.

Cash Position

As of June 30 2025, the Company held \$920,000 in cash reserves.

Payments during the month included:

- Exploration expenditure of \$293K;
- Staff costs & Directors fees of \$44K
- Admin & Corporate expenditure of \$90K;

Capital Raising and Share Issues

Subsequent to approval at the 28 April 2025 EGM, 17,509,000 tranche 2 February Placement shares (announced 12 February 2025) were issued on 6 May 2025. These shares were issued at \$0.01 per share, raising \$175,090.

Subsequent to approval at the 28 April 2025 EGM, 20,036,411 March Placement shares (announced 12 March 2025) were issued on 6 May 2025. These shares were issued at \$0.025 per share, raising \$500,910.

On 20 May 2025 500,000 performance rights were exercised and converted to Ordinary Shares in line with the Company's Employee Securities Incentive Plan.

On 16 May 2025 the Company announced a strategic placement to a high net worth investor to raise \$500,000. The non-brokered placement is for 10m shares at \$0.05 per share under the Company's existing share placement capacity. The issue price compares favourably to the closing share price on 15 May 2025 of \$0.051 and represents a 3% premium to the 10 day VWAP of \$0.048.

In May 22,558 FRSOB Listed Options were exercised (exercise price \$0.075) and converted to Ordinary Shares, raising \$1.7k.

Shareholder Information

As at June 30 2025, the Company had 856 shareholders and was 310,522,428 ordinary fully paid shares on issue.

At June 30, 2025, the top 20 shareholders held 60.25% of the total issued capital.

ASX Additional Information

ASX Listing Rule 5.3.1: Exploration and Evaluation Expenditure (capitalised and expensed) during the quarter was \$293K. Full details of exploration activity during the quarter are set out in this report.

ASX Listing Rule 5.3.2: There were no substantive mining production and development activities during the quarter.

ASX Listing Rule 5.3.5: A total of \$71K was paid to related parties during the quarter comprising the

Directors' fees and superannuation (\$23k) and office rent and administration services (\$48k). The latter amount relates services for the period December 2024 to May 2025.

Board and Senior Management

David Geraghty	Non-executive Chairman
Daniel Raihani	Non-executive Director
Adam Turnbull	Non-executive Director
Ollie Clark	Company Secretary

The following market sensitive announcements were lodged on the ASX Market Announcements Platform during the quarter:

Date	Description
02/04/2025	Bonnie Vale Project Option Exercised
30/04/2025	Quarterly Activities/Appendix 5B Cash Flow Report
09/05/2025	Ada Ann Phase 2 1m Split Results Confirm High Grade 26g/t Au
13/05/2025	Lady Lila Drilling and New Tenement
16/05/2025	Experienced Mining Executive Joins Board & Placement

Tenements

In accordance with Listing Rule 5.3.3, Forrestania Resources provides the following Information concerning Its mining tenements:

- (a) E 29/1225 and E 29/1226 were surrendered in the quarter. No other applications were made during the quarter by the Company to acquire new or surrender its existing licences; and
- (b) the following table lists the Company's mining tenements held at the end of the quarter, and their location:

Project	Location	Tenement	Status	Interest Owned

Important Notices

Competent person's statement

The report and information that relates to the mineral resource estimate is based on information compiled by Mr. Ben Pollard, BSc. (Mineral Exploration & Mining Geology), Grad Cert (Geostatistics), a Competent Person, who is a Member of the AIG and AusIMM. Mr. Pollard is employed by Cadre Geology and Mining Pty Ltd (and worked as a consultant to Fortuna SL Mining Pty Ltd to complete the mineral resource estimate) and has sufficient experience, which is relevant to the style of mineralisation, geology and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person under the 2012 edition of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves (the 2012 JORC Code). Mr. Pollard consents to the inclusion in this report of the matters based on this information, in the form and context in which it appears

Disclosure

The information in this announcement is based on the following publicly available ASX announcements and Forrestania Resources IPO, which is available from <https://www2.asx.com.au/>.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original ASX announcements and that all material assumptions and technical parameters underpinning the relevant ASX announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are represented have not been materially modified from the original ASX announcements.

Cautionary statement regarding values & forward-looking information

The figures, valuations, forecasts, estimates, opinions and projections contained herein involve elements of subjective judgment and analysis and assumption. Forrestania Resources does not accept any liability in relation to any such matters, or to inform the Recipient of any matter arising or coming to the company's notice after the date of this document which may affect any matter referred to herein. Any opinions expressed in this material are subject to change without notice, including as a result of using different assumptions and criteria. This document may contain forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "believe", "plan", "expect", and "intend" and statements than an event or result "may", "will", "should", "could", or "might" occur or be achieved and other similar expressions. Forward-looking information is subject to business, legal and economic risks and uncertainties and other factors that could cause actual results to differ materially from those contained in forward-looking statements. Such factors include, among other things, risks relating to property interests, the global economic climate, commodity prices, sovereign and legal risks, and environmental risks. Forward-looking statements are based upon estimates and opinions at the date the statements are made. Forrestania Resources undertakes no obligation to update these forward-looking statements for events or circumstances that occur subsequent to such dates or to update or keep current any of the information contained herein. The Recipient should not place undue reliance upon forward-looking statements. Any estimates or projections as to events that may occur in the future (including projections of revenue, expense, net income and performance) are based upon the best judgment of Forrestania Resources from information available as of the date of this document. There is no guarantee that any of these estimates or projections will be achieved. Actual results will vary from the projections and such variations may be material. Nothing contained herein is, or shall be relied upon as, a promise or representation as to the past or future. Forrestania Resources, its affiliates, directors, employees and/or agents expressly disclaim any and all liability relating or resulting from the use of all or any part of this document or any of the information contained herein. Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations. The geochemical sampling data reported in this announcement is not intended to support a mineral resources estimation. All drilling widths given in this announcement are down hole widths and do not represent true widths.

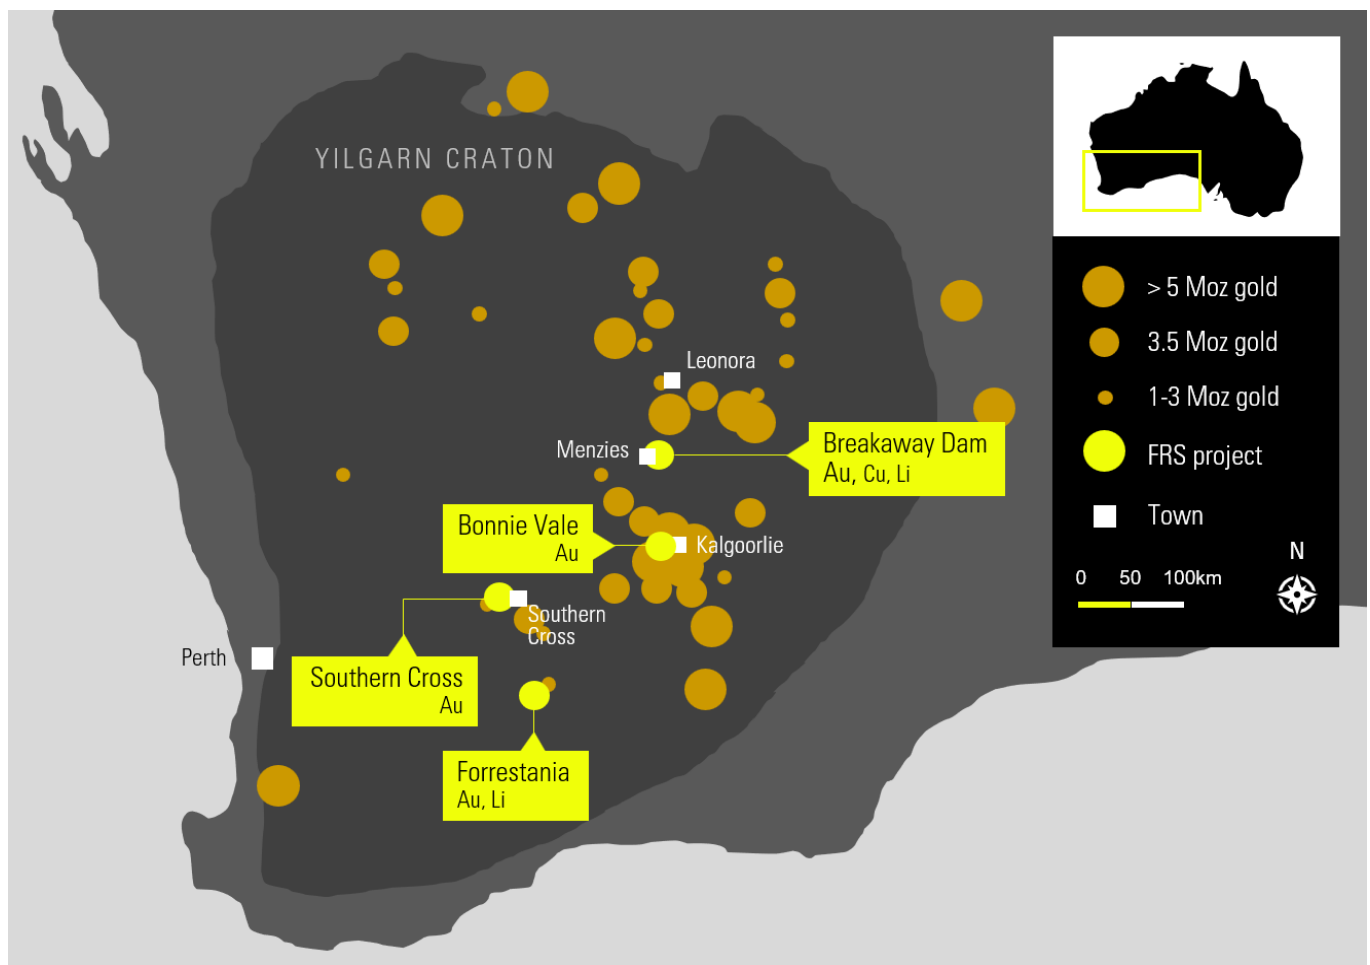

Company Profile

Forrestania Resources Limited is an Australian resources company exploring for gold and copper in the Forrestania, Southern Cross and Eastern Goldfields regions of Western Australia.

The company's Forrestania Project hosts gold and lithium prospects in close proximity to the historic Bounty gold mine, the Covalent Mt Holland Lithium Mine, and the operating Flying Fox, and Spotted Quoll nickel mines in the well-endowed southern Forrestania Greenstone Belt.

The Eastern Goldfields tenements are located within the Norseman-Wiluna Greenstone Belt of the Yilgarn Craton, close to Coolgardie, Menzies and Leonora. In total, this includes twelve Exploration Licences and four Exploration Licence Applications, covering a total area of ~1,000km². The tenements are predominately non-contiguous and scattered over 300km length, overlying or on the margins of greenstone belts.

The Southern Cross Project is located in the Southern Cross Greenstone Belt and has significant potential for gold mineralisation.

7.3	Other (please specify)	-	-
7.4	Total financing facilities	-	-
7.5	Unused financing facilities available at quarter end		-
7.6	<p>Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.</p>		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(134)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(293)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(427)
8.4	Cash and cash equivalents at quarter end (item 4.6)	920
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	920
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	2.15
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	<div style="border: 1px solid black; padding: 2px;">The board expects a relatively consistent level of net operating cash flows for the upcoming quarter.</div>	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	<div style="border: 1px solid black; padding: 2px;">The Company can raise equity capital on an as need basis using its existing capacity under Listing Rules 7.1 and 7.1A.</div>	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	<div style="border: 1px solid black; padding: 2px;">The Company expects to be able to raise sufficient funds to continue its operations and meet its business objectives.</div>	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>		

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 24 July 2025

Authorised by: The Board of Directors

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
