

Monday, 28<sup>th</sup> July 2025

## ASX Announcement

# QUARTERLY ACTIVITIES REPORT 30 JUNE 2025

## HIGHLIGHTS

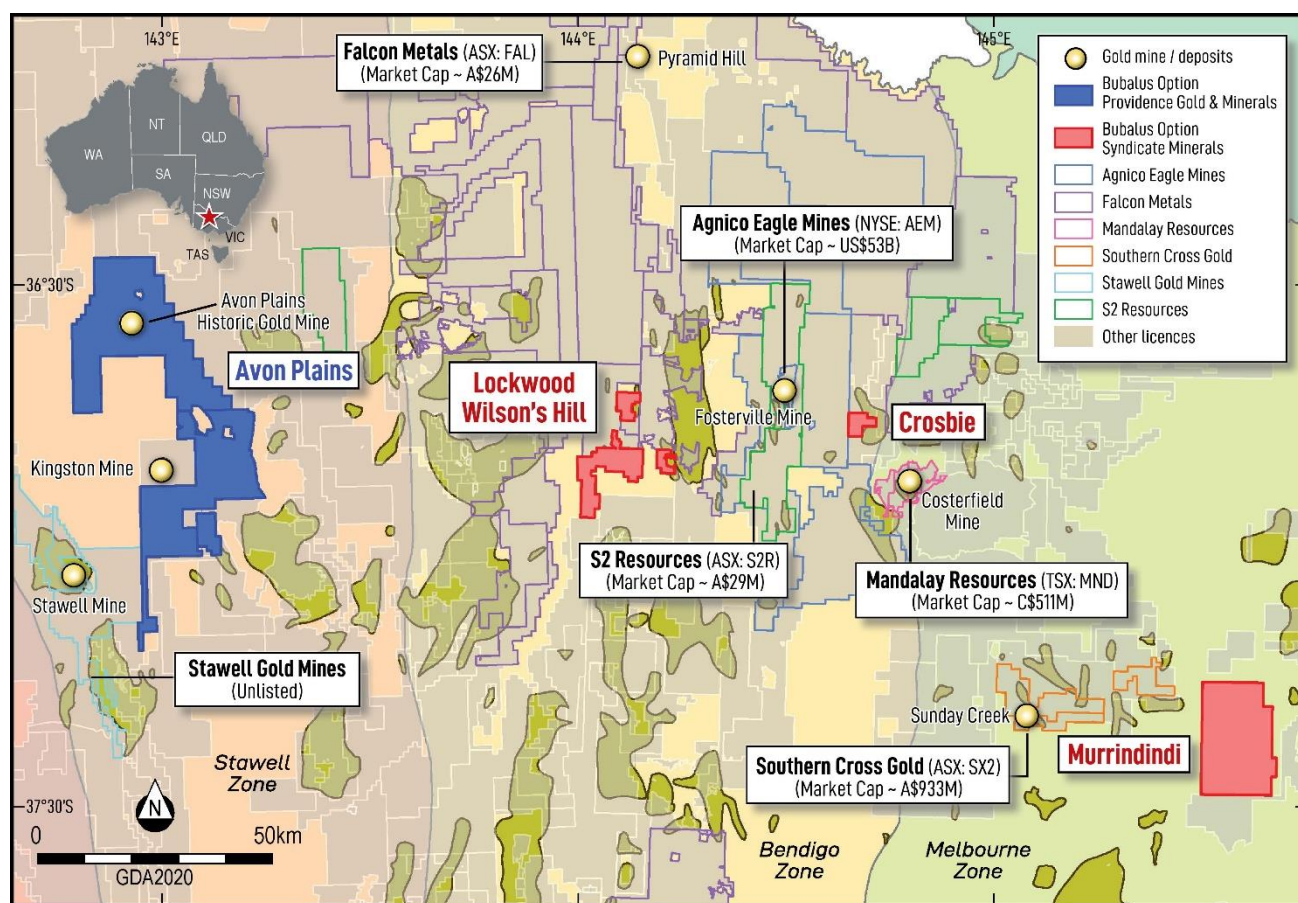

- Bubalus completed its maiden drilling program at the previously untested Crosbie South gold-antimony target, with approximately 700 metres drilled across 5 holes.
- Significant geochemical and geophysical programs were completed at the adjacent Crosbie North Fosterville-style targets, with maiden drill testing set for Q3 2025.
- Planning advancing for maiden drilling program at the Avon Plains Gold Project, a historical high-grade gold mine, in Q4 2025.
- Heritage clearance achieved for the Yinnietharra Lithium Project, allowing the planned drilling to proceed.
- Final access agreement imminent for the Nolan's East Rare Earth Project, again allowing for the planned drilling to proceed.
- Bubalus remains well funded to continue rapid evaluation of its portfolio of gold and critical minerals projects, with \$3.25m cash on hand.

Bubalus Resources Limited (ASX: BUS) (**Bubalus** or **the Company**) is pleased to report its activities for the June Quarter of 2025.

## PROJECTS SUMMARY & ACTIVITIES

### Victorian Gold Projects

During the Quarter, the Company continued exploration on its optioned portfolio of granted exploration licences located in the heart of the Victorian goldfields, headlined by the maiden drilling program at the Crosbie South Intrusive Related Gold System (IRGS) target (Figure 1).

**Figure 1. Location of key licences optioned by Bubalus**

## Crosbie South Drilling

A maiden diamond drilling program was completed at the Crosbie South Prospect, with 5 holes completed for approximately 700 metres (Figure 2). The program was completed on schedule and without incident. Results were reported post the end of the Quarter and returned gold mineralisation (up to 0.2 m @ 50 g/t Au) in every hole, with associated antimony, bismuth, silver, molybdenum and tungsten, confirming an IRGS target. Mineralisation is open at depth and along strike.

Additional activities are planned for the Crosbie South Project during the current Quarter, and will include:

- Further analysis of currently unassayed core from this drilling, on sections of core adjacent to mineralised zones, that may have been initially overlooked.
- Review, and potential remodelling, of the IP geophysical survey data, in the context of the drilling results.
- Undertaking specialist geochemical modelling of the drilling results, to assist in vectoring to potentially thicker and/or higher grades of mineralisation within the identified system.

These activities may lead to additional drilling as part of the planned program at the adjacent Crosbie North Fosterville-type targets, expected in late Q3, 2025.

*Figure 2. Drilling at Crosbie South*

### Crosbie North Geochemical and Geophysical Surveys

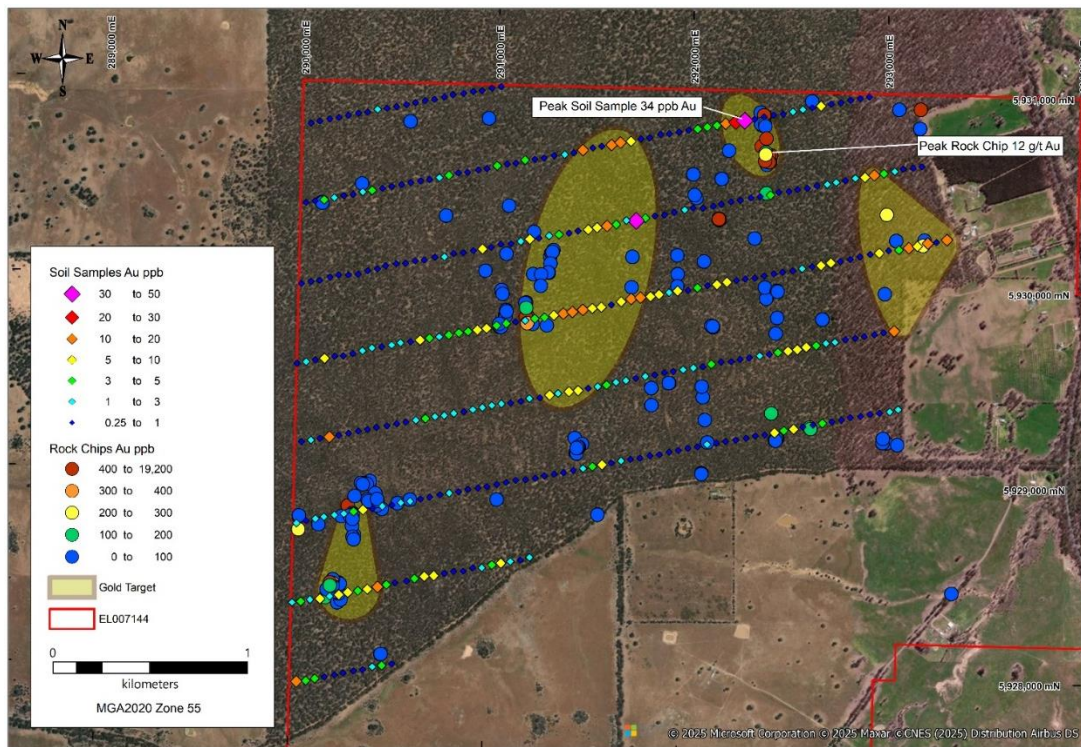

An extensive soil sampling program was conducted across Crosbie North in February 2025, consisting of 380 samples, to augment existing rock chip data (up to 12.1 g/t gold and 2.02% antimony) and assist in firming up targets for drilling.

This data shows significant anomalism for antimony, gold, arsenic and silver (refer to ASX announcement dated 8 April, 2025).

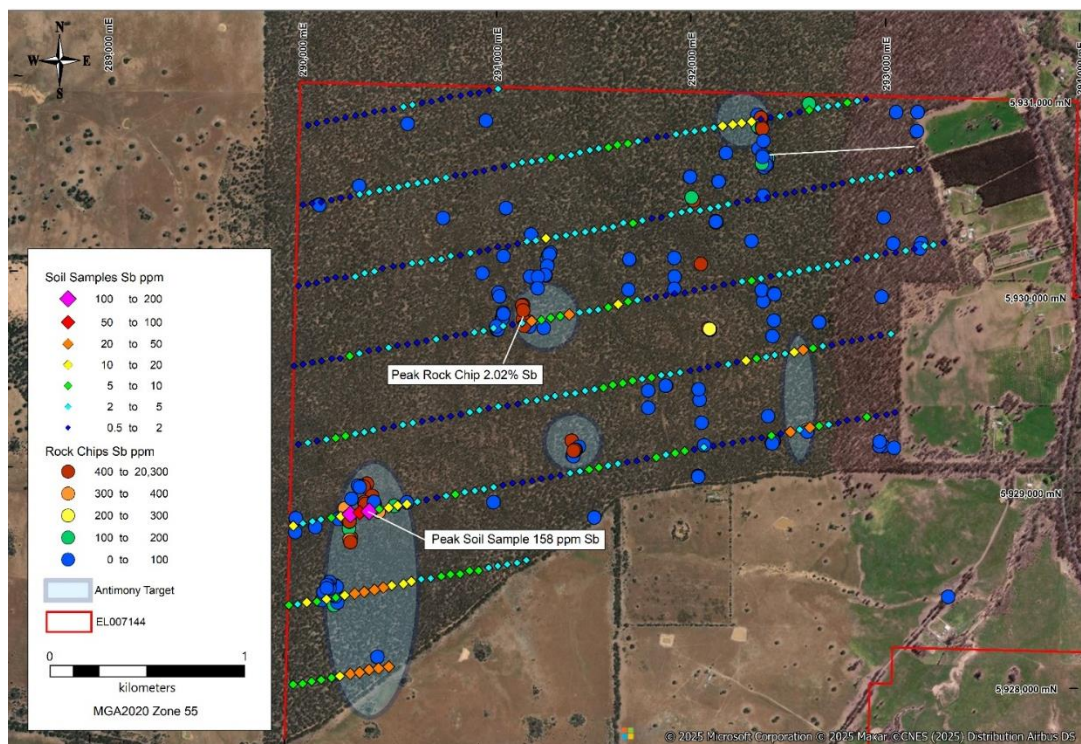

- Gold values up to **34 ppb**, **13** times the average across the data set (Figure 2)
- Antimony values up to **158 ppm**, **30** times the average across the data set (Figure 3)
- Arsenic values up to **249 ppm**, **19** times the average across the data set
- Silver values up to **0.635 ppm**, **9** times the average across the data set

A new Induced Polarisation (IP) was completed during the Quarter and comprised 5 new lines, for a total of approximately 11.8 line km, aimed at augmenting the existing single line of IP previously completed over the prospect area. Results of this survey were released post the end of the Quarter and have generated significant targets for drill testing, which is scheduled for late Q3, 2025 (refer to ASX announcement dated 23 July, 2025).

**Figure 3. Key Gold Target Areas at Crosbie North**

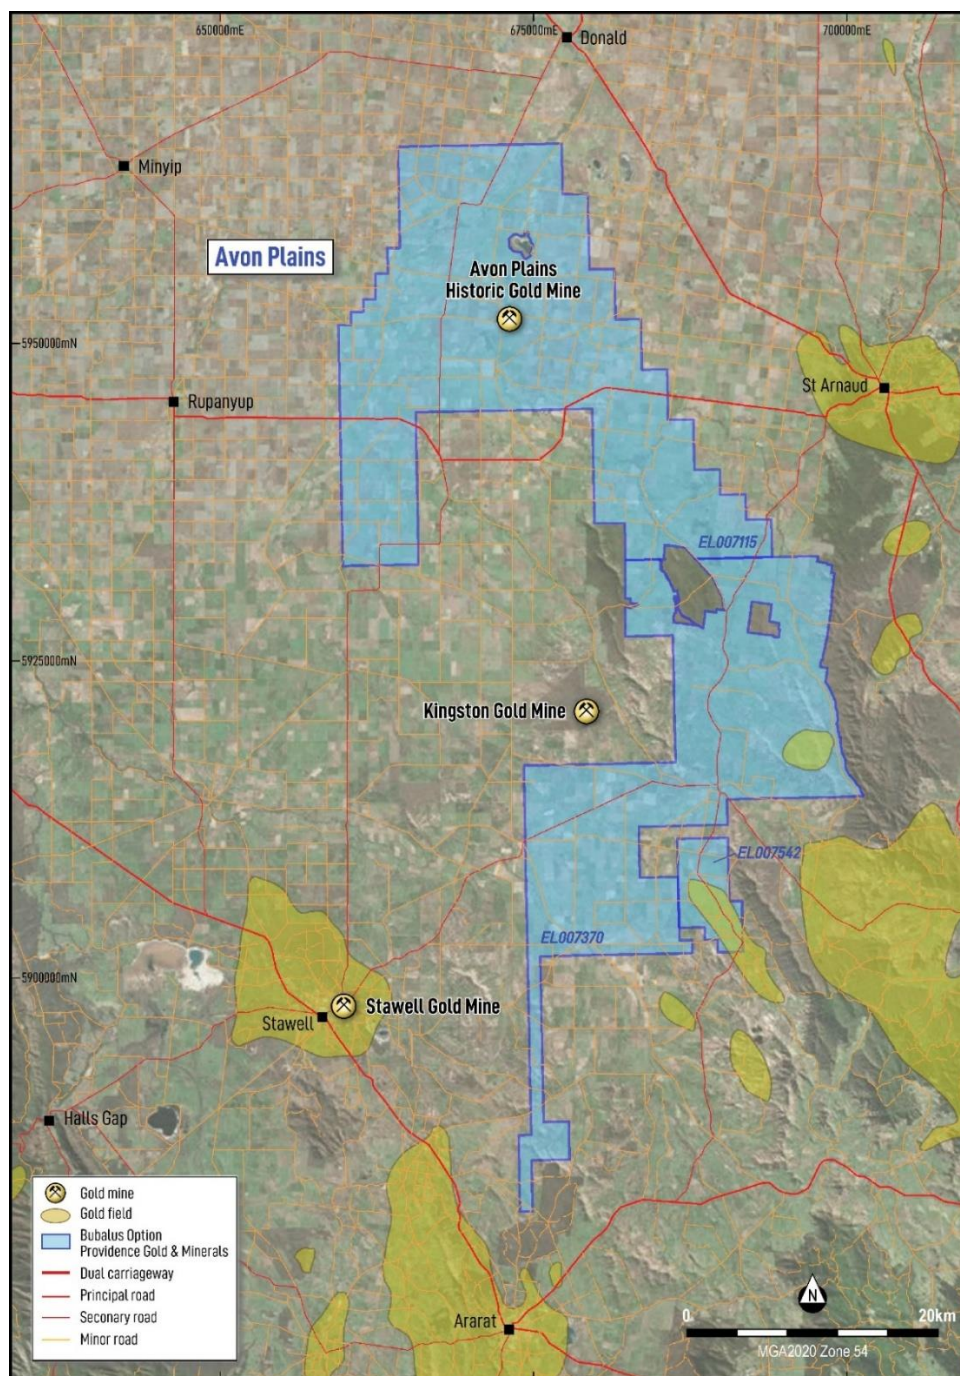

**Figure 4. Key Antimony Target Areas at Crosbie North**

## Avon Plains Gold Project

The Company is preparing for its maiden drilling program at Avon Plains (Figure 5), with landholder liaison being undertaken ahead of field work commencement. A drilling program will be implemented at the conclusion of the harvesting season, expected to be in late October, 2025. The initial area for drilling will focus on the historically mined high grade gold reef, where no effective drilling has ever been undertaken and a historic shaft remains (refer to ASX announcement dated 27 March 2025).

**Figure 5. Avon Plains Infrastructure and nearby mines**

*Figure 6. Photos of the Avon Plains Historic Gold Mine headframe prior to its removal*

### Murrindindi Gold Project

A new geochemical sampling program commenced at the Murrindindi Gold Project during the Quarter, with the initial focus on the Tin Creek Prospect in the southeast of the licence area. Results from this work will be reported as they become available, with the aim being to generate targets for drill testing.

### Nolans East Project

Nolans East is located 15km southeast of the Nolans Bore deposit owned by Arafura Resources Limited (**Arafura**). Arafura has defined a Mineral Resource at Nolans Bore of 56 million tonnes at an average grade of 2.6% total rare earth oxides (**TREO**), including a high proportion of neodymium-praesidium oxides (26%  $\text{Nd}_2\text{O}_3 + \text{Pr}_6\text{O}_{11}$  (**NdPr**)), and 11% phosphate ( $\text{P}_2\text{O}_5$ )<sup>1</sup>.

Up to \$840 million in Commonwealth government funding has been committed for the construction of the Nolans Bore mine and refinery development. A \$200 million investment commitment was received during January 2025 from the National Reconstruction Fund Corporation (NRFC).

The final approval required before drilling can commence is an updated Land Access Agreement (**LAA**), required due to a change of pastoral station ownership. This agreement is anticipated to be finalised during the current Quarter, which will then allow drill testing of compelling targets outlined through the previous work by Bubalus (Figure 7). Drilling contractors have been selected and remain on standby pending an executed LAA.

<sup>1</sup> <https://www.arultd.com/projects/nolans.html> ; also refer ARU.ASX Announcement 7 June 2017.

**Figure 7. Results from surface sampling at Nolans East Project**

## Yinnietharra Lithium Project

The Yinnietharra Lithium Project is located only 2km's east of the Malinda Prospect (Figure 8) owned by Delta Lithium Limited (ASX :DLI) (**Delta**). Drilling at Malinda by Delta has identified spodumene-hosted lithium mineralisation over a distance of 1.6 km and to a depth of 350m<sup>2</sup>. No drilling has been undertaken on the Yinnietharra Project.

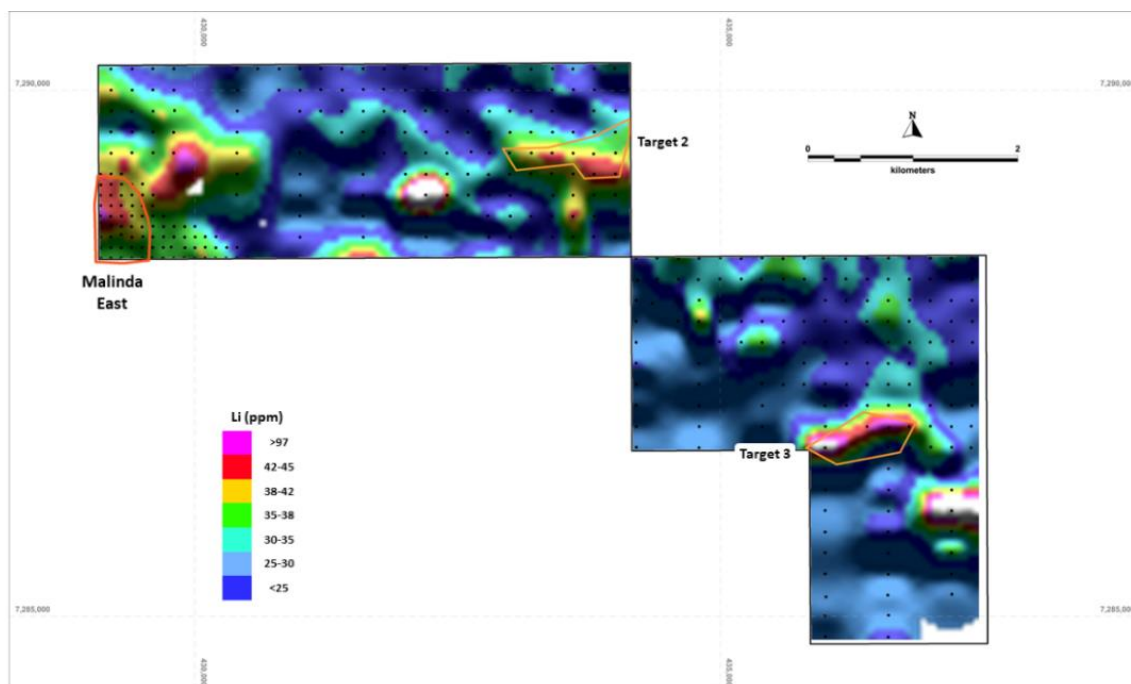

Spodumene bearing pegmatites identified by Delta<sup>1</sup> strike in an east-west orientation, trending in the direction of Bubalus' Yinnietharra Project boundary, representing an obvious walk-up target for initial activities. This target (Malinda East) was confirmed by soil sampling results from close spaced sampling (100m x 100m) which detected a clear area of anomalous lithium and caesium at surface in this area (Figure 9). These anomalies may be present due to undercover spodumene bearing pegmatites.

An ethnographic and archaeological work area clearance survey was conducted during the Quarter, in partnership with the Burringurrah Wajarri Custodians and Three Sisters Heritage Surveys. Bubalus would like to sincerely thank all parties involved in the survey for their efforts in achieving this outcome, which will allow the approved drilling program to commence.

<sup>2</sup> Refer to Delta Lithium Limited's ASX Announcement on 21<sup>st</sup> August 2023 "Excellent Yinnetharra Initial Metallurgical Results and Drilling Update".

**Figure 8. Location of Yinnietharra Project relative to other holdings and lithium prospects in the Gascoyne Region**

**Figure 9. Plan showing gridded lithium-in-soils results at Yinnietharra showing location of Malinda East**

## Coomarie Project

The Coomarie Project is located approximately ~600km from Alice Springs, near the border with Western Australia and Northern Territory. The Coomarie Project overlies a prominent domal feature in the Tanami Region. REE mineralisation within the Tanami Region is hosted at unconformities between older metamorphic rocks associated with granitic intrusions and younger sediments (for example Browns Ridge (ASX:NTU)<sup>3</sup> and Watts Ridge-Castella (ASX:PVW)<sup>4</sup>). Mineralisation is often controlled by faults which cross cut the unconformity and are interpreted to have controlled fluid flow.

No exploration was undertaken on the project during the Quarter.

## Amadeus Project

The Amadeus Project hosts numerous occurrences of outcropping manganese mineralisation. While these have been extensively mapped and sampled by previous explorers only the Tardis project has been tested by drilling.

The Amadeus Project also hosts several targets prospective for base metal mineralisation, specifically zinc, copper and cobalt, which are the subject of ongoing work.

A rationalisation of the tenure was undertaken during the Quarter, to focus on key areas of prospectivity identified during desktop work.

## Pargee Project

The Pargee Project is located 70km west of the Coomarie Project along the Tanami Road and then 50km north of the Tanami Road. The Project is located towards the western end of the Granites – Tanami Inlier, which is a highly deformed and metamorphosed, Palaeoproterozoic block of rocks approximately 250km long and 100km wide.

Most of the area of the Pargee Project is interpreted to be underlain by lithologies of the Killi to the east and Lower Stubbins Formation to the west as well as the Upper Stubbins Formation and a folded dolerite unit in the centre.

No substantive exploration was carried out on the Pargee Project during the Quarter.

## FORECAST ACTIVITIES FOR QUARTER 3

### Victorian Gold Projects (Including Avon Plains)

- Reporting of drilling results from Crosbie South (completed)
- Reporting of geophysical survey results from Crosbie North (completed)
- **Commencement of drilling at the Crosbie North Fosterville-style targets.**
- Continuation of reconnaissance exploration at the Murrindindi and Castleburn Projects, including geochemical sampling and geological mapping.
- Continue preparation for the maiden drilling program at Avon Plains in Q4 2025.

<sup>3</sup> NTU.ASX Announcement 9 June 2022 (Corporate Presentation)

<sup>4</sup> PVW.ASX Announcement 1 November 2022 (Presentation – Australian Rare Earth Conference)

**Nolan's East**

- Finalisation of Land Access Agreement (LAA)
- Engagement of drilling contractor
- Preparation for maiden drilling program (Q3/Q4) (subject to completion of LAA and rig availability)

**Yinnietharra**

- Preparation for maiden drilling program and/or strategic partnering process.

**CORPORATE**

On 3 April 2025, the Company announced a successful capital raising of \$1.5 million and issued 9,090,909 fully paid ordinary shares at an issue price of \$0.16 per share.

On 30 May 2025, the Company issued the following securities subsequent to receiving Shareholder approval at the Company's General Meeting on 29 May 2025:

- 700,000 fully paid ordinary shares for consideration regarding the exclusive option to acquire the Avon Plains gold Project;
- 303,030 fully paid ordinary shares to a Director relating to participation in the April placement;
- 1,818,182 unlisted options exercisable at \$0.2475 expiring 30 May 2028 to Brokers for the services provided in the April placement; and
- 4,500,000 performance rights, expiring 30 May 2028 to Directors as part of their remuneration package.

**Cash Position**

Bubalus held cash reserves at the end of Quarter of approximately \$3.25 million.

**Shareholder Information**

As at 30 June 2025, the Company had 488 shareholders and 57,388,008 ordinary fully paid shares on issue with the top 20 shareholders holding 39.51% of the total issued capital.

**ASX ADDITIONAL INFORMATION****Finance and Use of Funds**

Pursuant to the requirements of Listing Rule 5.3.1: Exploration and Evaluation Expenditure during the Quarter was \$639,000. Full details of exploration activity during the Quarter are set out in this report.

Pursuant to the requirements of Listing Rule 5.3.2: There were no substantive mining production and development activities during the Quarter.

Pursuant to the requirements of Listing Rule 5.3.5: Payments to related parties of the Company and their associates during the Quarter was \$118,000. The Company advises that this relates to director's fees and consulting services.

## TENEMENT TABLE AS AT 30 JUNE 2025

Tenement ID	Project	Status	Holder(s)*	Interest at End of Quarter	Change During the Quarter
EL32796	Amadeus	Granted	Tomorrow Minerals Pty Ltd <sup>1</sup>	100%

**ABOUT BUBALUS RESOURCES**

Bubalus has six projects, the Victorian Gold Projects, the Yinnietharra Lithium Project (prospective for lithium), Amadeus Project (prospective for Manganese), the Coomarie Project (prospective for Heavy Rare Earths), the Nolans East Project (prospective for Light Rare Earths) and the Pargee Project (prospective for Heavy Rare Earths), which are located in the Northern Territory and Western Australia:

*Victorian Gold Projects* (Au/Sb) – A portfolio of 8 granted licences in the heart of the Victorian Goldfields. Headlined by the Crosbie Project, which has drill ready targets supported by high grade surface gold and antimony, geophysical anomalies, and geological characteristics. Drilling scheduled for Q3 and Q4, 2025 at the Crosbie North and Avon Plains Projects.

*Nolans East Project* (Light REEs) - The project covers 380 km<sup>2</sup> of the Arunta Province, analogous to Nolan's Bore light rare earth deposit and is prospective for light rare earths, located only 15 kms east of Arafura's (ASX:ARU) 56Mt NPV \$1.011Bn light rare earth deposit.

*Yinnietharra Project* (Li) - Yinnietharra Project with the boundary of E09/2724 lying only 2 km east of the Malinda Prospect owned by Delta Lithium Limited (ASX:DLI) (**Delta**). Drilling at Malinda by Delta has identified spodumene-hosted lithium mineralisation over 1.6 km and to a depth of 350 m<sup>5</sup>.

*Amadeus Project* (Mn) - Significant land package with 150 kms of strike containing outcropping high-grade manganese, located 125 km south of Alice Springs, where historical exploration has identified 11 manganese occurrences, along with cobalt and Ni-Zn-Cu anomalism.

*Coomarie Project* (Heavy REEs) - The project covers 1,315 km<sup>2</sup> and presents as a geological analogue to Browns Dome, host to Northern Mineral's (ASX:NTU) Browns Range heavy rare earths deposit where mineralisation is hosted on margins of granite dome intrusive where the unconformity between Gardiner Sandstone and Browns Range Metamorphics exist and located in the Tanami Region.

*Pargee Project* (Heavy REEs) - The project is prospective for heavy rare earths and located 30 kms from PWV Resource's (ASX:PVW) Watts Rise heavy rare earths discovery.

## COMPETENT PERSONS STATEMENT

Information in this report relating to Exploration Results is based on information compiled, reviewed and assessed by Mr. Brendan Borg, who is a Member of the Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists. Mr. Borg is a Director of Bubalus Resources and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined by the 2012 Edition of the Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves (**JORC Code**). Mr. Borg consents to the inclusion of the information in the form and context in which it appears.

Some of the information is extracted from the Independent Geologist's Report contained within the Prospectus released to the ASX on 11 October 2022 and available to view on the Bubalus Resources Limited website, [www.bubalusresources.com.au](http://www.bubalusresources.com.au) or on the ASX website, [www.asx.com.au](http://www.asx.com.au) under the ticker code BUS.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

<sup>5</sup> Refer to Delta Lithium Limited's ASX Announcement on 21<sup>st</sup> August 2023 "Excellent Yinnietharra Initial Metallurgical Results and Drilling Update".

7.5	<b>Unused financing facilities available at quarter end</b>		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
	N/A		

<b>8.</b>	<b>Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1	Net cash from / (used in) operating activities (item 1.9)	(319)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(579)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(898)
8.4	Cash and cash equivalents at quarter end (item 4.6)	3,248
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	3,248
8.7	<b>Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	3.62
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: N/A	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: N/A	

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

*Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.*

## Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 28 July 2025

Authorised by: By the Board of Bubalus Resources Limited  
(Name of body or officer authorising release – see note 4)

## Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
