

## Fieldwork Underway at Evanstone & Yerilgee Prospects

**Catalina Resources Ltd** (ASX: CTN) ('Catalina' or the 'Company') is pleased to advise that a field program has commenced at the Evanstone and Yerilgee prospects in the Central Yilgarn. The program is targeting gold-in-soil anomalies originally defined during the 2023 air-core drilling campaign and refined by follow-up drilling in 2024.

### Program Objectives:

- Execute detailed soil sampling and geological mapping across the 2023 anomalies and 2024 drill sites.
- Refine and confirm high-priority, drill-ready targets for the RC drill campaign scheduled to commence once heritage approvals are secured.

### Background:

Catalina completed its acquisition of the Yerilgee and Evanstone greenstone belts from Dreadnought Resources (ASX: DRE) in January 2025, consolidating a significant exploration platform across multiple anomalous zones in the Central Yilgarn region.

Executive Director, Ross Cotton, commented:

*"Building on the strong 2023 soil anomalies and the 2024 drilling results from DRE, this targeted field program at Evanstone and Yerilgee will significantly improve our drill-target definition and set the stage for a high-impact RC campaign."*

A further update will be issued once the current fieldwork is complete and RC drill targets are finalised.
