## About Arrow Minerals

Arrow is focused on creating value for shareholders through the discovery and development of mineral deposits into producing mines. The Company's development strategy is to streamline a pathway to execution of a 'starter mine' that can later be expanded once in production<sup>2</sup>.

Arrow currently has been advancing two projects in Guinea, West Africa. The Niagara Bauxite Project<sup>3</sup> (**Niagara, Niagara Project**), for which Arrow holds an option to acquire, and the Simandou North Iron Project (**Simandou North, SNIP**). Both Niagara and Simandou North are located within trucking distance to the Trans-Guinean Railway (TGR) that is currently under construction by Winning Consortium Simandou. The location of the Niagara Project relative to the TGR offers substantial advantages for its development, including future access to multi-user rail and port infrastructure (refer Figure 1).
