June 2025 Quarterly Activities Report, Appendix 4C & Business Update

The Board of Murray Cod Australia Ltd (**'MCA**' or the **'Company**') is pleased to provide its Quarterly Cash Flow Report (**'Appendix 4C**') and Quarterly Activities Report for the quarter ended 30 June 2025 (**'Q4 FY25**').

Highlights for Q4 FY25:

- Biomass in grow-out increased to 2,481t, up 18% over March 2025 and 298% year-on-year.
- Significant biomass became available for sale at the end of May 2025, with customer receipts for Q4 up 33.5% previous corresponding period ("pcp"), and receipts for the month of June 2025 up 46.6% over June 2024 highlighting a positive sales trend for Q1 FY26.
- Processed fresh fish sales increased by 32.3% over pcp.
- Larger distribution and secured offtake discussions underway to expand MCA's sales footprint through secured sales arrangements (both domestically and internationally) expected in Q1 FY26.
- Halal and BAP sustainability certification remains underway, with BAP audit expected in Q1 FY26.

The biomass growth strategy is now transitioning into sales roll-out and an expanding MCAs sales footprint.

Biomass

At the end of Q4, MCAs unaudited biomass in grow-out ponds increased to 2,481t, up 18% over March 2025 and closing the FY25 year up 298% year-on-year.

MCA fish biomass per weight range greater than 600grams

This is Unaudited data as at 30 June 2025

MCA estimates approximately 1,000t is required to be harvested by end of January 2026 to accommodate the current biomass growth rate and to continue fully utilising MCA's existing infrastructure.

Sales

Total receipts for Q4 increased 33.5% pcp, with receipts for the month of June up 46.6% over June 2024 highlighting a step change in sales trend for Q1 FY26. The improved volume of fish becoming available has had a helpful impact on the increased sales in June. Processed fresh fish sales for the quarter increased by 32.3% over pcp, with an average weight per fish harvested of 1.53 kg.

Domestic markets, which are the primary focus for sales growth in the coming year, saw

Murray Cod Australia Ltd ABN 74 143 928 625 2-4 Lasscock Road, Griffith NSW,2680

an increase in customer sales across all states and territories, with New South Wales up 14.7% over pcp, and Victoria up 51.7% over pcp. Currently, sales to domestic supermarkets have only been available in strategically selected Woolworths stores in NSW. We anticipate growth in this segment during H1 FY26 with further store roll outs currently being negotiated. We are also aiming for growth in the frozen HORECA (hotels, restaurants & catering) market which has not previously been supplied by MCA.

As more market-sized fish become available, harvest volumes will increase significantly over the year ahead. In preparation for this scale-up, we are implementing carefully planned changes to our harvest and processing workflows to ensure efficiency and quality at greater volumes. This operational evolution is also enabling the expansion of our product range and distribution channels to support the increased sales capacity.

While the highest margins and strongest demand continue to lie with fresh fish in the 2.8kg+ category, our disciplined approach to converting biomass into cash will see us target broader market opportunities. This includes the strategic introduction of varied size grades and product formats—balancing premium positioning with throughput efficiency to unlock value across the entire harvest.

The split between domestic and international sales for Q4 FY25 was 96% domestic and 4% international. Sales for the quarter in international markets remained stable with pcp. Given the total biomass at the end of Q4, in some size grades MCA now meets the quantity thresholds necessary to provide sustainable supply under larger offtake and distribution arrangements. Following international marketing efforts earlier this year, larger distribution, offtake and channel partnership discussions are ongoing to expand MCA's global sales footprint.

Corporate sales partnerships in the premium travel & tourism industry are also being negotiated during H1 FY26, assisting with further brand awareness through Asian Pacific ('**APAC**'). MCA will continue to pursue these higher-margin export market opportunities, and an update on progress is expected in Q1 FY26.

Certifications & Registrations

Halal certification has progressed with our feed suppliers being integral to this process. Certification is expected once final feeding options have been determined. This will open access to distribution and the next phase of corporate partnership discussions in the Middle East. MCA is still in the process of obtaining Best Aquaculture Practices (**BAP**') certification to meet one of the accredited sustainability standards. The BAP certification

Murray Cod Australia Ltd ABN 74 143 928 625 2-4 Lasscock Road, Griffith NSW,2680

will allow MCA to increase domestic sales to supermarkets, larger retail and the travel and tourism industry in APAC. This remains on-track for approval in Q1 FY26 but is contingent on BAP organisation timetable.

MCA's registration process to include 'Aquna Cod' to the approved processed product list for export into China is still underway. An outcome on this is expected in Q1 FY26, however is contingent upon the Chinese governments timetable.

Conclusion

The management and board continue to be pleased with the successful execution of the long-term biomass growth strategy and the commencement of the sales rollout. With the biomass at historic levels and momentum in all key sales metrics, the board remains positive on the outlook for FY26 and the longer-term direction of the Company.

Management and the board will continue to employ prudent capital management measures and remain focused on the sales rollout in H1 FY26 through growing existing long-term relationships, securing new sales channels, distributor arrangements and corporate partners.

We look forward to providing updates in Q1 FY26 on our continued progress.
